

## SITE IDENTIFICATION FOR CONSULTATION BODIES REQUEST

Please note that the red line boundaries are precautionary and are being used to identify land interests. The formal Order Limits will be refined and submitted with the material change application.

### Migratory Species – Barrier removal / easement

#### RIVER SEVERN: MAISEMORE WEIR

Location: ~3 miles northwest of Gloucester. Grid Reference: SO 81805 21667, W3W: ///risk.unheated.situation

Proposed Compensation Measure: Partial or full weir removal.

## RIVER SEVERN: UPPER LODE WEIR

**Location:** ~2 miles west of Tewkesbury. Grid Reference: SO 88149 32797, W3W: ///strain.accent.dictation

Proposed Compensation Measure: Partial or full weir removal.

## RIVER LUGG: MOUSENATCH / EYTON / COXALL / COWARDS

Location: W3W: ///stutter.smart.tram / says.served.suave / nozzle.utter.tenses / small.firelight.recur

Proposed Compensation Measure: Partial or full weir removal.

# Saltmarsh Creation

## SEVERN ESTUARY FISH ASSEMBLAGE

Location: Pawlett Hams and The Island, 3 miles northwest of Bridgwater. Grid Reference : ST 27348 42730, W3W: [///perusing.squish.spits](https://www.what3words.com/perusing.squish.spits)

Proposed Compensation Measure: Managed retreat and saltmarsh creation via breaching of the soft landscape flood defences and the excavation of new creeks that will allow tidal waters to flood the low-lying areas of the Pawlett peninsula. The works will be very similar to the scheme developed at Steart on the opposite bank of the river Parrett.
