

## Hornsea Project Four: Plans and Drawings

PINS Document Reference: A4.4.2 APFP Regulation 5(2)(a)

## Volume A4, 4.2: Crossing Schedule - Onshore

Prepared David Brooks, Ørsted, June 2021 Checked Thomas Watts, Ørsted, June 2021 Accepted Keith Lynch, Ørsted, June 2021 Approved Jamie Baldwin, Ørsted, June 2021

Doc No: A4.4.2 Version: B

#### Contents

1	Glossary and Acronyms	Presents defined terms and acronyms used within the onshore Crossing Schedule	2
2	Guide - How to read the Hornsea Four	Provides an a guide on the information contained within the Crossing Schedule and how it is	3
	Onshore Crossing Schedule	intended to be read	
3	Onshore Crossing Schedule	Contains the list of all crossings identified to be crossed by Hornsea Four	5
4	Plans	Accompanying plans showing all crossings identified to be crossed by Hornsea Four	15

### Glossary

Term	Definition
Export cable corridor (ECC)	The specific corridor of seabed (seaward of Mean High Water Springs (MHWS)) and land (landward of MHWS) from the Hornsea Project Four array area to the Creyke Beck National Grid substation, within which the export cables will be located.
Haul Road	The track along the onshore ECC which the construction traffic would use to access work fronts.
Landfall	The generic term applied to the entire landfall area between Mean Low Water Spring (MLWS) tide and the Transition Joint Bay (TJB) inclusive of all construction works, including the offshore and onshore ECC, intertidal working area and landfall compound. Where the offshore cables come ashore east of Fraisthorpe.
Obstacle	Refers to any identified feature or object to be crossed by both the temporary and permanent working areas of Hornsea Four. Examples of Obstacles can be found under the term 'Type of Obstacle', in the <b>Guide</b> Sheet of this Crossing Schedule, but can broadly be described as, but are not limited to, railways or other transport systems, utilities (both underground and overhead), ecological areas or other obstacles identified through consultation with landowners and those with an interest in land.
Onshore substation (OnSS)	Comprises a compound containing the electrical components for transforming the power supplied from Hornsea Project Four to 400 kV and to adjust the power quality and power factor, as required to meet the UK Grid Code for supply to the National Grid. If a HVDC system is used the OnSS will also house equipment to convert the power from HVDC to HVAC.
Orsted Hornsea Project Four Ltd.	The Applicant for the proposed Hornsea Project Four Offshore Wind Farm Development Consent Order (DCO).
Trenchless Techniques	Also referred to as trenchless crossing techniques or trenchless methods. These techniques include HDD, thrust boring, auger boring, and pipe ramming, which allow ducts to be installed under an obstruction without breaking open the ground and digging a trench.

#### Units

Term	Definition
kV	kilovolt

#### Acronyms

Acronym	Definition
ACC	Access (Access track)
Co	Commitment
EA	Environment Agency
ECC	Export cable corridor (onshore export cable corridor)
EN	Environment
ERY	East Riding of Yorkshire
ERYC	East Riding of Yorkshire Council
HC	Haul road crossing
HDD	Horizontal Directional Drilling
ID	Identifier
IDB	Internal Drainage Board (Beverley and North Holderness)
LC	Logistics Compound
LDWR	Long Distance Walking Route
LF	Landfall
LLFA	Lead Local Flood Authority (ERYC)
LWS	Local Wildlife Site
No.	Number
OS	Ordnance Survey
PRoW	Public right of way
PW	Public right of way
RA	Railway
RO	Road
SS	Substation (Onshore substation)
SSSI	Site of Special Scientific Interest
UT	Utility
WA	Water

### How to read the Hornsea Four Onshore Crossing Schedule

Headings in Crossing Schedule	Explanation of information within column
	1. The crossing IDs are split according to the different elements of the onshore infrastructure. The permanent onshore infastructure elements of Hornsea Four are identified as follows, and form the first part of the Crossing ID:
	(a) the landfall - crossings at the landfall begin with 'LF'; (b) the onshore export cable corridor (ECC) - crossings along the onshore ECC begin with 'ECC'; and (c) the onshore substation (OnSS) - crossings at the OnSS begin with 'SS'
	The temporary onshore infrastructure elements are identified as follows, and are identified in relation to the permanent infrastructure elements they are intended to serve:
	(a) Logistics Compound - where the crossing is identified in a logistics compound, 'LC' will follow the identifier for the element of the permanent infrastructure. For example. 'ECC_LC' or 'SS_LC'; and (b) Access track - where the crossing is identified on an access track, 'ACC' will follow the identifier for the element of the permanent infrastructure. For example. 'ECC_ACC' or 'LF_ACC'
	Logistics compound and access track crossings are numbered along with the cable crossings. Where a crossing is associated to either a Haul Road Crossing or a Highway Access Point, the associated Haul Road Crossing ID or Highway Access Point ID has been added to schedule for each associated point.
Ørsted Crossing Identification No.	N.B. The Crossing ID will only include a reference to 'Logistics Compound/ Access' (LC/ ACC) where applicable. If the ID does not include either of these markers, then it should be assumed that the crossing sits within the permanent footprint of the landfall, onshore ECC or OnSS.
	2. The second part of the crossing ID relates to the crossing categories:
	Roads (RO) – public, private, access tracks, bridges etc. Rail (RA) - railways Environment (EN) – hedgerows, habitats, trees, reed bed and other ecological areas etc. Water (WA) – rivers, streams, drains, ditches, ponds etc. Utility (UT) – pipelines, underground cables & overhead lines etc. Public Right of Ways (PW) – footpaths, bridleways, cycle paths etc
	3. The third part of the Crossing ID relates to number of the crossing which runs largely in numerical order from '001'. (The exceptions to these being crossing which were identified at a later stage, and therefore follow on from the last used number).
	This crossing identificatuion numbering will be used by the Principal Contractor(s) during construction of Hornsea Four.
	Provides a more detailed description of the obstacle, moving on from 'WA'/'RO' categories used in the Crossing ID. The types of road should be listed. For example:
Type of Obstacle	Roads - are identified as A, B, classified, unclassified roads;  Designated Rights of Way - as identified as bridleways, footpaths, cycleways;  Watercourse - is used to cover all drains and rivers;  Isolated waterbodies - are identified as ponds;  Other areas of environmental value - are described as woodland, hedgerow, trees, reed beds; and
	Utilities - are described as cables (which are either 'Overhead lines (OHL)' or underground cables (UGC)', or 'pipelines'.

### How to read the Hornsea Four Onshore Crossing Schedule

Headings in Crossing Schedule	Explanation of information within column
	Provides details of any name already assigned to the feature being crossed, e.g. name/ number of the road, footpath or cycle path number, river/ drain name, pond name, woodland name, SSSI name.
	N.B. If a crossing is not named then for example, the road or drain is called 'unnamed' road/drain.
	For crossings with 'Cable' as the 'Type of Obstacle' the 'Obstacle Name[s]' are categorised as the following:
	1) Underground Cable;
Obstacle Name	2) Overhead Line;
Obstacte Name	3) Pylon/Overhead Line;
	4) Underground Telecommunications;
	5) Overhead Telecommunications'
	6) Pylon/Overhead Telecommunications; and
	7) Track Electricity Cables.
Obstacle Description	To describe further details about the obstacle e.g. SSSI, Semi Natural Broad Leaved Woodland, Species Poor Intact Hedgerow, Species Poor Defunct Hedgerow, Main River, Ordinary Watercourse. Drains refer to a watercourse that is used for land drainage and / or flood risk management.
	For cable crossings, further detail is provided in this column to explain specific types of cable crossings.
Asset Owner/ Responsible Authority	All known 'Asset owners' are listed here. For example: Utilities - Northern power grid, National Grid, Yorkshire Water Railway - Network Rail Hedgerows/ trees - Private, Unknown, Local Highways Authority Roads - Private, Local Highways Authority
	'Responsible Authorities' are used for Watercoures. The responsible authorities include the Environment Agency (EA) for Main Rivers, ERYC for Ordinary Watercourses not maintained by the IDB (as the LLFA) and the IDB for all IDB maintained drains.
Obstacle Comments	These comments are limited to general comments about the obstacle itself, and details about its features.
	Details the proposed crossing method, as follows:  1. 'HDD/Open Cut with haul road'; 2. 'Open cut with haul road'; 3. 'HDD only' – here there is no proposed haul road; and 4. 'HDD with haul road'
Proposed Crossing Method	Where the crossing identified is on an access track (ACC) or possibly logistics compound (LC), the proposed crossing method wills state 'bridge/ culvert' where relevant. As such a form of bridge is anticipated to facilitate a haul road.'
	Where Microsite/Diversion is identified, the Hornsea Four onshore ECC will need to be microsited OR the affected utility / crossing will need to be diverted.
	The 'Horizontal Directional Drilling; Indicative area' shows the indicative HDD locations for onshore elements of Hornsea Four.

### How to read the Hornsea Four Onshore Crossing Schedule

Headings in Crossing Schedule	Explanation of information within column
Ørsted HDD Category	This refers to the type of MDS HDD rig to be used as each crossing. 1 = large (i.e. landfall) 2 = medium (i.e all HDDs along the route, apart from landfall)
Ørsted HDD ID	Each individual HDD has been given its own reference. Where multiple obstacles are being crossed using the same HDD they are grouped in reference to the same HDD ID.
Indicative Maximum HDD length	Indicates the indicative maximum length of a HDD, based on early estimations and past experience. Exact details are to be established prior to construction.
PRoW management	Where Hornsea Four crosses a footpath of bridleway by HDD or open cut, the PRoW may need a management measure (such as 'Divert', 'Manage' or 'Stop up'). Where permanent rights may be required, 'Permanent' is used as a prefix. i.e. 'Permanent Diversion' for the OnSS. It is noted that all PRoWs crossed by Hornsea Four may be stopped up temporarily.
Related Commitment (Co) Number	This column denotes any relevant Commitment number which relates to a crossing. E.g. Where the Applicant has made a commitment to using trenchless techniques, such as HDD to cross a certain type of obstacle, the corresponding commitment number will be listed here.  For full details of the Committments, please refer to Volume A4, Annex 5.2: Commitments Register.
Haul Road Crossing	Illustrates the Haul road crossing number where a haul road crossing is currently required across an obstacle, regardless of the 'Crossing technique.' i.e. open cut/ HDD. It is noted that Haul Road crossing numbers are not provided for every crossing affected by the Haul Road (such as smaller crossings along the onshore ECC) - additional crossings points may be established pre-construction.
Access Point	If there is a temporary or permanent access track with crossing points, those points will be associated to the corresponding access point in this field.
EP1HSRef	Includes the relevant reference from the Extended Phase 1 Habitat Survey (Volume A6, Annex 3.1 and 3.2).
Target Note Ref	Includes the relevant target note references from the Extended Phase 1 Habitat Survey (Volume A6, Annex 3.1 and 3.2).
Hedgerow Assessment	Includes the results of the Hedgerow Assessment, indicating whether a hedgerow is species poor, species rich, etc. as presented in Volume A6, Annex 3.14: Hedgerow and Arboricultural Survey Report.
Hedgerow importance	States whether a hedgerow is 'Important', as defined by the Hedgerows Regulations (1997), presented in Volume A6, Annex 3.14: Hedgerow and Arboricultural Survey Report.
Crossing Schedule Figure Sheet No.	States which of the Onshore Crossing Schedule Sheet numbers the respective crossings is shown on (sheets 1-28), as presented within this document.
