Your ref: NET ZERO TEESSIDE
Date: 26 May 2022

[REDACTED]

Dear Sir/Madam

EN010103: THE NET ZERO TEESSIDE NATIONALLY SIGNIFICANT INFRASTRUCTURE PROJECT. DEADLINE 1. LAND IN THE VICINITY OF THE SSI STEEL WORKS SITE, REDCAR, TEESSIDE, TS10 5QW

Thank you for your consultation which we received on 19 May 2022.

The Environment Agency's advice in these relevant representations is based on information submitted by the Applicant in support of its application for a Development Consent Order ('DCO') for Net Zero Teesside.

Based on matters within our remit, we wish to make representations in relation to the following areas:

- Groundwater and contaminated land
- Ecology
- Water Quality / Water Framework Directive (WFD)
- Flood Risk

The main issue raised by this application relates to the discharge of effluent. No assessment has been made of the impact of the effluent discharges from the proposed regulated site to WFD waterbodies. Therefore, there is a potential risk of deterioration to WFD waterbodies. The Applicant should undertake a water quality model demonstrating the impact of the effluent discharges from the proposed development.

Please do not hesitate to contact me if you have any questions regarding this letter.

Yours faithfully

creating a better place

Thank you for your consultation which we received on 19 May 2022.

The Environment Agency's advice in these relevant representations is based on information submitted by the Applicant in support of its application for a Development Consent Order (â€˜DCO') for Net Zero Teesside.

Based on matters within our remit, we wish to make representations in relation to the following areas:

- â€¢ Groundwater and contaminated land
- â€¢ Ecology
- â€¢ Water Quality / Water Framework Directive (WFD)
- â€¢ Flood Risk

The main issue raised by this application relates to the discharge of effluent. No assessment has been made of the impact of the effluent discharges from the proposed regulated site to WFD waterbodies. Therefore, there is a potential risk of deterioration to WFD waterbodies. The Applicant should undertake a water quality model demonstrating the impact of the effluent discharges from the proposed development.

Statement of Common Ground (SoGC)

We are in the process of reviewing the SoGC and will provide an update at Deadline 2.

Please do not hesitate to contact me if you have any questions regarding this letter.

Yours faithfully
