

Dear Michele Gregor,

I would like to attend the Preliminary Meeting and, if not mentioned, yet relevant, I would like to stress the importance of considering the potential of harm emanating from the carbon emitting aspect of the proposed development, particularly in the light of the precautionary principle, and beyond that the importance of seeking adequate ways to address this within the planning process, as we are facing a situation of market failure where there is an urgent need, but no incentive to meet climate targets.

Communication via email is fine by me.

Kind regards,  
Julian May
