Harbour Energy Deadline 1 Submission re. Hornsea Project Four

1. As signalled in our deadline 1 submission, Harbour Energy and the Applicant have resumed constructive dialogue towards reaching a coexistence agreement.
2. In light of the good progress made, and to avoid time being taken in the examination process if not required, Harbour Energy and the Applicant have agreed to restrict their submissions on these matters at this stage to the following joint statement:
3. The Applicant and Harbour Energy are discussing terms of a coexistence agreement covering matters including marine corridors and provisions for helicopter access for the purpose of decommissioning the Johnston field. At this date, measures to ensure helicopter access remain to be agreed. The Applicant's analysis and conclusions with respect to helicopter operations, as for example documented in A5.11.1 Environmental Statement Volume 5 Annex 11.1: Offshore Installation Interfaces Part 1 (APP-086), are not agreed. The Parties continue to have constructive discussions pertaining to this issue and will update the Examiners by DL5, if not before, as to the progress between them.
4. Accordingly, the comprehensive written representation which Harbour Energy had intended to submit by Deadline 2 will be held at this stage.
