Dear Planning Inspectorate.

As a resident of Cawston and a Registered Interested Party for all of the proposed Wind Farms in our District I feel that I must make a comment on all of the recent letters that you have received from Non Registered Parties claiming that Norfolk Boreas must go ahead without delay as this will cause untold problems to their Companies and to the Project if there was any extension to the proposed time table as many of us are requesting, which we think we are doing so with good reason.

As I have stated in many submissions over the years, I am 100% behind renewable energy, I have Solar Panels on my property, a good investment. On visits back to see Family in the North of The Netherlands each year I take great interest in the on going development of the Wind Farms all over The Netherlands, the difference to what is being proposed in Norfolk is that they do not dig up miles of Country side to lay cables and then build massive Sub Stations, they build theirs adjacent to the Turbines, an argument perhaps for an Off Shore Ring Main ?

Back to all these letters stating we have had many years to get our argument across and our time is now up, I would say that we are still arguing because over the past years nobody has listened to our many concerns of what all the proposed extra traffic will do to our Village in Cawston. in a nut shell it will destroy the lives of all of those who are unfortunate enough to live on the route, it will cause business to close and there will be added dangers to all of those who have to use this route to go about their daily business, the main one being Children going to the local School which sits directly on the route.

Most of these letters seem to come from people who say they have a vested interest in the Project going ahead, I am perturbed by the fact that although they all come from different Companies, they all seem to be from a similar template, where did this originate from ?

In my view we need an extension to continue to be able to get our concerns listened too even after all of this time, to allow people now to come in at this late stage whose main objective looks like it is profit before the little man is wrong.

I hope and trust my views will at least have attention paid to them.

Brian Schuil
