

## VPI IMMINGHAM OCGT PROJECT

### ACCOMPANIED SITE VISIT: SUGGESTED ITINERARY

#### Background

At the Preliminary Meeting for the VPI Immingham OCGT Project, VPI Immingham B Ltd and DWD were invited to produce a suggested itinerary for an accompanied site visit for the Examining Authority (ExA).

The timetable for the examination as set out in the Rule 8 letter (dated 15 August 2019) states that 1 October 2019 has been reserved for the accompanied site visit. Comments from interested parties on where the ExA should visit must be submitted by Deadline 1 (29 August 2019).

#### Itinerary

The tour will focus primarily on the OCGT Power Station Site and points of access, and further areas of interest within the Site itself. It is not anticipated necessary to spend a great deal of time visiting the Existing Gas Pipeline Site, perhaps a couple of views from the road along its length will suffice.

A mini bus will be provided by the Applicant but some areas are inaccessible and a small amount of walking will be inevitable. Notification of attendees is required to [clara.rands@dwdllp.com](mailto:clara.rands@dwdllp.com) at least two weeks prior to the visit to ensure the availability of transport.

The site visit can be completed comfortably over one day and this will provide adequate time to visit the site in detail.

#### Accompanied Visit Timetable

Time	Activity
9.30am onwards	Meet at VPI CHP plant offices off Rosper Road.
	Visit the OCGT Power Station Site and the northern part of the Site, including parts of the Access Site, Temporary Construction and Laydown Site Gas Connection Site.
	Visit the Existing CHP Plant Site, which also includes land comprising the Access Site, Temporary Construction and Laydown Site, Gas Connection Site, Electrical Connection Site, and the Utilities and Services Connections Site.
	A walk up the ST gantry on the VPI site (PPE required) to view the OCGT Power Station Site and bridge crossing location (part of Works no 4 and 5).
12.30pm	Lunch stop at VPI CHP plant offices.
	Stop along Rosper Road to view the fields to the east and the Grade II lighthouses.
	Two stops along the Existing Gas Pipeline and Feeder No.9.
3.30pm	Return to VPI CHP plant offices.
