**E-Mail:**

**Date:** 29th November 2022

Dear Sir/Madam,

### **Planning Act 2008**

### **Thurrock Flexible Generation Plant Project – Non Material Change EN010092**

**Proposal:** Consultation from the Planning Inspectorate for application for a non-material amendment to the Thurrock Flexible Generation Plant Development Consent Order 2022 Schedule 1 involving the proposed change and amendment to Work no 1B in Schedule 1 of the DCO to allow for the battery element of the authorised DCO to deliver either the consent battery output and duration (i.e., up to 150MW at four hours duration); or up to 600MW at one hour duration; or any output between 150MW and 600MW at a duration that results in 600MWh of capacity. (DCO reference EN010092: Thurrock Flexible Generation Plant comprising gas reciprocating engines with electrical output totalling 600 MW; batteries with electrical output of 150 MW; gas and electricity connections; the creation of access roads and a causeway; and creation of habitat and exchange Common Land).

**Location:** Thurrock Flexible Generation Plant Fort Road Tilbury

Further to the above I write to you to provide a response to the non material change and this Council raises no objections to the proposed non material change. I apologise for the delayed response to the correspondence.

I trust that this information is of assistance and should wish to contact me regarding the content of this letter then please use the email address provided.

Yours faithfully

Chris Purvis  
Major Applications Manager
