Dear Dee

**Planning Act 2008 (as amended) – Section 55
Application by Cory Riverside Energy for an Order Granting Development
Consent for the Riverside Energy Park
Adequacy of consultation request**

Thank you for your letter of 16 November 2018 concerning the above.

As you know through our subsequent telephone conversation and exchange of emails I could find no record of Brentwood Borough Council being notified about the proposal at the pre application stage. I understand from your email of 28 November that this is because no notification was sent to us.

I think it unlikely that we would have made a substantive comment on the proposal had we been notified. On that basis it does not seem to be in the public interest to make adverse comments on the adequacy of consultation in relation to the proposed application as this risks delay in the consideration of the project.

If there is further communication regarding the proposal please use the email address below.

Yours sincerely

Mike Ovenden

Consultant Principal Planner
