1 Introduction

1.1 Purpose of the Statement of Common Ground

- 1.1.1 This Statement of Common Ground ('SoCG') has been prepared in respect of the Development Consent Order ('DCO') application for the proposed Boston Alternative Energy Facility ('the Facility') made by Alternative Use Boston Projects Limited ('AUBP') to the Planning Inspectorate under section 37 of the Planning Act 2008 ('Planning Act').
- 1.1.2 This SoCG does not seek to replicate information which is available elsewhere within the Application Documents. All documents are available on the Planning Inspectorate website.
- 1.1.3 The SoCG has been produced to confirm to the Examining Authority where agreement has been reached between the parties named in **Section 1.3**, and where agreement has not (yet) been reached. SoCGs are an established means in the planning process of allowing all parties to identify and so focus on specific issues that may need to be addressed during the examination.
- 1.1.4 It may be subject to further updates and revisions during the examination process.

1.2 Description of the Proposed Development

- 1.2.1 The Facility covers 26.8 hectares ('ha') and is split in to two components: the area containing operational infrastructure for the Facility (the 'Principal Application Site'); and an area containing habitat mitigation works for wading birds (the 'Habitat Mitigation Area'). The Facility will generate power from Refuse Derived Fuel ('RDF') with the 'thermal treatment' process for generating power converting the solid fuel into steam, which is then used to generate power using steam turbine generators. It will have a total gross generating capacity of 102 MWe and it will deliver approximately 80 MWe to the National Grid. The Facility will be designed to operate for at least 25 years, after which it may be decommissioned.
- 1.2.2 The Principal Application Site is located at the Riverside Industrial Estate, Boston, Lincolnshire. This site is next to the tidal River Witham (known as The Haven) and down-river from the Port of Boston. The Habitat Mitigation Area covers 1.5 ha and is located approximately 170 m to the south east of the Principal Application Site, encompassing an area of saltmarsh and small creeks at the margins of The Haven.

1.2.3 The main elements of the Facility will be:

- Wharf and associated infrastructure (including re-baling facility, workshop, transformer pen and welfare facilities);
- RDF bale storage area, including sealed drainage with automated crane system for transferring bales;
- Conveyor system between the RDF storage area and the RDF bale shredding plant, part of which is open and part of which is under cover;
- Bale shredding plant;
- RDF bunker building;
- Thermal Treatment Plant comprising three separate 34 MWe combustion lines and three stacks;
- Turbine plant comprising three steam turbine generators and make-up water facility;
- Air-cooled condenser structure, transformer pen and associated piping and ductwork;
- Lightweight aggregate ('LWA') manufacturing plant comprising four kiln lines, two filter banks with stacks, storage silos, a dedicated berthing point at the wharf, and storage (and drainage) facilities for silt and clay;
- Electrical export infrastructure;
- Two carbon dioxide ('CO₂') recovery plants and associated infrastructure;
- Associated site infrastructure, including site roads and car parking, site workshop and storage, security gate, and control room with visitor centre; and
- Habitat mitigation works for Redshank and other bird species comprising of improvements to the existing habitat through the creation of small features such as pools/scrapes and introduction of small boulders within the Habitat Mitigation Area.

1.3 Parties to this Statement of Common Ground

1.3.1 This SoCG has been prepared in respect of the Facility by (1) AUBP, and (2) Western Power Distribution (East Midlands) Plc ('WPD').

1.3.2 **AUBP** is a privately-owned company, established for the purpose of securing development consent for the Facility and then developing and operating the Facility. The company team has been involved in industrial development at the site in Boston, Lincolnshire since 2004.

1.3.3 **WPD** is the Distribution Network Operator ('DNO') responsible for distributing electricity in the East Midlands Region. Western Power Distribution is regulated by the Office of the Gas and Electricity Markets ('Ofgem'). WPD have entered a contractual agreement, with Harlaxton Engineering Services, acting

on behalf of AUBP, in relation to connecting the proposed development to the existing 132Kv Overhead Line, via WPD's infrastructure.

1.4 Terminology

1.4.1 In **Table 3-1** in the Issues section of this SoCG:

- a) "Agreed indicates area(s) of agreement;
- b) "Under discussion" indicates area(s) of current disagreement where resolution remains possible, and where parties continue discussing the issue to determine whether they can reach agreement by the end of the examination; and
- c) "Not agreed" indicates a final position for area(s) of disagreement where the resolution of divergent positions will not be possible, and parties agree on this point.

2 Overview of Previous Engagement

2.1.1 The parties have been in regular dialogue regarding the Facility since March 2018 and discussions are on-going in order to conclude commercial and technical arrangements to accommodate the works. The parties consider that appropriate agreements will be agreed within the timeframes required. AUBP has engaged with WPD on the project during the pre-application process, both in terms of informal non-statutory engagement and formal consultation carried out pursuant to Section 42 of the Planning Act 2008.

2.1.2 Further to the statutory Section 42 consultation, the parties have been in correspondence about the Facility. WPD submitted a Relevant Representation to the Planning Inspectorate on 6 May 2021. Table 3-1 below outlines the key points raised in this representation and the current position on these matters.

3 Issues

3.1 Introduction and General Matters

3.1.1 This document sets out the matters which are agreed, not agreed, or are under discussion between the Parties.

3.1.2 On 17 August 2021, the Examining Authority issued a letter under Section 88 of the Planning Act and Rules 4 and 6 of The Infrastructure Planning (Examination Procedure) Rules 2010 (known as the 'Rule 6 Letter'). Annex E of the Rule 6 Letter set out a request for SoCGs between AUBP and various parties, including WPD. For WPD, the Rule 6 Letter advises that the SoCG should include agreement of protective provisions.

- 3.1.3 The Rule 6 Letter also advises that all of the SoCGs should cover the Articles and Requirements in the draft DCO and that any Interested Party seeking that an Article or Requirement is reworded should provide the form of words which are being sought in the SoCG.
- 3.1.4 **Table 3-1** details the matters which are agreed, not agreed and under discussion between the Parties.

The team from Western Power Distribution (WPD) briefly explained who they were and what role they would play in the project.

GM introduced the purpose of the meeting, which was to discuss the Development Consent Order (DCO) timescale of the proposed Boston Alternative Energy Facility (BAEF) which is dictated largely by the fixed timescales set by PINS and what impact this has on the current site connection, which is subject to a time-limited agreement with WPD.

GM identified that the current timescale for site energisation does not align with the DCO process and we are looking to extend without losing the connection.

MH introduced the Boston team and its purpose and described the project and what will form part of the scheme. He identified that the scheme is real and has already passed established milestones (site characterisation and environmental risk identification, meetings with the Planning Inspectorate (PINS), Lincolnshire County Council and the Port of Boston) and is close to the next significant DCO milestone, which is the submission of the Environmental Scoping Report (ESR) to PINS. The ESR report sets out our opinion of what the anticipated significant impacts will be and how they are proposed to be managed. The grid connection is a fundamental part of the scheme and it is important to clarify the location of this

at Scoping stage. If this cannot be achieved the Scoping Report will have to indicate that an off-site option is required.

MH/GB identified the project timescales as follows:

Step	Timescale	Comments
Pre-application phase	Ongoing To Dec 2018	Scoping Submission – April 2018 Submit scoping report – PINS has 42 days to respond. Consultation with Statutory Stakeholders. Preliminary Environmental Report. Stakeholder consultation and public sessions, Consultation report. Environmental Statement Report. Further round of Consultation and events, finalise consultation report. Prepare DCO application and the draft DCO.
DCO Submission	December 2018/Q1 2019	
Acceptance	Feb 2019	Planning Inspectorate has 28 days from submission to decide whether the application meets the required standard to proceed to Examination
Pre-examination	Mar 2019 to Jun 2019	3 to 6 months (usually three/four = four assumed for this timeline) Includes 28 days for relevant registration; and 2-3 months for registration of interested parties. (IPs) Drafting examination timetable
Examination	Jul 2019 to Dec2019	Maximum 6 months Starts with a preliminary meeting Written representation and hearings
Recommendation	Jan 2020 to Mar 2020	Recommendation to Secretary of State. 3 months
Decision	Apr 2020 to Jun 2020	Secretary of State determination and decision. 3 months
Post-decision	Jun 2020 to July 2020	6 week Judicial review period, with potential for legal challenge. 6 weeks
Discharge of Requirements and DCO obligations	July 2020 to March 2021	Pre-commencement requirements can take 6-9 months Secure consent for environmental permit
Construction of first Line	April 2021 to end Feb 2024	34 months
Construction of second line	Mar 2024 to end Aug 2024	+ 6 months from above to completion
Construction of third line	Sep 2024 to end Feb 2025	+ 6 months from above to completion

First generation of energy for export	Feb / Mar 2024	Based upon the commissioning assumption above.
---------------------------------------	----------------	--

The shaded cells are stages that are fixed by the DCO process and will not be shortened.

GM identified that Harlaxton would develop the infrastructure to energise approximately 6 months before the completion of construction of the first line = September 2023.

WPD agreed to discuss the potential to extend the connection point to meet the required DCO timescales. This was subject to the following:

Action: RHDHV (GB) to provide MJ with a description of the scheme; evidence of progress to date; DCO timescales; progress of connection and history of connection discussions (this note).

Action by:

- **GB to provide draft DCO outline discussion to GM.**
- **GM to supply information regarding connection**
- **GB to send to WPD by Thursday 29th March, ensuring GM is copied in**
- **MJ to inform WPD management**
- **Response anticipated within 10 working days.**

WPD (JB) identified that the current connection is a non-firm connection. This means that it would be subject to planned outages that would mean loss of connection in operation. They wanted to ensure that this was known to the project.

MH identified that this does not affect the DCO application, but it is a fundamental part of Operation.

WPD identified that a Firm connection would guarantee connectivity, however, it would mean a new connection agreement and the current agreement would be lost, with no guarantee of a connection at the site within the relevant timescales.

WPD identified that it would be possible to apply for a firm connection after the current connection proposal was energised, however, the system and infrastructure would need to be designed to accommodate this.

WPD also identified that under a realistic worst-case situation, an additional overhead tower may need to be constructed by WPD to manage the connection to the grid system.

GM identified that they would design the infrastructure to try to prevent this, however, it may be prudent to include it

MH identified that if reasonably required this should be within the DCO Scoping parameters as a cumulative consideration (and a consequence of the scheme).

Dear The Secretary,

Proposals for Boston Alternative Energy Facility

I am writing on behalf of Alternative Use Boston Projects Ltd to provide information about the proposed Boston Alternative Energy Facility, a state-of-the art power-generation plant which will lead the way in land-based renewable power across the UK.

Enclosed with this letter is a brochure which outlines the proposal, and a copy of the exhibition boards presented at the Public Information Days which formed part of the Phase One consultation. These events were held between 14 and 21 September 2018.

As part of the community consultation we invite you to comment on the Facility by completing the online feedback form. This can be found at [REDACTED] Please note, this survey closes on 19 October 2018.

Land referencing company TerraQuest has been appointed by Alternative Use Boston Projects Ltd, the privately-owned company bringing forward the proposal, to research land ownership and undertake land referencing work. They have already contacted you to confirm the details of your interest in land in connection with the Facility.

This information is being gathered so that all parties with an interest in land and/or property, including those who may have rights over the land which is within, or is in close proximity to, the proposed development area, can be formally notified.

For further information on Boston Alternative Energy Facility, please visit [REDACTED]

Kind regards,

Bethan Griffiths
On behalf of Boston Alternative Energy Facility
[REDACTED]

How can I have my say?

We are committed to honest, open and effective two-way engagement.

We will inform the local community of our proposal and welcome views and feedback. We are happy to answer questions, and all responses received during the consultation will be carefully considered and where relevant and appropriate taken into account as our proposals develop.

We'll be taking a two phase approach to consultation, with the second phase offering the opportunity to see how feedback from the first phase has shaped the plans.

There will be a programme of consultation with non-statutory (informal) stakeholders, for example local residents and community groups, and statutory (formal) consultees for example Boston Borough Council, Lincolnshire County Council and the Environment Agency up until the application submission in 2019.

Our timeline for the Development Consent Order (DCO) process

As the Boston Alternative Energy Facility will generate **more than 50MW* of renewable energy** for the National Grid, it is classed as a **Nationally Significant Infrastructure Project**.

This means we need a DCO under the Planning Act 2008 to allow it to be constructed and operated.

We are here

1

We are in the **first phase** of the process - pre-application, so are consulting with you

2

There will be a **second phase of consultation** and our proposals will be finalised taking into account your feedback

3

We will **submit an application** for a Development Consent Order to the Planning Inspectorate

4

After the application is accepted – the Planning Inspectorate will **examine the application**, taking into consideration the comments of consultees, and make a recommendation to the Secretary of State for Business, Energy & Industrial Strategy

5

The Secretary of State for Business, Energy & Industrial Strategy is responsible for **making the final consent decision**.

As this is a complex decision making process, it can often take 18 months or more from acceptance of the DCO application to decision. Following approval, the Facility will take approximately three years to construct and commission.

The construction period will begin when the relevant pre-construction requirements have been completed. These will be identified in the decision made by the Secretary of State.

Boston Alternative Energy Facility is a state-of-the-art power-generation plant which will lead the way in land-based renewable power across the UK.

This nationally significant infrastructure project, backed by Alternative Use Boston Projects Ltd, a privately owned project company, will generate 102MW* of renewable energy, of which 80MW* will be exported to the National Grid and the rest will be used by the facility.

Electricity will be generated in a secure, clean and affordable way.

What's important about the Boston Alternative Energy Facility?

- The facility will process one million tonnes of refuse derived fuel (RDF – which is derived from non-recyclable household waste), generating enough power for more than 185,000 homes (equivalent to over 60% of the households in Lincolnshire)
- It will provide investment for the region's economy; we expect it to create up to 300 jobs during the construction phase and around 80 jobs when operational
- The UK has a target of generating at least 15% of energy from renewable sources, including energy from waste**, by 2020. The facility will contribute to this target when built
- It will mean that one million tonnes of RDF could be processed here out of the three million tonnes the UK currently sends abroad – so the UK benefits from generating energy rather than continental Europe
- Recovering energy from non-recyclable material is far better than it being sent to landfill.

What do you think?

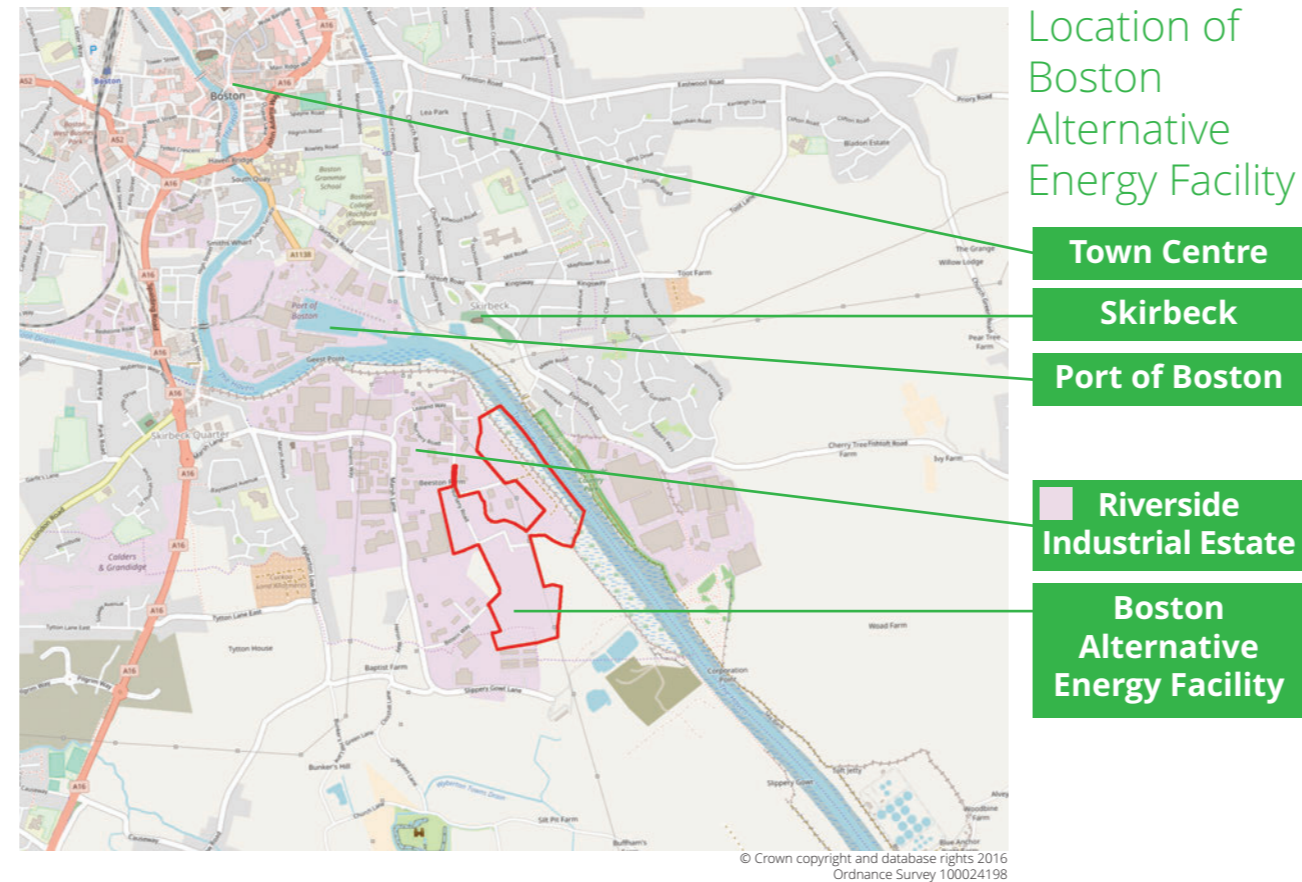

In order to shape our proposals, it's really important to us that the **local community** and **other stakeholders** have the **opportunity to influence the plans**. We'll be holding two rounds of consultation which will be your chance to **let us know what you think**. We'll listen to **your feedback** and, where relevant and appropriate, we will use it to finalise the plans for Boston Alternative Energy Facility.

What will happen at the Boston Alternative Energy Facility?

The process by which power will be generated is called **gasification**.

This process will use a fuel (or feedstock) called refuse derived fuel (RDF). The RDF is made from non-recyclable household waste and will be baled and transported by ship to the Boston Alternative Energy Facility from UK ports. This will minimise road traffic movements to and from the site.

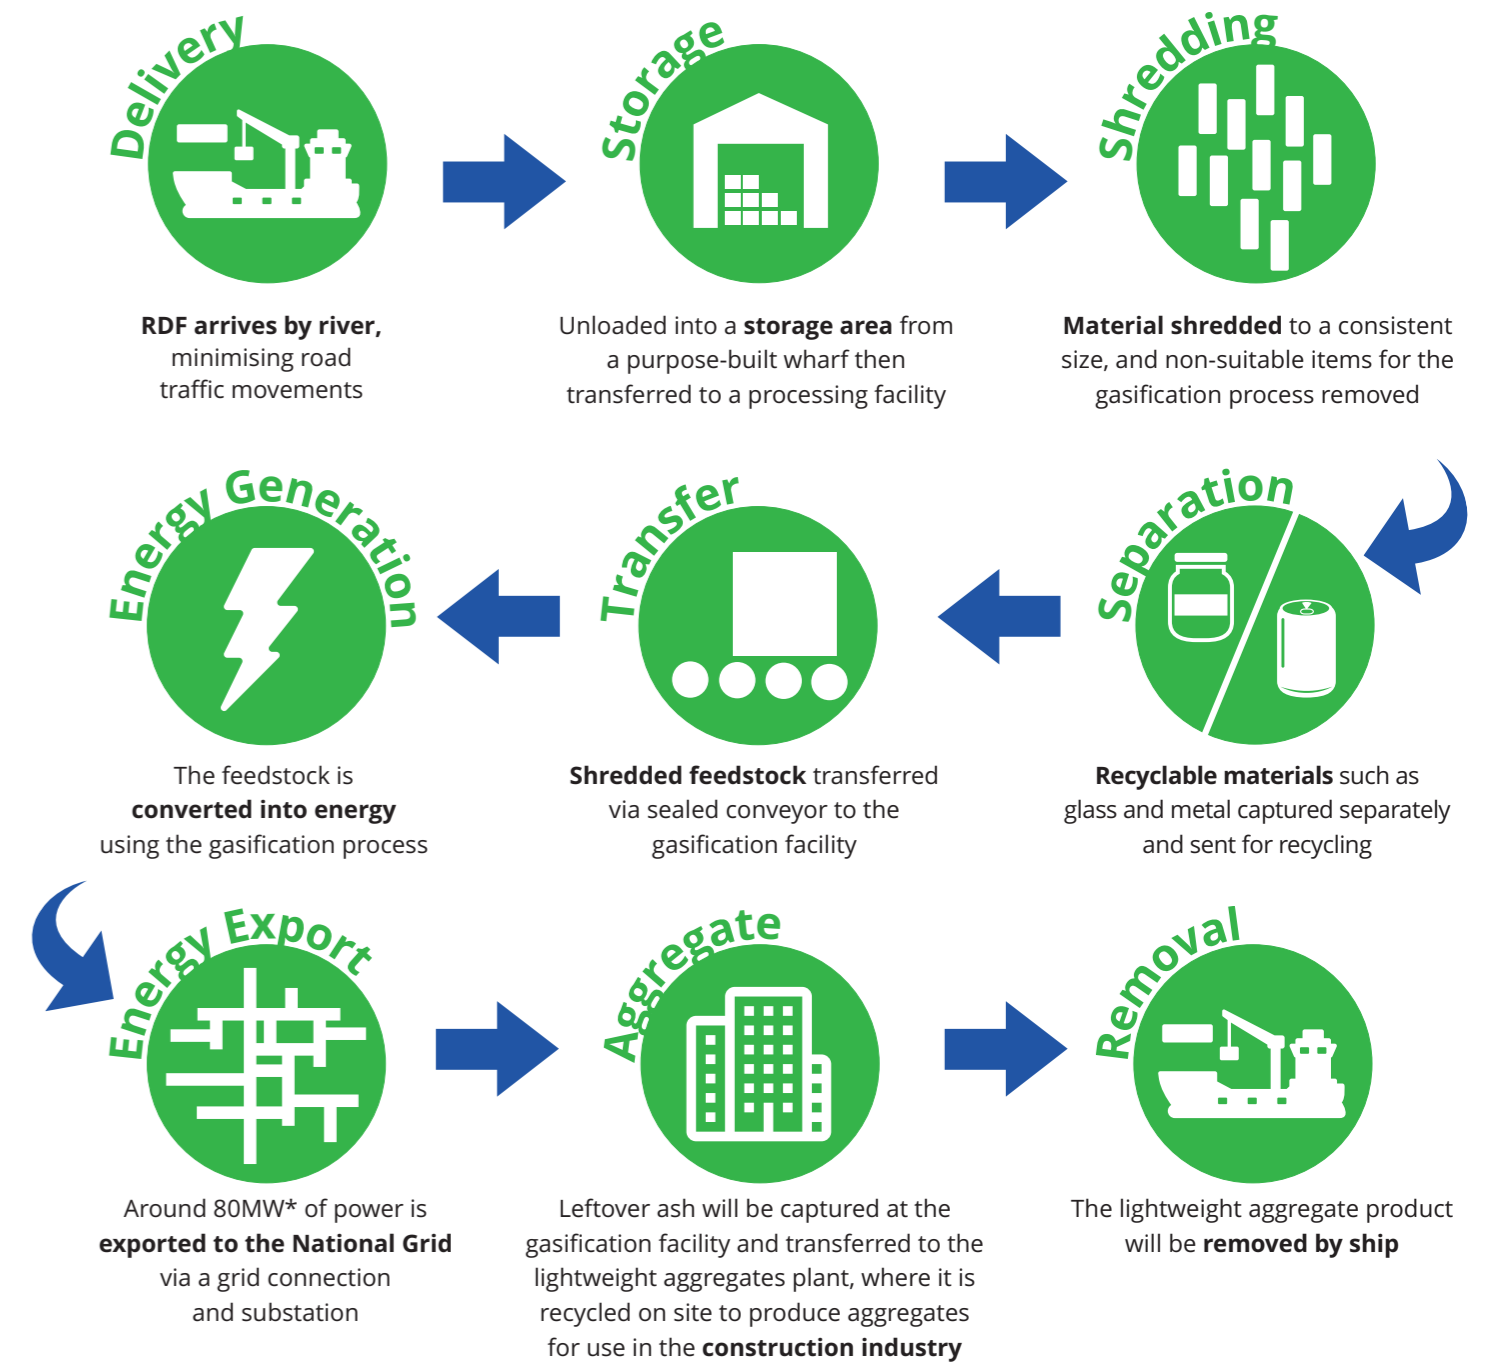

The proposed site at the Riverside Industrial Estate in Boston is adjacent to the Haven – and is within an area allocated for industrial development by the local planning authority – so is the ideal location.

The proposed development includes:

- a wharf with cranes and berthing points for up to three ships
- storage area to house the incoming material
- a processing facility to prepare the feedstock to a consistent specification
- conveyors for transferring the processed material
- a gasification unit that will generate power, which will then be exported to the National Grid via a grid connection and substation
- a lightweight aggregate manufacturing plant to process the residue from the gasification process and
- a storage area for loading of the lightweight aggregate onto a ship for removal from the site.

The process is as follows:

What is gasification?

Gasification is a way of generating renewable energy.

It involves the creation of a chemical reaction using a restricted oxygen supply. This converts carbon-based materials in the feedstock into a synthetic gas (syngas). The syngas is a fuel, which is turned into electricity by recovering heat in a boiler.

The process of producing the syngas does not involve combustion, so the facility is not an incinerator. Gasification is more efficient and cleaner than mass-burn incineration, and has the additional benefit of creating a useful product – energy!

Gasification does not compete with recycling, as materials can and should be recycled where possible.

* MW hour equivalent

** The Government defines technologies such as gasification as 'renewable' in policy EN-3.

Welcome

Welcome to our Phase One public information day about the Boston Alternative Energy Facility, a state-of-the-art power-generation plant which will lead the way in land-based renewable power across the UK.

The facility is being promoted by Alternative Use Boston Projects Ltd, a privately-owned project company.

It is classed as a Nationally Significant Infrastructure Project because it is a land-based power facility with a generating capacity exceeding more than 50 MW of energy.

This means we need a Development Consent Order (DCO) under the Planning Act 2008 to allow it to be constructed and operated.

This is your chance to find out more about our initial proposals, including details of potential local environmental and economic impacts, and share your views.

Your feedback is important to us and will help shape the development of the proposals.

More detail on how your opinions have helped develop the scheme will be

provided in our Phase Two consultation which is expected to begin early in 2019. This second consultation will provide you with a further opportunity to comment on the proposal.

The site for Boston Alternative Energy Facility viewed from across the Haven

Our proposal (1)

The Boston Alternative Energy Facility will have a proposed generation capacity of 102MW (gross) of renewable energy, of which 80MW (net) will be exported to the National Grid. This is enough to power the equivalent of 185,000 homes. The remainder will be used to power the facility itself.

What will happen at the Boston Alternative Energy Facility?

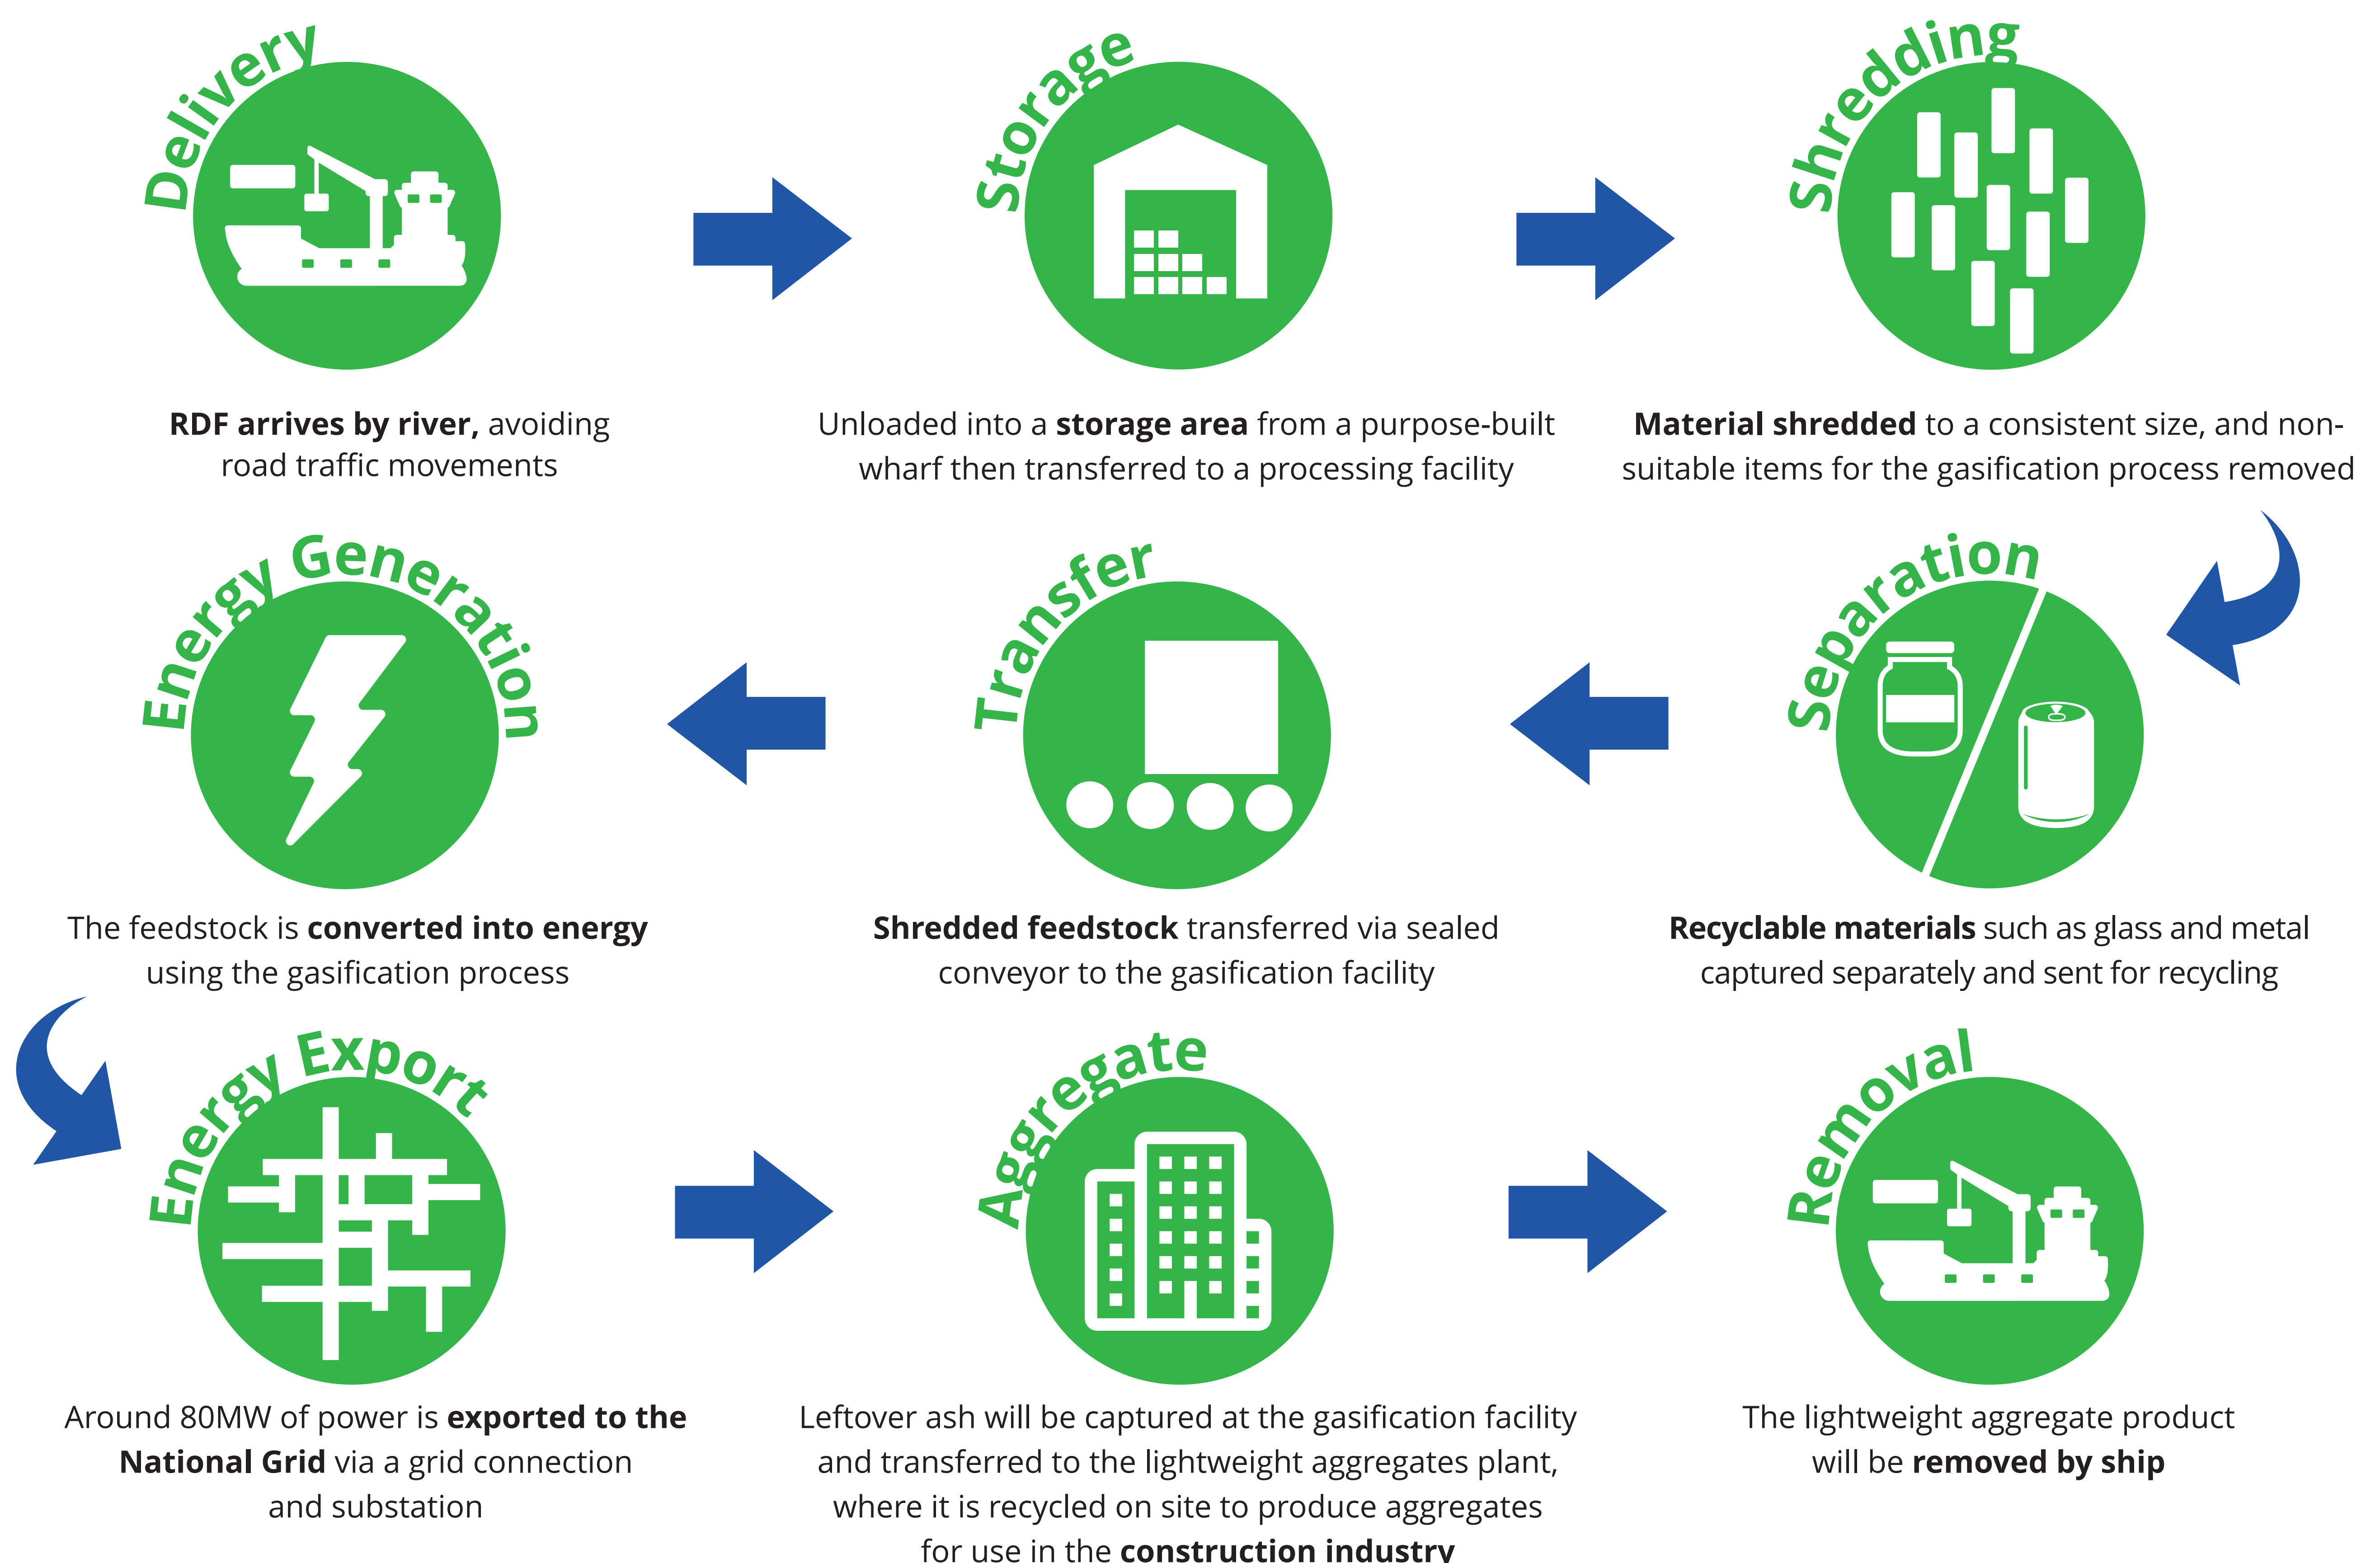

Delivering this power involves a number of stages, from receipt of the fuel; storage and processing; generation of energy; and dealing with the residues.

The process by which power will be generated is called gasification, which is explained in more detail on our dedicated exhibition board.

This process will use a fuel (or feedstock) called refuse derived fuel (RDF). The RDF is made from residual non-recyclable household waste, which will be baled and transported by ship to the Boston Alternative Energy Facility from UK ports. This will avoid road traffic movements to and from the site.

In addition, the ash residues from the gasification process will be processed on site into an aggregate product. This will be exported from the site by ship.

The process is as follows:

Our proposal (2)

Conceptual Site Layout

The proposed development includes:

- a new wharf on the bank of the Haven with cranes and berthing points for up to three ships
- a storage area behind the wharf to house the incoming material
- a processing facility to prepare the feedstock to a consistent specification
- conveyors for transferring the processed material to the gasification facility
- a gasification unit that will generate power, which will then be exported to the National Grid via a grid connection and substation
- a lightweight aggregate manufacturing plant which uses the ash residue from the gasification process and
- a storage area for loading of the lightweight aggregate onto a ship for removal from the site.

Site location

The proposed site is at the Riverside Industrial Estate in Boston. It is adjacent to the Haven, which will allow the feedstock to arrive at a newly constructed wharf by ship rather than road; and will allow removal of the aggregate product by ship rather than road.

The proposed site boundary is within an area allocated for waste recovery processes and industrial development by the local planning authority, making it an ideal location for the facility.

The gasification process

Gasification is a way of generating energy from carbon-based fuel.

Gasification is identified in National Policy Statement EN-3 as one of a number of renewable energy processes which use the biomass in waste material. This involves the creation of a chemical conversion using a restricted oxygen supply. This converts the carbon-based materials in the RDF feedstock into a synthetic gas (syngas). The syngas is a fuel, which is turned into electricity by recovering heat in

a boiler. The process of producing the syngas does not involve combustion, so the facility is not an incinerator. Gasification is more efficient and cleaner than mass-burn incineration, and has the additional benefit of creating a useful product – energy.

Gasification does not compete with recycling, as materials can and should be recycled where possible.

Artist's impression of a gasification plant

What is important about Boston Alternative Energy Facility?

The facility will....

Use the latest proven gasification technology

to operate safely and efficiently and within strict European emission standards

Recover energy from 1 million tonnes of refuse derived fuel (RDF) from non-recyclable household waste, **generating enough power for more than 185,000 homes** (equivalent to over 60% of the households in Lincolnshire)

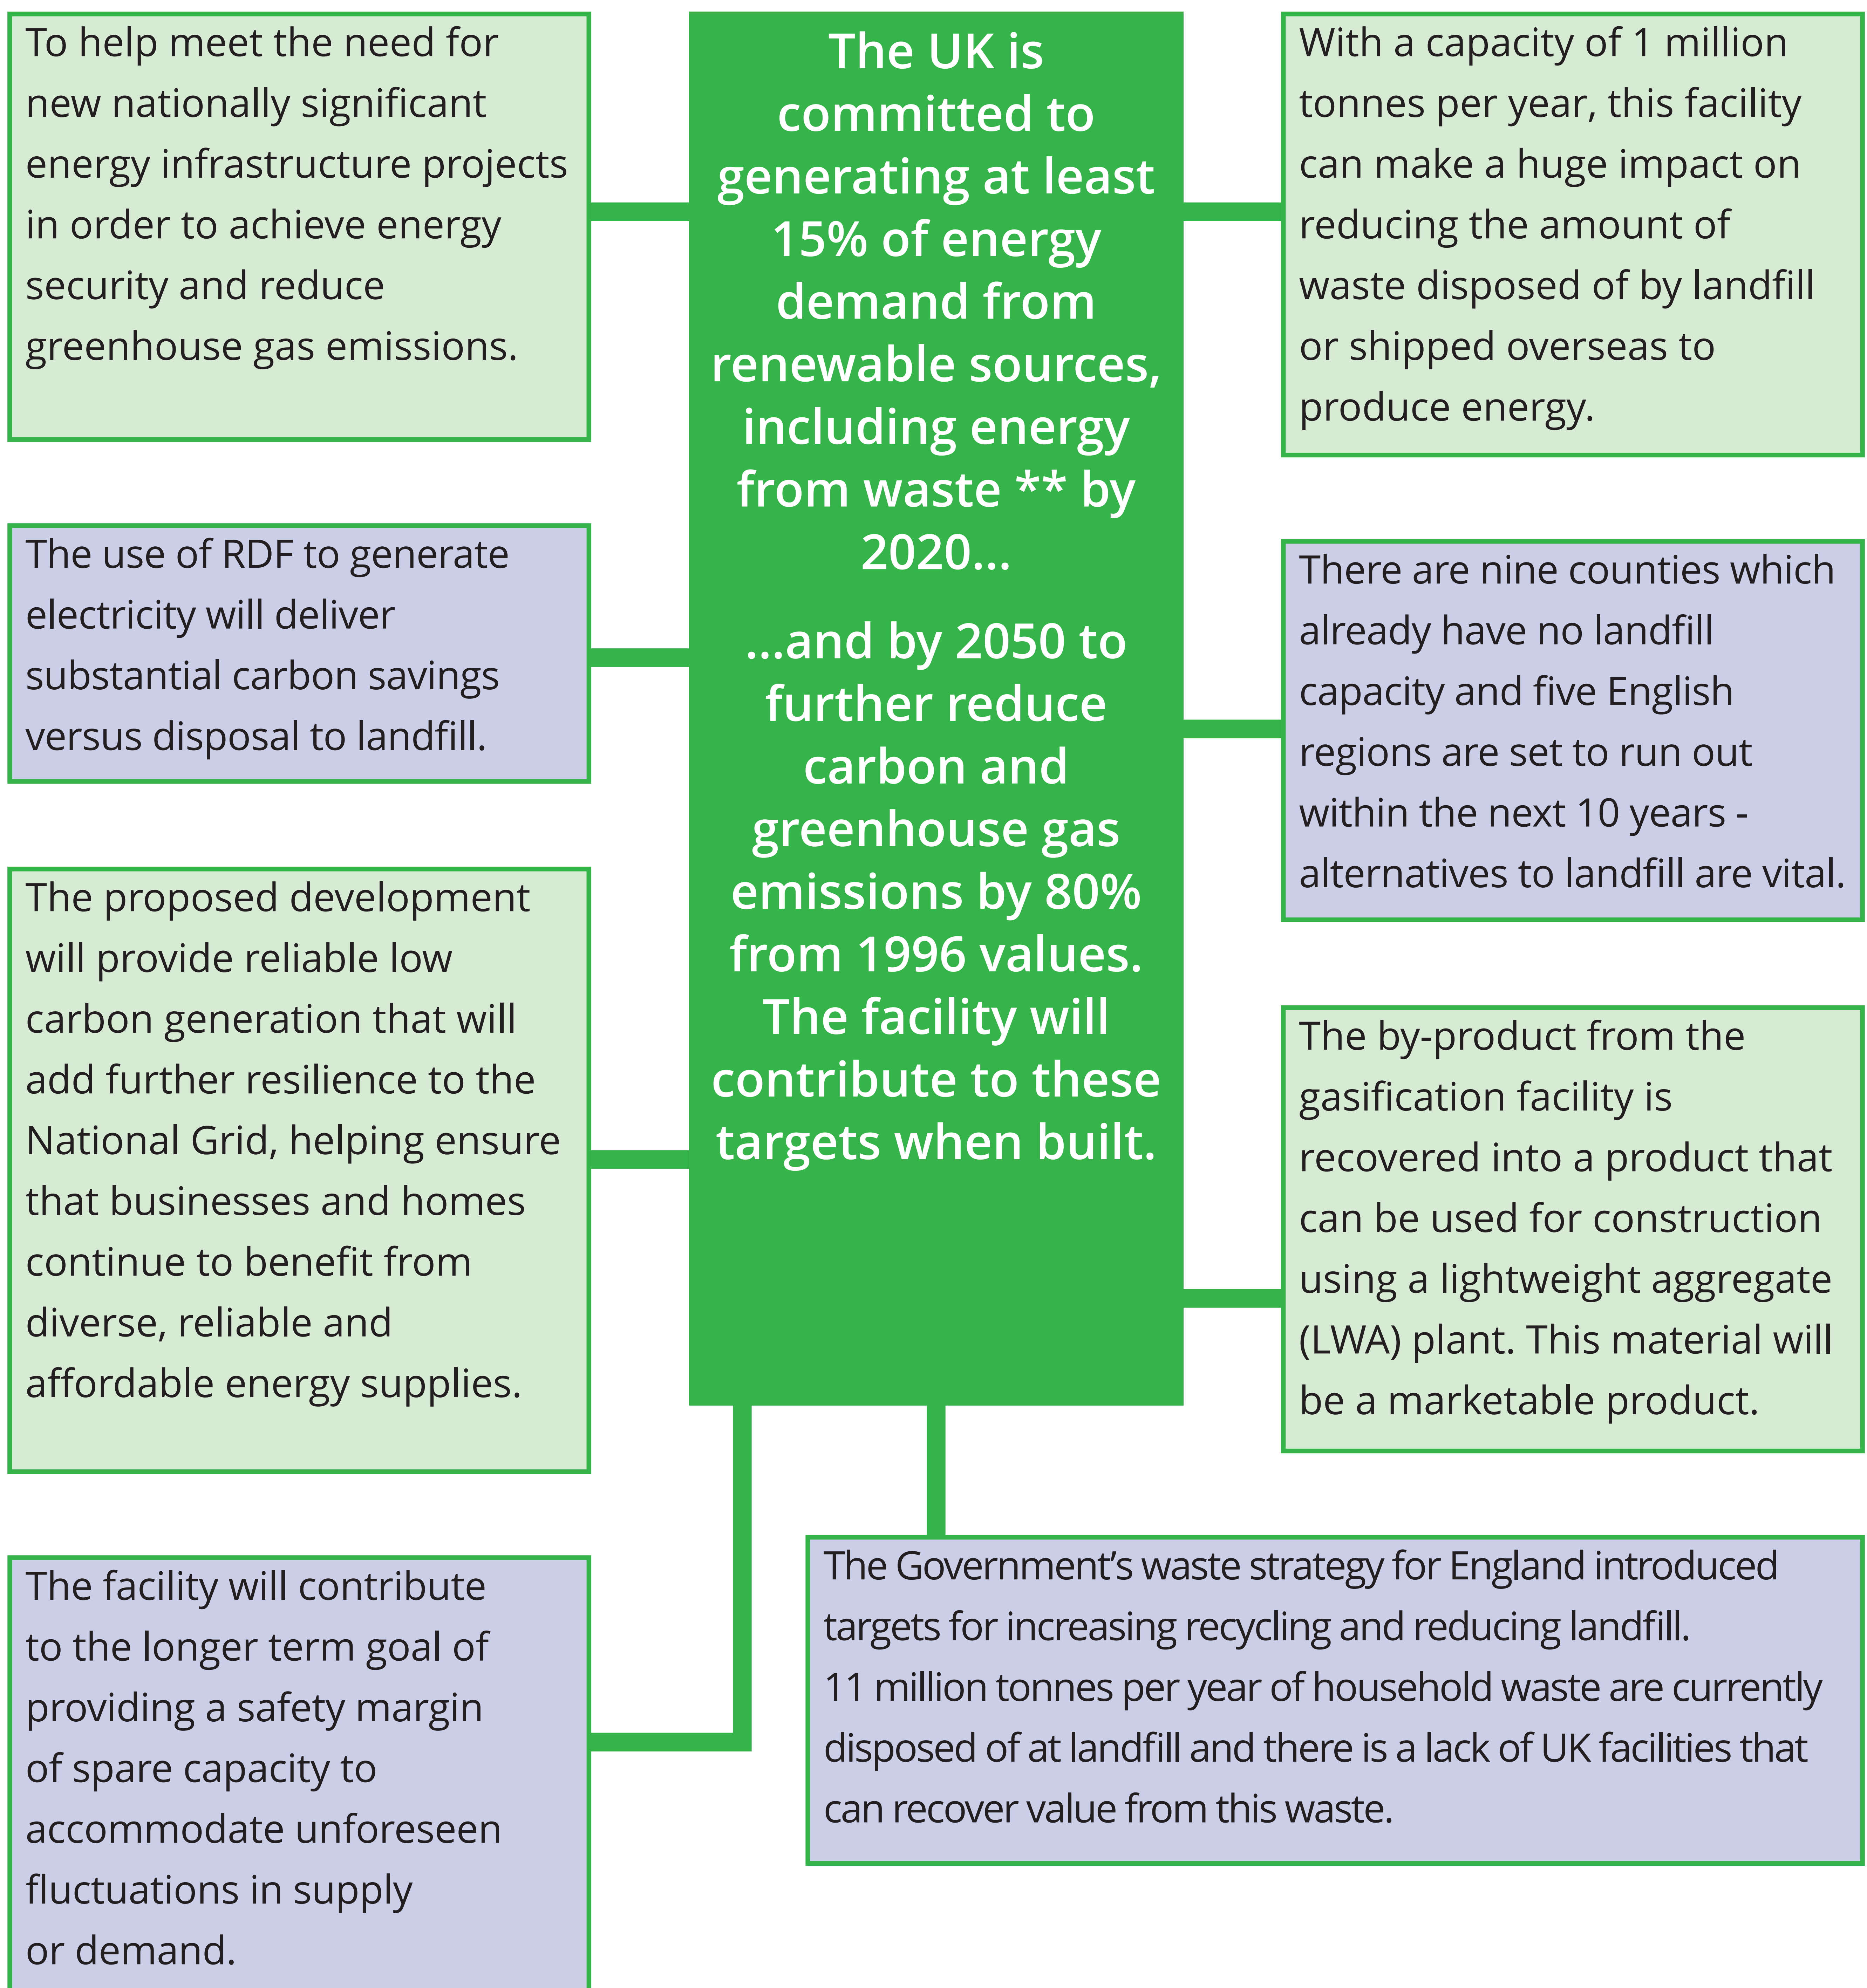

Reduce either the amount that goes into landfill or the three million tonnes currently exported abroad – so the UK benefits from generating renewable energy rather than Europe

Provide investment for the region's economy; **creating approximately 300 jobs** during the construction phase and around 80 permanent jobs when operational

Contribute to meeting the **need for new electricity generating capacity in the UK**, replacing capacity which has come to the end of its life because of old technology

Offer a preferential alternative to landfill. Recovering energy from residual non-recyclable material is far better than it being disposed to landfill and we expect this technology to continue to grow significantly worldwide

Why is the facility needed?

** The Government defines technologies such as gasification as 'renewables' in National Policy Statement for Renewable Energy Infrastructure (EN-3)

Where will material come from?

We all generate waste, which we separate at home into dry recyclables that are sent for recycling and residual 'black bag' waste, which contains material that cannot be recycled. This might either be because it is unsuitable, contaminated, or because there is no efficient recycling technology available for it.

This residual 'black bag' material forms the refuse derived fuel (RDF) which will fuel Boston Alternative Energy Facility. This feedstock is a dependable, deliverable and secure energy source from the UK, and will help to meet the UK's long-term energy security needs and help to provide stability to the National Grid.

The RDF will be sourced only from the UK. None will be imported from abroad.

Much of this RDF is currently either being sent to landfill, or being exported overseas for processing (as a fuel for European energy production). So the new facility will not affect capacity at existing UK energy from waste plants.

It is possible that additional RDF could be taken from local sources (for example residual household waste from Boston and south Lincolnshire), subject to discussions with the developer and local authorities.

Map showing some of the potential routes of material to the facility

Transport

One of the key features of the Boston Alternative Energy facility will be a **new wharf** on the Haven to receive RDF material and export lightweight aggregate by ship rather than using the local road network.

A similar size ship travelling down the Haven

The wharf will be constructed so that it will not impede navigation of other vessels accessing the Port of Boston or upriver.

The wharf will be able to receive two ships delivering RDF at any one time at high tide.

If RDF was being delivered to the site by road, then 1.2 million tonnes would require approximately 50,000 Heavy Goods Vehicle (HGV) deliveries per year (at 20 tonnes per load); approximately 137 vehicle movements per day (1 movement equals a journey in and out of the facility) – in contrast to approximately eight ship movements per week,

with an additional 3 ship movements per week to remove the aggregate.

The project will have a positive impact on the Port of Boston, by increasing the number of vessels using the Haven (which will require a Pilot for navigation and turning the ships within the Port's basin). The Project Team will be working closely with the Port of Boston to ensure all of their requirements are met.

There will be some vehicle movements to site associated with staff movements to / from the site, and delivery of process chemicals and raw materials. There will also be removal of

hazardous residues from the gasification facility for disposal.

A transport study is being undertaken as part of the Development Consent Order (DCO) application to determine exact vehicle movements during the construction and operational phase. A Construction Traffic Management Plan will define the routes that can be used (and which routes must be avoided), and will control the maximum number of movements per day. The effect of any increase of combined road traffic movements on the local road network will be considered as part of the assessment.

Answering your questions

How will you minimise emissions and odour?

● Modern waste treatment facilities such as this must use state-of-the-art equipment and are highly regulated. They meet all the stringent environmental criteria laid down by the Government and EU Industrial Emissions Directive.

This requires use of the Best Available Techniques (BAT). The facility will not be able to obtain consent or a permit without being able to demonstrate it can achieve emission limits and implement operational control measures by using BAT.

The RDF processing facility will operate in an enclosed environment using odour control measures to ensure no unacceptable odour is released.

We will be required to secure an Environmental Permit from the Environment Agency before we are allowed to operate. The permit will include strict operating standards with which the facility will be required to comply.

Will it be noisy?

● The facility will comply with strict noise limits to ensure that it will not cause unacceptable noise or vibration for those nearby.

Baseline monitoring has already been conducted and the impact of noise will be included in the Environmental Impact Assessment which forms part of our Development Consent Order (DCO) application.

Will the construction impact wildlife and ecology?

● There will be extensive investigations to assess environmental topics in line with the proposed design of the site.

This will identify legislative requirements and good practice guidelines to ensure that the facility would not cause any unacceptable adverse ecological effects during both construction and operation.

These measures will evolve as investigations and surveys are carried out. A Construction Environmental Management Plan will specify how construction will be carried out to minimise environmental and health impacts.

The facility will not be able to operate without an environmental permit, which will ensure that there are no unacceptable risks to human health and the environment by implementing rigorous operating procedures.

Answering your questions

How tall will the proposed facility be?

How does the height compare to other local landmarks/buildings?

● There will be three main gasification buildings, each of which will be identical; and combined with one stack.

The majority of the gasification building is likely to be approximately 30 metres tall, and 38 metres at its tallest point (excluding the stack). The gasification facility will be approximately 110 metres long. The combined width of the gasification plant will be approximately 95 metres.

The silos used for storage of the processed RDF will be approximately 30 metres tall. However the majority of buildings on site will be less than 30 metres tall.

There will also be a stack for the lightweight aggregates facility. The height of the stacks has not been determined yet, because they require detailed calculations to be carried out to ensure that the facility operates efficiently and safely; and to ensure that the exhaust output is dispersed effectively to prevent unacceptable risk to the environment.

There are numerous tall structures in the area, such as masts and pylons, and a stack for the Boston wood gasification facility.

The site is very close to the Haven – what measures will you take to reduce the risk of flooding?

● The flood bank on the Haven forms an important measure to protect the Riverside Industrial Estate from flooding. The design of the wharf and associated infrastructure with the Boston Alternative Energy Facility must not compromise the level of flood protection.

A detailed Flood Risk Assessment and drainage strategy will be carried out to ensure that the design of all aspects of the facility accommodate measures to minimise the flooding risk.

Flood risk mitigation and flood prevention measures; and the potential Sustainable Drainage Solutions (SuDS) available for the site would be determined by the Flood Risk Assessment.

Additional mitigation measures will be discussed and agreed with stakeholders as part of our consultation process.

Where are we now?

We are currently in the initial pre-application consultation phase, of which these events play a key role in providing information and seeking feedback.

We have been working with the Planning Inspectorate to agree which areas will need to be included in our Environmental Impact Assessment for the project. We are starting the work to undertake these assessments, which will help shape our final proposal for Boston Alternative Energy Facility.

Our consultation

We are committed to honest, open and effective two-way engagement and welcome your views and feedback. We are happy to answer questions, and all responses received during the consultation will be carefully considered and where relevant taken into account as our plans develop.

We'll be taking a two phase approach to consultation, with the second phase in early 2019 offering the opportunity to see how feedback from the first phase has shaped the plans.

There will be a programme of consultation with local stakeholders, e.g. local residents and community groups, and statutory consultees, e.g. Boston Borough Council, Lincolnshire County Council and the Environment Agency, up until the application submission in 2019.

IMPORTANT: THIS COMMUNICATION MAY AFFECT YOUR PROPERTY
Boston Alternative Energy Facility

Dear Sir or Madam

Boston Alternative Energy Facility is a proposed state-of-the-art power plant to be located south of Boston and being promoted by Alternative Use Boston Projects Limited.

The Project will consist of a Nationally Significant Infrastructure Project (NSIP) under the Planning Act 2008 (the Act), and, as a result, the Applicant is required to submit an application for a Development Consent Order (DCO) to the Planning Inspectorate (PINs), which will examine the application on behalf of the Secretary of State.

The site is located to the south-west of Boston Town Centre at the Riverside Industrial Estate, next to the river Haven and is within an area allocated for industrial development by the local planning authority.

TerraQuest, a land referencing company, has been appointed by Alternative Use Boston Projects Limited to research land ownership and undertake Land Referencing work in connection with the above. This information is being gathered so that all parties with an interest in land and/or property, including those who may have rights over the land which is within or is in close proximity to the proposed development area, can be formally notified.

We are specifically required to identify and consult with:

1. those who own, are a tenant of or occupy property or land on which the development is proposed to be built; and
2. those who have an interest in property or land, on which the development is proposed to be built, including for example, a mortgage lender

You are being contacted as we believe you may have an interest in or over the land which is within or is in close proximity to the proposed Boston Alternative Energy Facility.

Enclosed in duplicate is a plan or plans showing an area or areas of land (shaded pink) which it is believed that you have or may have an interest in, within the land potentially affected by the Boston Alternative Energy Facility (edged in red).

Also enclosed is a request for information which is to be completed and returned to TerraQuest in the freepost envelope provided **within a period of 15 days from the date of receipt**, together with one copy of the plan. You should retain one copy of the plan for your records.

The Questionnaire

Question 1

- a) Please give the full name of the person who or organisation which has a legal interest in the property.
- b) For Limited Companies, please supply the registered office address and telephone number. Place of registration would normally be "England and Wales", but may be Scotland, Isle of Man, Jersey, etc. Please also supply and confirm the address for service of future correspondence and notices.
- c) For other corporate bodies, please supply corporate title, address and telephone number of the principal office.
- d) For individuals and partners, trustees, governors or similar executive positions, please supply full names (including all forenames), home address, telephone numbers and where applicable the collective title of each group or organisation. An additional sheet may be used if required.

Question 2

- a) If you legally own the land and property outright and do not pay any rent, then you are the freeholder.
- b) If you have an agreement to use or occupy the property and pay a rent or licence fee, then you probably have a lease, tenancy or licence. You may be an occupier only if there is no written agreement. This may be for example, if you are living in a family home but are not the owner of that property.
- c) If you have formal permission from the proper authorities to do something it may be classed as a licence e.g. a licence obtained from an authority to place a sandwich board on a footpath. Or this may be a grazing licence, or a licence to mow and remove grass from the land.

If you are unsure about the nature of your interest please contact TerraQuest.

Questions 8 & 9

If you believe you benefit from rights or restrictions over other land, please outline what you believe they are and over what land, title or property on Plan A. If you believe you are burdened by rights or restrictions over your land, please state who benefits from those rights or restrictions if known and the nature of the burden.

Question 10

- a) There should be a Plan A (2 Copies) and a Plan B (1 Copy), Plan A shows a pink shaded area in which we understand you may have a legal interest along with an edged red area which is the area of

legal interests contained within the proposed development, and Plan B an area edged in red showing the area subject to research for the proposed development.

- b) One Plan A copy is for your information and retention whilst the other is to be returned to TerraQuest with either a signature if the pink shaded area(s) are correct or an amendment if the pink shaded area(s) on the plan is/are not correct.
- c) Particular attention should be paid to situations such as rights or other benefits which have a different extent to that of the property itself, such as rights to use fire escapes, other access/egress, drainage rights or car parks.
- d) One copy of the Plan A must always be returned.

Question 11

Please list all tenancies and licences (formal agreement to use or occupy the land)

Question 12

Please list all registered charges/mortgages and equitable interests.

Equitable Interests

Rights in or over land which fail to qualify as legal rights take effect as equitable interests therefore estates, interests, and charges in or over land which are not legal estates are referred to as equitable interests. Examples of such interests include:

- Option to purchase (The right to buy a property at a given price within a specific period of time)
- Contract to purchase (A contract the buyer initiates which details the purchase price and conditions of the transaction and is accepted by the seller. Also known as an agreement of sale)
- Beneficiary of a trust (A trust is a relationship whereby a party called a trustee holds property, either real or personal, for the benefit of other parties or persons, or for some purpose permitted by law)
- Wherever the legal owner(s) of property can be compelled to hold that property for the benefit of the equitable owner(s). Where groups of individuals are concerned, a person may be both a legal and an equitable owner. For example, an individual may own a house and hold it for the benefit of another.
- Legal rights in a property that do not include the right to sell its legal title. This may apply to a mortgage lender.

Question 15

If you hold a joint interest, or an interest in common, please provide details of all other parties.

Question 17

- a) Sometimes it is necessary to make further enquiries as a result of new information or changes to the plans for the scheme. Please provide the name and telephone number of the individual(s) whom we should contact.
- b) If a third party (a solicitor, for example) has been instructed to complete this questionnaire on behalf of the person with an interest in the property, please supply written confirmation of that fact.

- a) There should be a Plan A (2 Copies) and a Plan B (1 Copy), Plan A shows a pink shaded area in which we understand you may have a legal interest along with an edged red area which is the area of

legal interests contained within the proposed development, and Plan B an area edged in red showing the area subject to research for the proposed development.

- b) One Plan A copy is for your information and retention whilst the other is to be returned to TerraQuest with either a signature if the pink shaded area(s) are correct or an amendment if the pink shaded area(s) on the plan is/are not correct.
- c) Particular attention should be paid to situations such as rights or other benefits which have a different extent to that of the property itself, such as rights to use fire escapes, other access/egress, drainage rights or car parks.
- d) One copy of the Plan A must always be returned.

Question 11

Please list all tenancies and licences (formal agreement to use or occupy the land)

Question 12

Please list all registered charges/mortgages and equitable interests.

Equitable Interests

Rights in or over land which fail to qualify as legal rights take effect as equitable interests therefore estates, interests, and charges in or over land which are not legal estates are referred to as equitable interests. Examples of such interests include:

- Option to purchase (The right to buy a property at a given price within a specific period of time)
- Contract to purchase (A contract the buyer initiates which details the purchase price and conditions of the transaction and is accepted by the seller. Also known as an agreement of sale)
- Beneficiary of a trust (A trust is a relationship whereby a party called a trustee holds property, either real or personal, for the benefit of other parties or persons, or for some purpose permitted by law)
- Wherever the legal owner(s) of property can be compelled to hold that property for the benefit of the equitable owner(s). Where groups of individuals are concerned, a person may be both a legal and an equitable owner. For example, an individual may own a house and hold it for the benefit of another.
- Legal rights in a property that do not include the right to sell its legal title. This may apply to a mortgage lender.

Question 15

If you hold a joint interest, or an interest in common, please provide details of all other parties.

Question 17

- a) Sometimes it is necessary to make further enquiries as a result of new information or changes to the plans for the scheme. Please provide the name and telephone number of the individual(s) whom we should contact.
- b) If a third party (a solicitor, for example) has been instructed to complete this questionnaire on behalf of the person with an interest in the property, please supply written confirmation of that fact.

The Questionnaire

Question 1

- a) Please give the full name of the person who or organisation which has a legal interest in the property.
- b) For Limited Companies, please supply the registered office address and telephone number. Place of registration would normally be "England and Wales", but may be Scotland, Isle of Man, Jersey, etc. Please also supply and confirm the address for service of future correspondence and notices.
- c) For other corporate bodies, please supply corporate title, address and telephone number of the principal office.
- d) For individuals and partners, trustees, governors or similar executive positions, please supply full names (including all forenames), home address, telephone numbers and where applicable the collective title of each group or organisation. An additional sheet may be used if required.

Question 2

- a) If you legally own the land and property outright and do not pay any rent, then you are the freeholder.
- b) If you have an agreement to use or occupy the property and pay a rent or licence fee, then you probably have a lease, tenancy or licence. You may be an occupier only if there is no written agreement. This may be for example, if you are living in a family home but are not the owner of that property.
- c) If you have formal permission from the proper authorities to do something it may be classed as a licence e.g. a licence obtained from an authority to place a sandwich board on a footpath. Or this may be a grazing licence, or a licence to mow and remove grass from the land.

If you are unsure about the nature of your interest please contact TerraQuest.

Questions 8 & 9

If you believe you benefit from rights or restrictions over other land, please outline what you believe they are and over what land, title or property on Plan A. If you believe you are burdened by rights or restrictions over your land, please state who benefits from those rights or restrictions if known and the nature of the burden.

Question 10

- a) There should be a Plan A (2 Copies) and a Plan B (1 Copy), Plan A shows a pink shaded area in which we understand you may have a legal interest along with an edged red area which is the area of

legal interests contained within the proposed development, and Plan B an area edged in red showing the area subject to research for the proposed development.

- b) One Plan A copy is for your information and retention whilst the other is to be returned to TerraQuest with either a signature if the pink shaded area(s) are correct or an amendment if the pink shaded area(s) on the plan is/are not correct.
- c) Particular attention should be paid to situations such as rights or other benefits which have a different extent to that of the property itself, such as rights to use fire escapes, other access/egress, drainage rights or car parks.
- d) One copy of the Plan A must always be returned.

- Beneficiary of a trust (A trust is a relationship whereby a party called a trustee holds property, either real or personal, for the benefit of other parties or persons, or for some purpose permitted by law)
- Wherever the legal owner(s) of property can be compelled to hold that property for the benefit of the equitable owner(s). Where groups of individuals are concerned, a person may be both a legal and an equitable owner. For example, an individual may own a house and hold it for the benefit of another.
- Legal rights in a property that do not include the right to sell its legal title. This may apply to a mortgage lender.

Question 15

If you hold a joint interest, or an interest in common, please provide details of all other parties.

Question 17

- a) Sometimes it is necessary to make further enquiries as a result of new information or changes to the plans for the scheme. Please provide the name and telephone number of the individual(s) whom we should contact.

The Questionnaire

Question 1

- a) Please give the full name of the person who or organisation which has a legal interest in the property.
- b) For Limited Companies, please supply the registered office address and telephone number. Place of registration would normally be "England and Wales", but may be Scotland, Isle of Man, Jersey, etc. Please also supply and confirm the address for service of future correspondence and notices.
- c) For other corporate bodies, please supply corporate title, address and telephone number of the principal office.
- d) For individuals and partners, trustees, governors or similar executive positions, please supply full names (including all forenames), home address, telephone numbers and where applicable the collective title of each group or organisation. An additional sheet may be used if required.

Question 2

- a) If you have an agreement to use or occupy the property and pay a rent or licence fee, then you probably have a lease or tenancy or licence.
 - b) If you have a legal right to use another person's land for a particular purpose e.g. a right to walk through your neighbour's land to gain access to your property, then you have an easement/right. Easements are legal rights which give the legal owner of one piece of land the right to use a defined portion of another person's land. Utilities often get easements that allow them to run pipes or phone lines beneath private property. Other examples of easements may relate to drains, power, or rights of way. In most cases easements deal with land itself, not the landowners, so that when land is bought or sold the easements which relate to that land go with the land.
 - c) If you have a legal right to take possession of the property you have a right of re-entry.
 - d) If the property is subject to a restriction e.g. not to do something on the land like more alterations then your property may be subject to a restrictive covenant. e.g. not to make any alterations without obtaining the consent of 'xyz'
 - e) If you have formal permission from the proper authorities to do something it may be classed as a licence e.g. a licence obtained from an authority to place a sandwich board on a footpath. Or this may be a grazing licence, or a licence to mow and remove grass from the land.
 - f) The other types of legal interest in land (including property) might comprise holders of privileges, or matrimonial rights.
- If you are unsure about the nature of your interest please contact TerraQuest.

Question 4

If you believe you benefit from rights or restrictions over other land within the area shown on Plan B, please outline what you believe they are and over what land, title or property.

Question 5

- a) There should be a Plan A (2 Copies) and a Plan B (1 Copy), Plan A shows a pink shaded area in which we understand you may have a legal interest along with an edged red area which is the area of legal interests contained within the proposed development, and Plan B an area edged in red showing the area subject to research for the proposed development.
- b) One Plan A copy is for your information and retention whilst the other is to be returned to TerraQuest with either a signature if the pink shaded area(s) are correct or an amendment if the pink shaded area(s) on the plan is/are not correct.
- c) Particular attention should be paid to situations such as rights or other benefits which have a different extent to that of the property itself, such as rights to use fire escapes, other access/egress, drainage rights or car parks.
- d) One copy of the Plan A must always be returned.

Question 7

Please list any other known legal interests or equitable interests not already disclosed over the land or property that you have an interest in.

If you hold a joint interest, or an interest in common, please provide details of all other parties.

Equitable Interests

Rights in or over land which fail to qualify as legal rights take effect as equitable interests therefore estates, interests, and charges in or over land which are not legal estates are referred to as equitable interests. Examples of such interests include:

- Option to purchase (The right to buy a property at a given price within a specific period of time)
- Contract to purchase (A contract the buyer initiates which details the purchase price and conditions of the transaction and is accepted by the seller. Also known as an agreement of sale)
- Beneficiary of a trust (A trust is a relationship whereby a party called a trustee holds property, either real or personal, for the benefit of other parties or persons, or for some purpose permitted by law)
- Wherever the legal owner(s) of property can be compelled to hold that property for the benefit of the equitable owner(s). Where groups of individuals are concerned, a person may be both a legal and an equitable owner. For example, an individual may own a house and hold it for the benefit of another.
- Legal rights in a property that do not include the right to sell its legal title. This may apply to a mortgage lender.

Question 9

- a) Sometimes it is necessary to make further enquiries as a result of new information or changes to the plans for the scheme. Please provide the name and telephone number of the individual(s) whom we should contact.
- b) If a third party (a solicitor, for example) has been instructed to complete this questionnaire on behalf of the person with an interest in the property, please supply written confirmation of that fact.

Equitable Interests

Rights in or over land which fail to qualify as legal rights take effect as equitable interests therefore estates, interests, and charges in or over land which are not legal estates are referred to as equitable interests. Examples of such interests include:

- Option to purchase (The right to buy a property at a given price within a specific period of time)
- Contract to purchase (A contract the buyer initiates which details the purchase price and conditions of the transaction and is accepted by the seller. Also known as an agreement of sale)
- Beneficiary of a trust (A trust is a relationship whereby a party called a trustee holds property, either real or personal, for the benefit of other parties or persons, or for some purpose permitted by law)
- Wherever the legal owner(s) of property can be compelled to hold that property for the benefit of the equitable owner(s). Where groups of individuals are concerned, a person may be both a legal and an equitable owner. For example, an individual may own a house and hold it for the benefit of another.
- Legal rights in a property that do not include the right to sell its legal title. This may apply to a mortgage lender.

Question 9

- a) Sometimes it is necessary to make further enquiries as a result of new information or changes to the plans for the scheme. Please provide the name and telephone number of the individual(s) whom we should contact.
- b) If a third party (a solicitor, for example) has been instructed to complete this questionnaire on behalf of the person with an interest in the property, please supply written confirmation of that fact.

The Questionnaire

Question 1

- a) Please give the full name of the person who or organisation which has a legal interest in the property.
- b) For Limited Companies, please supply the registered office address and telephone number. Place of registration would normally be "England and Wales", but may be Scotland, Isle of Man, Jersey, etc. Please also supply and confirm the address for service of future correspondence and notices.
- c) For other corporate bodies, please supply corporate title, address and telephone number of the principal office.
- d) For individuals and partners, trustees, governors or similar executive positions, please supply full names (including all forenames), home address, telephone numbers and where applicable the collective title of each group or organisation. An additional sheet may be used if required.

Question 2

- a) If you have an agreement to use or occupy the property and pay a rent or licence fee, then you probably have a lease or tenancy or licence.
 - b) If you have a legal right to use another person's land for a particular purpose e.g. a right to walk through your neighbour's land to gain access to your property, then you have an easement/right. Easements are legal rights which give the legal owner of one piece of land the right to use a defined portion of another person's land. Utilities often get easements that allow them to run pipes or phone lines beneath private property. Other examples of easements may relate to drains, power, or rights of way. In most cases easements deal with land itself, not the landowners, so that when land is bought or sold the easements which relate to that land go with the land.
 - c) If you have a legal right to take possession of the property you have a right of re-entry.
 - d) If the property is subject to a restriction e.g. not to do something on the land like more alterations then your property may be subject to a restrictive covenant. e.g. not to make any alterations without obtaining the consent of 'xyz'
 - e) If you have formal permission from the proper authorities to do something it may be classed as a licence e.g. a licence obtained from an authority to place a sandwich board on a footpath. Or this may be a grazing licence, or a licence to mow and remove grass from the land.
 - f) The other types of legal interest in land (including property) might comprise holders of privileges, or matrimonial rights.
- If you are unsure about the nature of your interest please contact TerraQuest.

Question 4

If you believe you benefit from rights or restrictions over other land within the area shown on Plan B, please outline what you believe they are and over what land, title or property.

Question 5

- a) There should be a Plan A (2 Copies) and a Plan B (1 Copy), Plan A shows a pink shaded area in which we understand you may have a legal interest along with an edged red area which is the area of legal interests contained within the proposed development, and Plan B an area edged in red showing the area subject to research for the proposed development.
- b) One Plan A copy is for your information and retention whilst the other is to be returned to TerraQuest with either a signature if the pink shaded area(s) are correct or an amendment if the pink shaded area(s) on the plan is/are not correct.
- c) Particular attention should be paid to situations such as rights or other benefits which have a different extent to that of the property itself, such as rights to use fire escapes, other access/egress, drainage rights or car parks.
- d) One copy of the Plan A must always be returned.

Question 7

Please list any other known legal interests or equitable interests not already disclosed over the land or property that you have an interest in.

If you hold a joint interest, or an interest in common, please provide details of all other parties.

Equitable Interests

Rights in or over land which fail to qualify as legal rights take effect as equitable interests therefore estates, interests, and charges in or over land which are not legal estates are referred to as equitable interests. Examples of such interests include:

- Option to purchase (The right to buy a property at a given price within a specific period of time)

- Beneficiary of a trust (A trust is a relationship whereby a party called a trustee holds property, either real or personal, for the benefit of other parties or persons, or for some purpose permitted by law)
- Wherever the legal owner(s) of property can be compelled to hold that property for the benefit of the equitable owner(s). Where groups of individuals are concerned, a person may be both a legal and an equitable owner. For example, an individual may own a house and hold it for the benefit of another.
- Legal rights in a property that do not include the right to sell its legal title. This may apply to a mortgage lender.

Question 9

- a) Sometimes it is necessary to make further enquiries as a result of new information or changes to the plans for the scheme. Please provide the name and telephone number of the individual(s) whom we should contact.

- c) For other corporate bodies, please supply corporate title, address and telephone number of the principal office.
- d) For individuals and partners, trustees, governors or similar executive positions, please supply full names (including all forenames), home address, telephone numbers and where applicable the collective title of each group or organisation. An additional sheet may be used if required.

Question 2

- a) If you have an agreement to use or occupy the property and pay a rent or licence fee, then you probably have a lease or tenancy or licence.
 - b) If you have a legal right to use another person's land for a particular purpose e.g. a right to walk through your neighbour's land to gain access to your property, then you have an easement/right. Easements are legal rights which give the legal owner of one piece of land the right to use a defined portion of another person's land. Utilities often get easements that allow them to run pipes or phone lines beneath private property. Other examples of easements may relate to drains, power, or rights of way. In most cases easements deal with land itself, not the landowners, so that when land is bought or sold the easements which relate to that land go with the land.
 - c) If you have a legal right to take possession of the property you have a right of re-entry.
 - d) If the property is subject to a restriction e.g. not to do something on the land like more alterations then your property may be subject to a restrictive covenant. e.g. not to make any alterations without obtaining the consent of 'xyz'
 - e) If you have formal permission from the proper authorities to do something it may be classed as a licence e.g. a licence obtained from an authority to place a sandwich board on a footpath. Or this may be a grazing licence, or a licence to mow and remove grass from the land.
 - f) The other types of legal interest in land (including property) might comprise holders of privileges, or matrimonial rights.
- If you are unsure about the nature of your interest please contact TerraQuest.

Question 4

If you believe you benefit from rights or restrictions over other land within the area shown on Plan B, please outline what you believe they are and over what land, title or property.

Question 5

- a) There should be a Plan A (2 Copies) and a Plan B (1 Copy), Plan A shows a pink shaded area in which we understand you may have a legal interest along with an edged red area which is the area of legal interests contained within the proposed development, and Plan B an area edged in red showing the area subject to research for the proposed development.
- b) One Plan A copy is for your information and retention whilst the other is to be returned to TerraQuest with either a signature if the pink shaded area(s) are correct or an amendment if the pink shaded area(s) on the plan is/are not correct.
- c) Particular attention should be paid to situations such as rights or other benefits which have a different extent to that of the property itself, such as rights to use fire escapes, other access/egress, drainage rights or car parks.
- d) One copy of the Plan A must always be returned.

Question 7

Please list any other known legal interests or equitable interests not already disclosed over the land or property that you have an interest in.

If you hold a joint interest, or an interest in common, please provide details of all other parties.

Equitable Interests

Rights in or over land which fail to qualify as legal rights take effect as equitable interests therefore estates, interests, and charges in or over land which are not legal estates are referred to as equitable interests. Examples of such interests include:

- Option to purchase (The right to buy a property at a given price within a specific period of time)
- Contract to purchase (A contract the buyer initiates which details the purchase price and conditions of the transaction and is accepted by the seller. Also known as an agreement of sale)
- Beneficiary of a trust (A trust is a relationship whereby a party called a trustee holds property, either real or personal, for the benefit of other parties or persons, or for some purpose permitted by law)
- Wherever the legal owner(s) of property can be compelled to hold that property for the benefit of the equitable owner(s). Where groups of individuals are concerned, a person may be both a legal and an equitable owner. For example, an individual may own a house and hold it for the benefit of another.
- Legal rights in a property that do not include the right to sell its legal title. This may apply to a mortgage lender.

Question 9

- a) Sometimes it is necessary to make further enquiries as a result of new information or changes to the plans for the scheme. Please provide the name and telephone number of the individual(s) whom we should contact.
- b) If a third party (a solicitor, for example) has been instructed to complete this questionnaire on behalf of the person with an interest in the property, please supply written confirmation of that fact.

The Questionnaire

Question 1

- a) Please give the full name of the person who or organisation which has a legal interest in the property.
- b) For Limited Companies, please supply the registered office address and telephone number. Place of registration would normally be "England and Wales", but may be Scotland, Isle of Man, Jersey, etc. Please also supply and confirm the address for service of future correspondence and notices.
- c) For other corporate bodies, please supply corporate title, address and telephone number of the principal office.
- d) For individuals and partners, trustees, governors or similar executive positions, please supply full names (including all forenames), home address, telephone numbers and where applicable the collective title of each group or organisation. An additional sheet may be used if required.

Question 2

- a) If you have an agreement to use or occupy the property and pay a rent or licence fee, then you probably have a lease or tenancy or licence.
- b) If you have a legal right to use another person's land for a particular purpose e.g. a right to walk through your neighbour's land to gain access to your property, then you have an easement/right. Easements are legal rights which give the legal owner of one piece of land the right to use a defined portion of another person's land. Utilities often get easements that allow them to run pipes or phone lines beneath private property. Other examples of easements may relate to drains, power, or rights of way. In most cases easements deal with land itself, not the landowners, so that when land is bought or sold the easements which relate to that land go with the land.
- c) If you have a legal right to take possession of the property you have a right of re-entry.
- d) If the property is subject to a restriction e.g. not to do something on the land like more alterations then your property may be subject to a restrictive covenant. e.g. not to make any alterations without obtaining the consent of 'xyz'
- e) If you have formal permission from the proper authorities to do something it may be classed as a licence e.g. a licence obtained from an authority to place a sandwich board on a footpath. Or this may be a grazing licence, or a licence to mow and remove grass from the land.
- f) The other types of legal interest in land (including property) might comprise holders of privileges, or matrimonial rights.

If you are unsure about the nature of your interest please contact TerraQuest.

Question 4

If you believe you benefit from rights or restrictions over other land within the area shown on Plan B, please outline what you believe they are and over what land, title or property.

Question 5

- a) There should be a Plan A (2 Copies) and a Plan B (1 Copy), Plan A shows a pink shaded area in which we understand you may have a legal interest along with an edged red area which is the area of legal interests contained within the proposed development, and Plan B an area edged in red showing the area subject to research for the proposed development.
- b) One Plan A copy is for your information and retention whilst the other is to be returned to TerraQuest with either a signature if the pink shaded area(s) are correct or an amendment if the pink shaded area(s) on the plan is/are not correct.
- c) Particular attention should be paid to situations such as rights or other benefits which have a different extent to that of the property itself, such as rights to use fire escapes, other access/egress, drainage rights or car parks.
- d) One copy of the Plan A must always be returned.

Question 7

Please list any other known legal interests or equitable interests not already disclosed over the land or property that you have an interest in.

If you hold a joint interest, or an interest in common, please provide details of all other parties.

Equitable Interests

Rights in or over land which fail to qualify as legal rights take effect as equitable interests therefore estates, interests, and charges in or over land which are not legal estates are referred to as equitable interests. Examples of such interests include:

- Option to purchase (The right to buy a property at a given price within a specific period of time)
- Contract to purchase (A contract the buyer initiates which details the purchase price and conditions of the transaction and is accepted by the seller. Also known as an agreement of sale)
- Beneficiary of a trust (A trust is a relationship whereby a party called a trustee holds property, either real or personal, for the benefit of other parties or persons, or for some purpose permitted by law)
- Wherever the legal owner(s) of property can be compelled to hold that property for the benefit of the equitable owner(s). Where groups of individuals are concerned, a person may be both a legal and an equitable owner. For example, an individual may own a house and hold it for the benefit of another.
- Legal rights in a property that do not include the right to sell its legal title. This may apply to a mortgage lender.

Question 9

- a) Sometimes it is necessary to make further enquiries as a result of new information or changes to the plans for the scheme. Please provide the name and telephone number of the individual(s) whom we should contact.
- b) If a third party (a solicitor, for example) has been instructed to complete this questionnaire on behalf of the person with an interest in the property, please supply written confirmation of that fact.

The Questionnaire

Question 1

- a) Please give the full name of the person who or organisation which has a legal interest in the property.
- b) For Limited Companies, please supply the registered office address and telephone number. Place of registration would normally be "England and Wales", but may be Scotland, Isle of Man, Jersey, etc. Please also supply and confirm the address for service of future correspondence and notices.
- c) For other corporate bodies, please supply corporate title, address and telephone number of the principal office.
- d) For individuals and partners, trustees, governors or similar executive positions, please supply full names (including all forenames), home address, telephone numbers and where applicable the collective title of each group or organisation. An additional sheet may be used if required.

Question 2

- a) If you have an agreement to use or occupy the property and pay a rent or licence fee, then you probably have a lease or tenancy or licence.
 - b) If you have a legal right to use another person's land for a particular purpose e.g. a right to walk through your neighbour's land to gain access to your property, then you have an easement/right. Easements are legal rights which give the legal owner of one piece of land the right to use a defined portion of another person's land. Utilities often get easements that allow them to run pipes or phone lines beneath private property. Other examples of easements may relate to drains, power, or rights of way. In most cases easements deal with land itself, not the landowners, so that when land is bought or sold the easements which relate to that land go with the land.
 - c) If you have a legal right to take possession of the property you have a right of re-entry.
 - d) If the property is subject to a restriction e.g. not to do something on the land like more alterations then your property may be subject to a restrictive covenant. e.g. not to make any alterations without obtaining the consent of 'xyz'
 - e) If you have formal permission from the proper authorities to do something it may be classed as a licence e.g. a licence obtained from an authority to place a sandwich board on a footpath. Or this may be a grazing licence, or a licence to mow and remove grass from the land.
 - f) The other types of legal interest in land (including property) might comprise holders of privileges, or matrimonial rights.
- If you are unsure about the nature of your interest please contact TerraQuest.

Question 4

If you believe you benefit from rights or restrictions over other land within the area shown on Plan B, please outline what you believe they are and over what land, title or property.

Question 5

- a) There should be a Plan A (2 Copies) and a Plan B (1 Copy), Plan A shows a pink shaded area in which we understand you may have a legal interest along with an edged red area which is the area of legal interests contained within the proposed development, and Plan B an area edged in red showing the area subject to research for the proposed development.
- b) One Plan A copy is for your information and retention whilst the other is to be returned to TerraQuest with either a signature if the pink shaded area(s) are correct or an amendment if the pink shaded area(s) on the plan is/are not correct.
- c) Particular attention should be paid to situations such as rights or other benefits which have a different extent to that of the property itself, such as rights to use fire escapes, other access/egress, drainage rights or car parks.
- d) One copy of the Plan A must always be returned.

Question 7

Please list any other known legal interests or equitable interests not already disclosed over the land or property that you have an interest in.

If you hold a joint interest, or an interest in common, please provide details of all other parties.

Equitable Interests

Rights in or over land which fail to qualify as legal rights take effect as equitable interests therefore estates, interests, and charges in or over land which are not legal estates are referred to as equitable interests. Examples of such interests include:

- Option to purchase (The right to buy a property at a given price within a specific period of time)
- Contract to purchase (A contract the buyer initiates which details the purchase price and conditions of the transaction and is accepted by the seller. Also known as an agreement of sale)
- Beneficiary of a trust (A trust is a relationship whereby a party called a trustee holds property, either real or personal, for the benefit of other parties or persons, or for some purpose permitted by law)
- Wherever the legal owner(s) of property can be compelled to hold that property for the benefit of the equitable owner(s). Where groups of individuals are concerned, a person may be both a legal and an equitable owner. For example, an individual may own a house and hold it for the benefit of another.
- Legal rights in a property that do not include the right to sell its legal title. This may apply to a mortgage lender.

Question 9

- a) Sometimes it is necessary to make further enquiries as a result of new information or changes to the plans for the scheme. Please provide the name and telephone number of the individual(s) whom we should contact.
- b) If a third party (a solicitor, for example) has been instructed to complete this questionnaire on behalf of the person with an interest in the property, please supply written confirmation of that fact.

The Questionnaire

Question 1

- a) Please give the full name of the person who or organisation which has a legal interest in the property.
- b) For Limited Companies, please supply the registered office address and telephone number. Place of registration would normally be "England and Wales", but may be Scotland, Isle of Man, Jersey, etc. Please also supply and confirm the address for service of future correspondence and notices.
- c) For other corporate bodies, please supply corporate title, address and telephone number of the principal office.
- d) For individuals and partners, trustees, governors or similar executive positions, please supply full names (including all forenames), home address, telephone numbers and where applicable the collective title of each group or organisation. An additional sheet may be used if required.

Question 2

- a) If you have an agreement to use or occupy the property and pay a rent or licence fee, then you probably have a lease or tenancy or licence.
 - b) If you have a legal right to use another person's land for a particular purpose e.g. a right to walk through your neighbour's land to gain access to your property, then you have an easement/right. Easements are legal rights which give the legal owner of one piece of land the right to use a defined portion of another person's land. Utilities often get easements that allow them to run pipes or phone lines beneath private property. Other examples of easements may relate to drains, power, or rights of way. In most cases easements deal with land itself, not the landowners, so that when land is bought or sold the easements which relate to that land go with the land.
 - c) If you have a legal right to take possession of the property you have a right of re-entry.
 - d) If the property is subject to a restriction e.g. not to do something on the land like more alterations then your property may be subject to a restrictive covenant. e.g. not to make any alterations without obtaining the consent of 'xyz'
 - e) If you have formal permission from the proper authorities to do something it may be classed as a licence e.g. a licence obtained from an authority to place a sandwich board on a footpath. Or this may be a grazing licence, or a licence to mow and remove grass from the land.
 - f) The other types of legal interest in land (including property) might comprise holders of privileges, or matrimonial rights.
- If you are unsure about the nature of your interest please contact TerraQuest.

Question 4

If you believe you benefit from rights or restrictions over other land within the area shown on Plan B, please outline what you believe they are and over what land, title or property.

Question 5

- a) There should be a Plan A (2 Copies) and a Plan B (1 Copy), Plan A shows a pink shaded area in which we understand you may have a legal interest along with an edged red area which is the area of legal interests contained within the proposed development, and Plan B an area edged in red showing the area subject to research for the proposed development.
- b) One Plan A copy is for your information and retention whilst the other is to be returned to TerraQuest with either a signature if the pink shaded area(s) are correct or an amendment if the pink shaded area(s) on the plan is/are not correct.
- c) Particular attention should be paid to situations such as rights or other benefits which have a different extent to that of the property itself, such as rights to use fire escapes, other access/egress, drainage rights or car parks.
- d) One copy of the Plan A must always be returned.

Question 7

Please list any other known legal interests or equitable interests not already disclosed over the land or property that you have an interest in.

If you hold a joint interest, or an interest in common, please provide details of all other parties.

Equitable Interests

Rights in or over land which fail to qualify as legal rights take effect as equitable interests therefore estates, interests, and charges in or over land which are not legal estates are referred to as equitable interests. Examples of such interests include:

- Option to purchase (The right to buy a property at a given price within a specific period of time)
- Contract to purchase (A contract the buyer initiates which details the purchase price and conditions of the transaction and is accepted by the seller. Also known as an agreement of sale)
- Beneficiary of a trust (A trust is a relationship whereby a party called a trustee holds property, either real or personal, for the benefit of other parties or persons, or for some purpose permitted by law)
- Wherever the legal owner(s) of property can be compelled to hold that property for the benefit of the equitable owner(s). Where groups of individuals are concerned, a person may be both a legal and an equitable owner. For example, an individual may own a house and hold it for the benefit of another.
- Legal rights in a property that do not include the right to sell its legal title. This may apply to a mortgage lender.

Question 9

- a) Sometimes it is necessary to make further enquiries as a result of new information or changes to the plans for the scheme. Please provide the name and telephone number of the individual(s) whom we should contact.
- b) If a third party (a solicitor, for example) has been instructed to complete this questionnaire on behalf of the person with an interest in the property, please supply written confirmation of that fact.

 Proposed Scheme Boundary

Boston Alternative Energy Facility

Date	29 August 2018
Scale	1:5,000@A3

19 February 2019

Dear Sir or Madam,

Update on proposals for Boston Alternative Energy Facility

We wrote to you in September 2018 to introduce proposals for Boston Alternative Energy Facility, a state-of-the-art power-generation plant that will lead the way in land-based renewable power across the UK, and to advise you of Phase One of the consultation about the Facility.

We wrote to you about the proposals because you have been identified as a party with an interest in land and/or property, or have rights over land, which is within or in close proximity to the proposed development area. Land referencing company TerraQuest has been appointed by Alternative Use Boston Projects Ltd to research land ownership and undertake land referencing work. They will have already contacted you to confirm the details of your interest in land in connection with the Facility.

The first phase of consultation about the proposals ended on 19 October 2018, with feedback largely positive and supportive. I have attached a copy of our Phase One feedback summary, which provides further details of the responses received.

We are now in Phase Two of the community consultation for the proposed Facility which will include a series of Public Information Days which are open to all, offering the opportunity to find out more about our proposals, offer feedback and help shape our plans. Details of the remaining events are below:

Ridlington Centre Sibsey Lane, Boston PE21 6HB	Wednesday 20 February 2019	3.00 – 7.00pm
Fishtoft Pavillion Playing Fields, Church Green Road, Fishtoft PE21 0RP	Thursday 21 February 2019	3.00 – 7.00pm
Frampton Church House Village Hall 140 Middlegate Road, Frampton PE20 1AW	Friday 22 February 2019	3.00 – 7.00 pm
St Nicholas Community Centre Fishtoft Road, Boston PE21 0AA	Saturday 23 February 2019	1.00 – 5.00 pm

As part of the community consultation we would also like to invite you to comment on the proposals by completing the online feedback form. This can be found at www.surveymonkey.co.uk/r/bostonaefphase2. Please note, this survey closes on 25 March 2019.

Further information about the project can be found on our website at www.bostonaef.co.uk.

1 Introduction

1.1.1 Five Public Information Days were hosted on behalf of Alternative Use Boston Projects Ltd (AUBP) in September 2018 to consult on proposals for a new power-generation plant, Boston Alternative Energy Facility. The Public Information Days were held at the following locations.

Table 1 Locations, dates and times of Public Information Days

Venue	Date	Time
White Hart Hotel 1-5 High street, Boston PE21 8SH	14 September 2018	2-8pm
St Nicholas Community Centre Fishtoft Road, Skirbeck PE21 0AA	15 September 2018	2-8pm
Black Sluice Lock Cottages South Forty Foot Bank, London Road, Boston PE21 7RA	19 September 2018	2-8pm
Fishtoft Pavilion Playing Fields, Church Green Road PE21 0RP	20 September 2018	2-8pm
Frampton Church House Village Hall Middlegate Road, Frampton, Boston PE20 1AW	21 September 2018	2-8pm

1.1.2 These events formed part of Phase One of the pre-application consultation for the Boston Alternative Energy Facility, as set out in the Statement of Community Consultation.

1.1.3 Over 240 people attended the events. All attendees were encouraged to share their feedback on the proposals. The feedback received will be considered by AUBP as the proposed facility is developed and considered where relevant.

1.1.4 The Phase One Public Information Days were publicised via adverts in three local newspapers (Boston Standard, Lincolnshire Free Press and Spalding Guardian) and articles published in local media outlets; posters displayed across Boston and sent to parish councils and local businesses to display; and a maildrop to over 26,500 residential and business addresses.

1.1.5 The key objective of the Phase One Public Information Days was to inform members of the public about the proposed Boston Alternative Energy Facility, seek views on any potential local impact on the community and answer any queries about the proposals. The materials displayed at the events were published on the project website, including an online feedback form inviting responses on, or by, 19 October 2018.

2 Attendance

2.1.1 242 people attended the Public Information Days in total. All attendees were invited to complete a feedback form (see **Appendix 1**). At the end of the consultation period (19/10), 71 feedback forms had been received via post and the online survey. **Table 2** below shows the number of feedback forms received from each venue, along with the total number of attendees at each event. Please note, some respondents may have attended more than one event and not all respondents confirmed which event they attended.

9.1.2 Five 'other' comments were made. These comments were:

- The Boston Alternative Energy Facility is not a renewable energy source;
- There are no benefits of the Boston Alternative Energy Facility to the town of Boston;
- The local authority is trying to increase revenues;
- Responsibility needs to be taken for one's own waste; and
- There are benefits of the Boston Alternative Energy Facility in every way.

10 Feedback Received

10.1.1 The feedback form provided sections for respondents to identify any concerns or issues about the scheme. Comments received were as follows:

Table 15 Comments received on questions 9, 10, 11, 12 and 13 of the feedback form

Question	Comments
<p>Q9. If you have any concerns about our proposals, please detail them below.</p>	<p>23 people had no concerns. 15 people had concerns about noise. 14 people had concerns about emissions and air quality. 13 people had concerns about traffic and transport. 9 people had concerns about odour. 9 people had concerns about pollution. 8 people had concerns about the impact on wildlife. 6 people had concerns about safety measures. 4 people suggested waste from Boston should be used. 4 people had concerns about the impact on port. 4 people had concerns about the risk of flooding. 3 people had concerns about public reaction to the proposals. 3 people had concerns about the facility's hours of operation. 1 person had concerns about devaluation of property. 1 person had concerns about the amount of waste the facility will process. 1 person had concerns about health effects.</p>
<p>Q10. What mitigation measures would you like to see minimise any potential negative impacts of the facility?</p>	<p>29 people suggested no mitigation was necessary. 13 people suggested transport mitigation. 11 people suggested mitigation of hazards and increased safety measures. 7 people suggested landscape mitigation. 7 people suggested that surveys should be undertaken and published. 5 people suggested noise mitigation. 5 people suggested the local community needs reassurance. 4 people suggested odour mitigation. 3 suggested using a different location as mitigation. 3 people suggested mitigation against flood risk. 3 people suggested using an acoustic barrier. 2 people suggested mitigation on the height and size of the facility. 2 people suggested members of the public should receive regular updates. 1 person suggested site visits for members of the public. 1 person suggested mitigation against the volume of waste being received.</p>

Question	Comments
	1 person suggested mitigation on where the RDF will be received.
Q11. Are you aware of any other organisations or people Alternative Use Boston Projects Ltd. should talk to, who may have information that could inform our proposals?	<p>A number of groups were suggested which have been listed below.</p> <ul style="list-style-type: none"> • Environment Agency • Schools • Farmers • The Wildlife Trust • Harbour users • Boston Ramblers • Boston U3A • River Authorities • Local businesses • Environmental groups • RSPB • Fisheries • NFU • The Port of Boston
Q12. Are there any additional steps that Alternative Use Boston Projects Ltd. could take to keep local communities better informed about the proposed Boston Alternative Energy Facility?	<p>33 people suggested nothing. 17 people suggested newspapers. 12 people suggested leaflets through the door. 10 people suggested radio. 8 people suggested television. 7 people suggested social media. 5 people suggested the website. 2 people suggested emails. 2 people suggested Parish councils. 1 person suggested tours of an existing facility. 1 person suggested DVDs to be taken home. 1 person suggested the use of libraries. 1 person suggested an open day of the facility after construction. 1 person suggested a stall on the market.</p>
Q13. Please use the space below to provide any additional comments about the Public Information Day or the proposal for Boston Alternative Energy Facility	<p>46 people had no additional comments. 11 people suggested the Public Information Days were informative events. 7 people stated that the proposals were a good idea. 3 people recognised the environmental benefits of the project. 2 people suggested that the proposals are a positive use of waste. 2 people suggested the proposals were a better alternative to landfill. 2 people commented on the lack of disabled access at The White Hart Hotel. 1 person commented on the Boston Alternative Energy Facility's effect on house prices. 1 person suggested that a financial contribution should be made to the RSPB, schools, the maintenance of roads and the local council. 1 person suggested the location of the Boston Alternative Energy Facility is not environmentally friendly.</p>

Question	Comments
	1 person recognised that the facility will provide jobs. 1 person acknowledged the use of the river and minimising traffic.

11 Conclusion

11.1.1 Over 240 people attended the Phase One Public Information Days which, from experience gained from other public events, represents a strong turnout and demonstrates the extent of publicity for the consultation.

11.1.2 The feedback received from this phase of consultation was mostly positive and supportive of the proposals.

11.1.3 Respondents understood the need to reduce landfill and find alternative ways to generate renewable energy. Respondents also thought that creating energy from waste was a good idea. The main concerns people had related to traffic, safety, air quality and emissions, odour and noise.

Dear Sir / Madam,

Boston Alternative Energy Facility – Phase 4 Consultation

I am writing to you on behalf of Alternative Use Boston Projects Ltd to update you about our proposal for the Boston Alternative Energy Facility (the Facility), a state-of-the-art power-generation plant located south of Boston, on the Riverside Industrial Estate, next to The Haven.

The Facility is classed as a Nationally Significant Infrastructure Project (NSIP) for which Alternative Use Boston Projects Limited will submit an application to the Planning Inspectorate (PINS) for a Development Consent Order (DCO).

As you may recall from our previous letters, we have undertaken three phases of public consultation about the proposals for the Facility. Phase 3 statutory consultation took place in June and July 2019 and since then there have been some changes proposed to the project. These are due to several reasons including a project review and ongoing iterative design work, feedback received during the earlier consultations, and input from specialist bodies. As a result of this, we are now undertaking an additional round of consultation (Phase 4) which refers to the changes made to the proposals since the Phase 3 consultation.

The proposed Facility remains an Energy from Waste (EfW) facility, although the technology used to treat the waste has now switched from gasification to traditional EfW technology. We have summarised this change and others in the attached newsletter which is being delivered to local residents and businesses. The changes are anticipated to have minor effects, resulting in an overall reduction in potential negative impacts.

We remain committed to open and honest two-way engagement and consultation. Due to the Covid-19 pandemic, we are unable to hold face-to-face meetings as we have for previous phases of consultation. Instead, we are organising online stakeholder meetings via Zoom and would be very happy to arrange a meeting with you if you would find this helpful. Please email [REDACTED] if you would like us to arrange a meeting.

The newsletter also explains that instead of holding public exhibitions for this phase of the consultation, in order to ensure that people's questions can be answered, the Applicant is hosting two webinars and, for those without access to a computer, a telephone surgery. The webinars have been arranged for 12.00 pm on Tuesday 11 August and Thursday 20 August, while the telephone surgeries will take place on Wednesday 26 August. You are, of course, very welcome to join us at the

webinar on 20 August or the telephone surgeries and you can book a place using the contact details set out at the end of this notice if you wish to attend.

How to provide comments and sign-up for the information events

The consultation period in respect of the proposed Facility will run from 10 August 2020 until 10 September 2020 (inclusive). **The deadline for receipt of your views and comments is 11.59 pm on 10 September 2020.**

You can provide your comments via the channels below:

On the project website: [REDACTED] by completing the online comments form or the phase four online survey: [REDACTED]

By email: [REDACTED]

By Freepost: Boston Alternative Energy Facility, RTLY-RLGH-GKSE, FREEPOST, 25 Priestgate, Peterborough, PE1 1JL

By Freephone: 0800 0014 050 – where you can request a hard copy of the feedback form.

You can also sign-up for the webinars or the telephone surgery by email, Freepost or Freephone.

Please ensure you include your name and address when making a response. Personal details will not be shared, but any comments made may be made public as part of the consultation.

We welcome your feedback on the proposed changes to help us as we begin to finalise our proposal before we submit the application for a DCO later this year. Following submission of the Application there will be a further opportunity to make representations on the proposals and to engage during the Examination process.

Further information about the project can be found on our website at [REDACTED]

Yours sincerely,

Kelly Linay

Dear ,

Development Consent Order for Boston Alternative Energy Facility submitted and accepted by the Planning Inspectorate

On 20 April 2021, the Planning Inspectorate (“PINS”) (on behalf of the Secretary of State) accepted for examination the application by Alternative Use Boston Projects Limited for a Development Consent Order (“DCO”) to construct and operate a new energy from waste facility in Boston, Lincolnshire (Boston Alternative Energy Facility).

In accordance with the relevant legal requirements, we are writing to specified organisations notifying them of this fact. Notices have been put up around the site and formal newspaper notices have been published in local and national press.

Enclosed with this letter is a copy of the notice made under section 56(2) of the Planning Act 2008 and Regulation 16 of the Infrastructure Planning (Environmental Impact Assessment) Regulations of acceptance of an application for a DCO (“Section 56 Notice”) and a USB stick pre-loaded with copies of all the DCO application documents, plans and maps (including a copy of a map showing the location of the Boston Alternative Energy Facility, the draft DCO and the Environmental Statement).

The site for the proposed Facility is located substantially within the Riverside Industrial Estate to the south of Boston town centre. The Facility includes the following main elements:

- wharf and associated infrastructure (including re-baling facility, workshop, transformer pen and welfare facilities);
- Refuse Derived Fuel (RDF) bale storage area, including sealed drainage with automated crane system for transferring bales;
- conveyor system between the RDF storage area and the RDF bale shredding plant, part of which is open and part of which is under cover;
- bale shredding plant;
- RDF bunker building;
- Thermal Treatment Plant comprising three separate 34 Mega Watt electrical (MWe) combustion lines and three stacks;

- turbine plant comprising three steam turbine generators and make-up water facility;
- air-cooled condenser structure, transformer pen and associated piping and ductwork;
- lightweight aggregate manufacturing plant comprising four kiln lines, two filter banks with stacks, storage silos, a dedicated berthing point at the wharf, and storage (and drainage) facilities for silt and clay;
- electrical export infrastructure;
- two carbon dioxide (CO₂) recovery plants and associated infrastructure;
- associated site infrastructure, including site roads and car parking, site workshop and storage, security gate, and control room with visitor centre; and
- habitat mitigation works for Redshank and other bird species comprising of improvements to the existing habitat through the creation of small features such as pools/scrapes and introduction of small boulders within a Habitat Mitigation Area.

The Section 56 Notice includes details of how to register with PINS as an interested party with regards to the Application under the section 'Making representations about the proposed DCO'.

SECTION 56(2) PLANNING ACT 2008

REGULATION 8, THE INFRASTRUCTURE PLANNING (APPLICATIONS: PRESCRIBED FORMS AND PROCEDURE) REGULATIONS 2009 (AS AMENDED)

REGULATION 16, THE INFRASTRUCTURE PLANNING (ENVIRONMENTAL IMPACT ASSESSMENT) REGULATIONS 2017 (AS AMENDED)

NOTICE OF ACCEPTANCE OF AN APPLICATION FOR A DEVELOPMENT CONSENT ORDER PROPOSED BOSTON ALTERNATIVE ENERGY FACILITY DEVELOPMENT CONSENT ORDER (PLANNING INSPECTORATE REFERENCE: EN010095)

Notice is hereby given that the Secretary of State for Business, Energy and Industrial Strategy has accepted an application made by Alternative Use Boston Projects Ltd (“the Applicant”) of 26 Church Street, Bishop’s Stortford, Hertfordshire, CM23 2LY (Company Number 11013830), under Section 37 of the Planning Act 2008 (“the Application”) for a Development Consent Order (“DCO”). The Application was submitted by the Applicant on 23 March 2021 and accepted for examination on 20 April 2021. The Planning Inspectorate reference number is EN010095.

The Proposed Development will authorise the construction, operation and maintenance of a power-generation plant, known as the Boston Alternative Energy Facility, substantially within the Riverside Industrial Estate, Boston, Lincolnshire (“the Proposed Development”).

The Applicant is now required—

- by section 56(6) of the Planning Act 2008 to make available to persons/bodies specified under that section a copy of the application and the documents and information that accompanied it;
- by Regulation 8(2)(e) of the Infrastructure Planning (Applications: Prescribed Forms And Procedure) Regulations 2009 (As Amended) to include a map showing the location of the Proposed Development; and
- under Regulation 16(2)(b) of the Infrastructure Planning (Environmental Impact Assessment) Regulations 2017 to send a copy of the accepted application, a map showing where the proposed development is to be sited, and a copy of the environmental statement, to all of those bodies who qualify as a “consultation body” under Regulation 3(1) of those Regulations.

Summary of the Proposed Development

The Proposed Development would comprise—

- a wharf and associated infrastructure (including re-baling facility, workshop, transformer pen and welfare facilities);
- a refuse derived fuel (“RDF”) bale contingency storage area, including sealed drainage, with automated crane system for transferring bales;

- conveyor system running in parallel to the wharf between the RDF storage area and the RDF bale shredding plant. Part of the conveyor system is open and part of which is under cover (including thermal cameras);
- a bale shredding plant;
- a RDF bunker building;
- a thermal treatment plant comprising three nominal 34 MWe (megawatts electrical) combustion lines (circa 120 MWth (megawatts thermal)) and associated ductwork and piping, transformer pens, diesel generators, three stacks, ash silos and ash transfer network; and air pollution control residues (“APCr”) silo and transfer network;
- a turbine plant comprising three steam turbine generators, make-up water facility and associated piping and ductwork;
- an air-cooled condenser structure, transformer pen and associated piping and ductwork;
- a Lightweight Aggregate (“LWA”) manufacturing plant comprising four kiln lines, two filter banks with stacks, storage silos for incoming ash, APCr, and binder material (clay and silt), a dedicated berthing point at the wharf, silt storage and drainage facility, clay storage and drainage facility, LWA workshop, interceptor tank, LWA control room, aggregate storage facility and plant for loading aggregate / offloading clay or silt;
- electrical export infrastructure;
- two carbon dioxide (CO₂) recovery plants and associated infrastructure, including chiller units;
- associated site infrastructure, including site roads, pedestrian routes, car parking, site workshop and storage, security gate, control room with visitor centre and site weighbridge; and
- habitat mitigation works for Redshank and other bird species comprising of improvements to the existing habitat through the creation of small features such as pools/scrapes and introduction of small boulders within a Habitat Mitigation Area.

The Application will also seek authorisation for the compulsory acquisition of interests in land, the temporary use of land, and the overriding of easements and other rights.

Environmental Impact Assessment

The Application is an Environmental Impact Assessment development (“EIA development”) as defined by The Infrastructure Planning (Environmental Impact Assessment) Regulations 2017. The Application is therefore accompanied by an Environmental Statement.
