DATE: 07/02/2019	YOUR REF Riverside Energy Park - Bexley

SUBJECT Riverside Energy Park – Bexley

Air Quality

I have reviewed the Environmental Statement and accompanying air quality modelling assessment, for the proposed Riverside Energy Park. I can confirm that there will be no implications in terms of air quality on for the Borough of Thurrock. The modelled annual mean nitrogen dioxide (NO₂) isopleth in figure 7.7, which represents a conservative approach in the modelling shows an insignificant increase in concentrations downwind of the plant, this area being Rainham in Havering. There is no increase in concentrations within Thurrock as it is too far away to have any impact.

On this basis I have no objections in terms of air quality.

Noise

There are no implications for noise
