Application by Drax Power Ltd for an Order Granting Development Consent for the Drax Re-power Project

Response to Section 51 advice following issue of decision to accept the application for examination

Dear Mr Johansson,

In our recent letter (dated 3 July 2018) issued in response to the Section 51 advice issued by the Planning Inspectorate ('PINS') (dated 26 June 2018), we enclosed Appendices A to K to the Flood Risk Assessment (document reference 6.8) which were missing from the original submission due to an administrative error. Appendix B ("Proposed Site Layout – One Unit Option") comprises the plans submitted under document reference 2.5B ("One Unit Option Indicative Plant Layout"). Appendix C ("Proposed Site Layout – Two Unit Option") comprises the plans submitted under document reference 2.5A ("Two Unit Option Indicative Plant Layout").

However, these plans were an older version of the layout plans. In addition, sheets 1 and 8 of both these plans were recently updated as part of our Section 51 response. For consistency, we have therefore now also updated Appendix B and Appendix C to the Flood Risk Assessment.

I enclose an electronic copy of the updated Flood Risk Assessment, now Revision 002, with updated Appendices B and C.

I also enclose the updated Application Guide (document reference 1.2 – Rev 003) with an updated Table 5 (“Application Documents”) to reflect this amendment.

Please do not hesitate to get in touch should you have any questions.

Yours sincerely

Jim Doyle
Environmental Consents Officer
