1.0 INTRODUCTION

1.1 Overview

1.1.1 This Written Summary of Oral Submissions for Compulsory Acquisition Hearing 2 ('CAH2') (Document Ref. 9.23) has been prepared on behalf of Net Zero Teesside Power Limited and Net Zero North Sea Storage Limited (the 'Applicants'). It relates to the application (the 'Application') for a Development Consent Order (a 'DCO'), that has been submitted to the Secretary of State (the 'SoS') for Business, Energy and Industrial Strategy ('BEIS'), under Section 37 of 'The Planning Act 2008' (the 'PA 2008') for the Net Zero Teesside Project (the 'Proposed Development').

1.1.2 The Application was submitted to the SoS on 19 July 2021 and was accepted for Examination on 16 August 2021. A change request made by the Applicants in respect of the Application was accepted into the Examination by the Examining Authority on 6 May 2022.

1.2 Description of the Proposed Development

1.2.1 The Proposed Development will work by capturing CO₂ from a new the gas-fired power station in addition to a cluster of local industries on Teesside and transporting it via a CO₂ transport pipeline to the Endurance saline aquifer under the North Sea. The Proposed Development will initially capture and transport up to 4Mt of CO₂ per annum, although the CO₂ transport pipeline has the capacity to accommodate up to 10Mt of CO₂ per annum thereby allowing for future expansion.

1.2.2 The Proposed Development comprises the following elements:

- **Work Number ('Work No.') 1** – a Combined Cycle Gas Turbine electricity generating station with an electrical output of up to 860 megawatts and post-combustion carbon capture plant (the '**Low Carbon Electricity Generating Station**');
- **Work No. 2** – a natural gas supply connection and Above Ground Installations ('AGIs') (the '**Gas Connection Corridor**');
- **Work No. 3** – an electricity grid connection (the '**Electrical Connection**');
- **Work No. 4** – water supply connections (the '**Water Supply Connection Corridor**');
- **Work No. 5** – waste water disposal connections (the '**Water Discharge Connection Corridor**');
- **Work No. 6** – a CO₂ gathering network (including connections under the tidal River Tees) to collect and transport the captured CO₂ from industrial emitters (the industrial emitters using the gathering network will be responsible for consenting their own carbon capture plant and connections to the gathering network) (the '**CO₂ Gathering Network Corridor**');
- **Work No. 7** – a high-pressure CO₂ compressor station to receive and compress the captured CO₂ from the Low Carbon Electricity Generating Station and the CO₂

Gathering Network before it is transported offshore (the '**HP Compressor Station**');

- **Work No. 8** – a dense phase CO₂ export pipeline for the onward transport of the captured and compressed CO₂ to the Endurance saline aquifer under the North Sea (the '**CO₂ Export Pipeline**');
- **Work No. 9** – temporary construction and laydown areas, including contractor compounds, construction staff welfare and vehicle parking for use during the construction phase of the Proposed Development (the '**Laydown Areas**'); and
- **Work No. 10** – access and highway improvement works (the '**Access and Highway Works**').

1.2.3 The electricity generating station, its post-combustion carbon capture plant and the CO₂ compressor station will be located on part of the South Tees Development Corporation (STDC) Teesworks area (on part of the former Redcar Steel Works Site). The CO₂ export pipeline will also start in this location before heading offshore. The generating station connections and the CO₂ gathering network will require corridors of land within the administrative areas of both Redcar and Cleveland and Stockton-on-Tees Borough Councils, including crossings beneath the River Tees.

1.3 The Purpose and Structure of this document

1.3.1 The purpose of this document is to provide a Written Summary of the submissions made orally by the Applicants at CAH2 held on Wednesday 13 July 2022 at 10am. Table 2-1 in Section 2 of this document contains the Applicants' summary and is structured so that the summary of each agenda item is on a separate row. Table 2-1 document also contains the Applicants' response to the action points arising from CAH2 [EV7-006] published on the Planning Inspectorate's website on 18 July 2022 following completion of the hearings.

2.0 WRITTEN SUMMARY OF ORAL SUBMISSIONS – COMPULSORY ACQUISITION HEARING 2

Table 2-1 Summary of Oral Submissions at CAH2

	AGENDA	SUMMARY OF ORAL CASE
1.	Item 1 Welcome, Introductions, and arrangements for the Compulsory Acquisition Hearing	N/A
2.	Item 2 Purpose of the Hearing	N/A
3.	Item 3 Compulsory Acquisition Schedule <ul style="list-style-type: none"> The ExA will set out their suggested amendments to the table in the Compulsory Acquisition Schedule to simplify it, and provide the ‘at a glance’ information that the ExA require throughout the Examination. 	<p><u>Summary of proposed changes and remaining optionality [REP4-031]</u></p> <p>In a slight change to the published agenda, and in response to a question from the Examining Authority (the “ExA”) Hereward Philpott QC (“HPQC”) for the Applicants provides a summary of the three changes which the Applicants propose to formally request at Deadline 6. The changes serve to reduce the optionality within the DCO and reduce the Order limits. They do not give rise to any new or materially different environmental effects and are considered to be non-material. The changes relate to:</p> <ul style="list-style-type: none"> The selection of the method of crossing the Tees for the CO2 gathering network. The Applicants propose to select option 3, use of the existing Sembcorp 2 tunnel and to remove option 2 (HDD) from the DCO. This serves to reduce the land requirements by excising those associated only with option 2. The selection of the electrical cable connection route. Through discussions with STDC, the Applicants propose to select option 1a and to remove option 1b from the DCO. This serves to reduce the land requirements by excising those associated only with option 1b. The reduction of land subject to temporary possession rights following FEED and landowner engagement. Through a combination of landowner engagement and design development, the Applicants have identified certain areas of land for which temporary possession will no longer be required. <p>REP4-031 identifies the documents that will need to change as a result of these amendments - the intention is to update the relevant application documents at Deadline 6. No additional land is affected and no new consultation would be required.</p> <p><i>[Post-hearing note: as per Action 1 the Applicants intend to submit the formal change request and updated application documents (including Guide to Land Plan Plots) at Deadline 6].</i></p> <p>REP4-031 separately provides an indicative timeline for reducing the remaining optionality that remains in the DCO.</p> <p><u>Agenda Item 3 – Compulsory Acquisition Schedule</u></p> <p>HPQC asks for a copy of the draft updated compulsory acquisition schedule to be sent to the Applicants.</p> <p><i>[Post-hearing note: the Applicants note the updated suggested template compulsory acquisition schedule provided at annex A to the Hearing Action Points published by the ExA on 18 July 2022 (Action 2), and are submitting an updated compulsory acquisition schedule (clean copy only, Document Ref. 9.5) alongside this document at Deadline 5 (Action 3).]</i></p>

<p>4.</p>	<p>Item 4</p> <p>Compulsory Acquisition – Section 122 of the Planning Act 1008 (PA2008)</p> <ul style="list-style-type: none"> • The Applicants are asked to provide a brief update on the progress of negotiations and deadline for their conclusions; and • Affected Persons in attendance and wishing to speak in relation to an objection or issue raised that is relevant to the effects of the Proposed Development are to briefly set out any outstanding concerns that haven't already been discussed. 	<p>Bilal Ahmad (“BA”) for the Applicants provides a summary of the progress of negotiations with affected persons. BA advises that of the 17 identified landowners across the Order Limits, five had agreed heads of terms as at the CAH1 hearing. Heads of terms have now been agreed with a further three landowners, bringing the total to eight and the Applicants believe a further two are imminent.</p> <p>BA and HPQC state that the Applicants continue to engage proactively and productively with all affected persons. Negotiations are ongoing and the Applicants expect to conclude all negotiations within the Examination period, minimising the need to seek to rely on the use of compulsory acquisition powers.</p> <p><u>STDC</u></p> <p>In response to submissions on behalf of STDC, HPQC explained that in light of the continuing discussions between the parties, he would deliberately refrain from making detailed submissions about the suitability of the existing access proposed in the DCO along Tees Dock Road. However, he confirmed that the Applicants did not accept that the existing access was in any way unacceptable or unsuitable and reserved the right to make further submissions on those issues, should that become necessary.</p> <p>HPQC explained the proposal to use plots 274 and 279 (Tees Dock Road) for temporary construction traffic and to construct a gate to facilitate that use, replacing the existing low-level gate that the ExA will have seen on its site visit. The need for suitable access for construction purposes was not in dispute with STDC. The proposed access on Tees Dock Road would provide suitable access. However, the Applicants are conscious that STDC would prefer them to use an alternative route via Lackenby Gate. The Applicants have assessed that route and are satisfied that it is acceptable in technical and environmental terms.</p> <p>Protective provisions were added to the dDCO at Deadline 4 to include a ‘lift and shift’ provision. That provides a mechanism by which the alternative route can be used instead of Tees Dock Road provided certain specified conditions are met.</p> <p>The Applicants confirmed that they were engaged in productive discussions with STDC as to the use of the alternative access in preference to Tees Dock Road. On the completion of the relevant agreement, the parties will consider how best to reflect that agreement in the DCO.</p> <p><i>[Post-hearing note: Action 4 is for the Applicants to provide at either Deadline 5 or 6 an update on negotiations regarding Lackenby Gate access issues –The Applicants continue to work with STDC on this issue. There are meetings scheduled between the parties for 3rd and 4th August 2022. The Applicants will provide an update on this issue at Deadline 6.</i></p> <p><u>Redcar Bulk Terminal</u></p> <p>In response to comments made on behalf of Redcar Bulk Terminal (“RBT”) in respect of RBT’s land or apparatus outside the main terminal area, the Applicants confirm that they understand RBT’s views and are in active discussions with them regarding land plots, protective provisions and accommodating RBT’s requests.</p> <p><u>Sembcorp</u></p> <p>In response to Sembcorp’s request for further clarification of the width of the pipeline corridor and duration of the proposed rights over that corridor, the Applicants agreed to provide further written justification at Deadline 5. The Applicants explained that they are in discussions not only with Sembcorp but with other pipeline operators in the corridor and that the width of the pipeline varies according to the type, media, safety and access requirements.</p> <p><i>[Post hearing note: the Applicants’ justification for the corridor width (Action 5) is attached at Appendix 1. The Applicants’ response in relation to the duration of rights sought in relation to the CO₂ Gathering Network (Action 6) is as follows. Sembcorp’s Deadline 4 submission [REP4-036] sets out that the undertaker’s activities during the operational phase are “transient and transitory” and there is no justification provided for seeking permanent rights over land. The Applicants agree that the operational and maintenance activities along the CO₂ Gathering Network are not</i></p>
-----------	--	--

		<p><i>'constant', in the sense that they would not take place all the time or every day. However, they would take place regularly throughout the lifetime of the asset being in place, either through planned checks and maintenance activities or potentially in relation to unplanned maintenance activities which may arise from time to time. Whilst intermittent, their frequency would vary and they would occur throughout the lifetime of the asset. They are not temporary in the same way that some activities will only take place during the construction of the CO₂ Gathering Network - where land is only required for those temporary construction purposes, the Applicants have only sought powers to use the land temporarily. As to the period during which the asset will be in place (and therefore during which maintenance activities will occur), whilst the pipeline has a design life, it may well operate beyond that design life and this will be considered and assessed in the future, taking into account technical, commercial, regulatory and other factors. The CO₂ Gathering Network will be part of a regulated asset, with the undertaker having obligations to emitters to transport their captured CO₂ and which the undertaker will have to continue to meet. The actual operational period is not known at this point, and it is appropriate to seek the acquisition of permanent rights over land to allow for its continued safe operation as required.</i></p> <p><u>PD Teesport</u></p> <p>BA for the Applicants confirms it is agreed that Seal Sands Road is an important access route for a number of businesses in the area.</p> <p><i>[Post-hearing note: the Applicants are continuing to negotiate protective provisions with PD Teesport, including in relation to protections relating to Seal Sands Road.]</i></p>
5.	<p>Item 5</p> <p>Temporary Possession (TP) or Compulsory Acquisition (CA)</p> <ul style="list-style-type: none"> The Applicants are asked to set out the criteria that it used in determining whether to seek the use of TP rather than CA of land and rights; and The Applicants are asked to provide an update on any amendments to use of TP or CA since the start of the Examination. 	<p>HPQC for the Applicants distinguished between two different types of temporary possession power in Article 31. The first, in Article 31(1)(a)(i) allows temporary possession to be taken of the land identified in Schedule 9 (land of which temporary possession may be taken). The second, in Article 31(1)(a)(ii) allows temporary possession to be taken of land subject to compulsory acquisition prior to its permanent acquisition.</p> <p>So far as the first category is concerned, land has been included in the scope of temporary possession powers where the Applicants have determined that they do not require any permanent interest in that land. Once the temporary use has ceased, there is no need for its permanent acquisition. That was the position at CAH1 and remains the position. There has been no change since CAH1 in terms of the extent of temporary possession compared to permanent acquisition.</p> <p>The proposed changes to be submitted at Deadline 6 will reduce the land subject to temporary possession (as identified in Schedule 9).</p>
6.	<p>Item 6</p> <p>Crown Land – Section 135 of the PA2008 (Article 43 of the dDCO)</p> <ul style="list-style-type: none"> The Applicants are asked to provide a brief update on the progress of negotiations with the relevant Crown Authorities and deadline for their conclusion. 	<p>BA for the Applicant provides an update on discussions with the Crown Estate, advising that heads of terms with the Crown have now been concluded and are now with the parties' respective legal teams to review.</p> <p>The Applicant has requested section 135 consent and is waiting to hear from the Crown.</p> <p>The Applicant is optimistic that negotiations with the Crown will be concluded before the end of the Examination.</p>
7.	<p>Item 7</p> <p>Statutory Undertakers' Protective Provisions - Section 127 of the PA2008 (Articles 33 and 41, and Schedule 12 Parts 1 to 3 of the dDCO)</p>	<p>HPQC explained that that Part 1 of Schedule 12 contains protective provision for electricity, gas, water and sewerage undertakers; Part 2 contains protective provisions for operators of electronic communications code networks (caught by section 138 Planning Act 2008 rather than s.127); and Part 3 contained protective provisions for National Grid as electricity and gas undertaker.</p> <p>Part 1 covers MGT Teesside Limited and Whitetower Energy Limited.</p>

	<ul style="list-style-type: none"> The Applicants are asked to confirm the identity of which of the Affected Persons listed in the Book of Reference [REP2-005] are classified as Statutory Undertakers, and to whom Parts 1 to 3 of the dDCO would apply; The Applicants are asked to explain the need for and content of any bespoke Protective Provisions for the aforementioned Statutory Undertakers included in Schedule 12 Part 4 to Part 24 of the dDCO; The Applicants are asked to summarise any outstanding matters arising from representations by such Statutory Undertakers; Any Statutory Undertaker or other relevant body in attendance and wishing to speak in relation to an objection or issue raised that is relevant to the effects of the Proposed Development on its undertaking, apparatus or land will be invited to put oral submissions to the ExA; and The ExA may ask questions of the Statutory Undertaker or other relevant body, and the Applicant, about matters arising from written and oral submissions. 	<p>As to Part 2, no operators of electronic communications code networks are identified in the Book of Reference albeit the Applicants agreed to check that factual position and confirm at Deadline 5 – see the note at Appendix 2 which sets out the position.</p> <p>Part 3 includes Protective Provisions for National Grid Transmission plc and National Grid Gas plc and are based on National Grid’s standard form.</p> <p>Bespoke Protective Provisions are provided for the following statutory undertakers:</p> <p>National Rail Infrastructure Limited – Part 10 of Schedule 12.</p> <p>Northern Powergrid (Northeast) plc and Northern Powergrid Limited – Part 11 of Schedule 12. These are based on the form of protective provisions included in the Drax Power (Generating Stations) Order 2019.</p> <p>PD Teesport Limited – Part 13 of Schedule 12.</p> <p>Northumbrian Water Limited – Part 25 of Schedule 12.</p> <p>Northern Gas Networks – Part 26 of Schedule 12. NGN have not made a representation and so s.127 is not engaged. The Protective Provisions are based on their standard form.</p> <p>In addition, Protective Provisions are included for Teesside Windfarm Limited and EDF Energy Renewables Limited – Part 21 of Schedule 12. EDF Energy Renewables Limited is a statutory undertaker, but does not have an interest in land and Teesside Windfarm is not an electricity undertaker. As such s.127 is not engaged in respect of these entities.</p> <p><i>[Post-hearing note: Action 7 requires the Applicants to provide a list of statutory undertakers and review those covered by Part 2 of Schedule 12 of the draft Development Consent Order – both of these are covered above.]</i></p> <p><i>[Post-hearing note: Further to post-hearing confirmatory work, it has been confirmed that EDF Energy Renewables were included in the Book of Reference on a precautionary basis, but do not have an interest in land affected by the Order Limits. Therefore, EDF ER will be removed from the Book of Reference and removed from Part 21 of Schedule 12 to the draft Development Consent Order]</i></p>
8.	<p>Item 8</p> <p>Review of issues and actions arising</p>	N/A
9.	<p>Item 9</p> <p>Any other business</p>	N/A
10.	<p>Item 10</p> <p>Closure of the Hearing</p>	N/A

APPENDIX 1: JUSTIFICATION OF PIPELINE WIDTHS

Appendix 1: Justification of Pipeline Corridor Widths

- 1.1.1 In response to action 5 from CAH2 and previous representations by interested parties, the Applicants have developed this summary note to provide context and justification for the pipeline corridor widths of the Proposed Development.
- 1.1.2 The note below summarises the approach taken by the Applicants in developing the Order Limits and the area over which new rights are sought. Several cross sections along the pipeline corridor have been included to illustrate the existing land and infrastructure.
- 1.1.3 The Applicants' strategy for the pipeline routing was to utilise existing industrial corridors North and South of the Tees. This provided a practical starting point for developing the Order Limits.
- 1.2 Sembcorp Pipeline Corridor**
- 1.2.1 The pipeline corridor on the North Tees is limited to Work No. 6 only, which is proposed to be located within the existing Sembcorp pipeline corridor. In general, this existing corridor consists of an access track either side of a central piperack(s). The width of the piperacks varies along the route and therefore so does the overall width of the corridor. The pipeline corridor has evolved over a number of decades, providing a common backbone for pipeline apparatus between Billingham and Wilton. At each section of the pipeline corridor new pipelines enter and exit from adjacent facilities. This means that there is no consistent number of pipes or alignments from one end of the corridor to the other. New pipelines need to be installed in available space or on new structures and then often adjust their relative position within the corridor due to existing constraints.
- 1.2.2 Cross sections A-D further below in this section illustrate how the Sembcorp pipeline corridor changes as it passes from Billingham through to Wilton. Along the route, the existing infrastructure changes significantly, and the width, height and number of piperacks is not consistent.
- 1.2.3 Given the early design phase of the project, the Applicants' approach to defining the extent of new rights sought within the Order Limits is illustrated in Figure 1. The new rights extend from close to the outside edge of the existing northern access track to close to the outside edge of the existing southern access track. The Applicants included a strip on the outside edge of each existing access track where required and appropriate. In the event the CO2 Gathering Network pipeline is required to be installed on the 'outside' of the existing piperacks, the Applicants recognise this may potentially reduce the access track width thereby impeding access for the pipeline corridor. To ensure the current access track width is maintained, the Applicants included a strip of land on the outside edge of each existing access track.

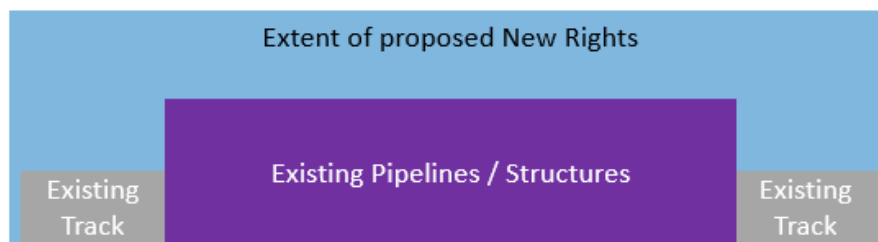

Figure 1 - Illustration of approach for CA - New Rights

- 1.2.4 The extent of the new rights provides the Applicants with sufficient access and clearance to design, construct, maintain and operate the CO₂ Gathering Network pipeline. However, for efficient construction of the new pipeline, additional land has been included solely for temporary possession. In general terms, this additional land is required to support with:
- Material staging and laydown,
 - Parking and operation of construction vehicles,
 - Welfare facilities, and
 - Provide temporary diversions along the pipeline corridor to maintain access for operators with existing apparatus.
- 1.2.5 The above approach will enable the Applicants to construct the pipeline safely and efficiently, while minimising impacts to ongoing operations of interested parties.
- 1.2.6 Given the early stage of engineering definition for the Proposed Development, the Applicants – in close coordination with appropriate interested parties - are continuing with site surveys and FEED in order to consider and then select the optimum routing for the CO₂ Gathering Network pipeline. The pipeline could need to be routed anywhere within the existing pipelines / structures and therefore the Applicants need to maintain the flexibility allowed by the potential acquisition of new rights within the areas shown on the Land Plans. This ensures the Applicants can design and then install the pipeline in the optimum position and will benefit from continued operational access along the northern or southern access tracks as required. As the design develops and the routing is finalised the actual area over which new rights are acquired can be refined.
- 1.2.7 The existing apparatus within the Sembcorp pipeline corridor have been installed over a number of decades. The routing of each pipeline installed within the corridor has been selected based on available space and existing access/inspection requirements. Work No. 6 is a pipeline of up to 550mm in diameter and therefore it is unlikely that a 'simple' routing option is available considering the existing apparatus. To ensure deliverability of Work No. 6 and the Proposed Development, the Applicants require new rights for the full width of the existing pipeline corridor and associated access tracks.
- 1.2.8 The flexibility with the rights sought enable the Applicants to select a route that accommodates existing physical apparatus and maintain operational rights of

existing users. Following pre-FEED site surveys and feedback from existing users as part of the initial design development, the Applicants expect the pipeline to cross between opposing piperacks, eg the North and South piperacks, and vice versa. There are existing pipelines in the corridor that are routed in this way. Without the inclusion of the full extent of the existing pipeline corridor, the Applicants would be restricted to selecting a route before adequate site assessment and engineering has been completed. Until engineering has reached an appropriate level of maturity there is an enduring risk that a proposed pipeline route has to be modified. The level of modification can vary, depending on the challenge that arises. For example, stress calculations during detailed design could cause a rerouting of a section of the pipeline route. Following the selection of a proposed pipeline route for Work No. 6, during detailed design the Applicants' engineering contractor will conduct calculations. These will determine whether the pipeline can be adequately supported, flex as it expands and contracts, and be fabricated. An outcome of this could require the Applicants to adjust a section of the proposed routing. The scope and scale of the modification is dependent on the risk, but a potential consequence could be the Applicants needing to adjust the route significantly, such as switching to the opposing piperack.

- 1.2.9 It is also possible that other works will take place within the corridor before the Applicants complete detailed design and construct the Proposed Development – whilst the Applicants are not aware of any significant new apparatus proposed in the corridor, changes in the infrastructure present remain a possibility and the flexibility sought will enable the Applicants to take account of these and adapt the detailed design as necessary.
- 1.2.10 It is therefore justified for the Applicants to seek rights which ensure the deliverability of the Proposed Development.
- 1.2.11 The following cross sections have been developed to illustrate the extent of the Order Limits for the Proposed Development and the existing infrastructure and constraints of the pipeline corridor.

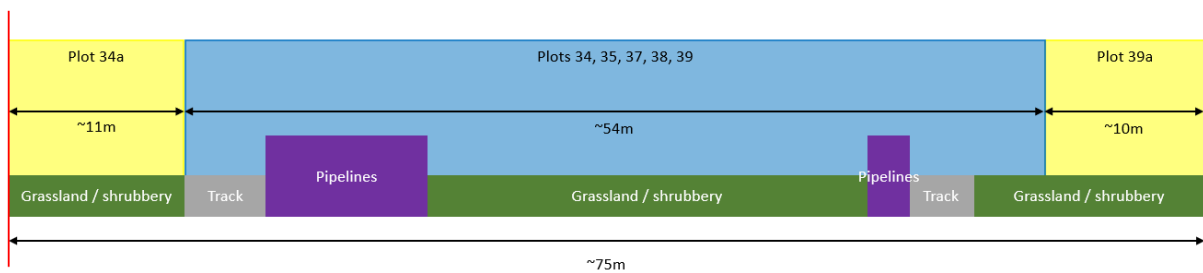

Key

 Order Limit	 Order Land – Temporary Possession	 Existing Pipelines / Structures	 Grassland / shrubbery
 Proposed Order Limit at Deadline 6	 Order Land – New Rights	 Existing Access Tracks	

Cross Section A (Work No. 6) – Sembcorp Corridor near Cowpen Bewley Rd (Looking NE)

Cross Section of existing land and infrastructure

Cross Section D (Work No. 6) – Sembcorp Corridor parallel to Dabholm Gut (Looking SE)

Extract of Land Plans (Document Ref 4.2) Sheet 5

Cross Section of existing land and infrastructure

1.3 Anglo American Corridor

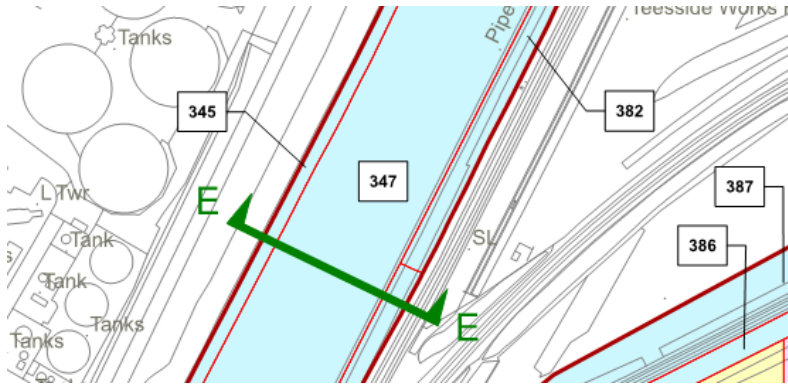

- 1.3.1 The 'Anglo American corridor' is an area of land the freehold of which is held by Anglo American. It runs in a North – South direction parallel to the NWL Bran Sands WwTP. It consists of plots 332, 343, 345, 347 and 384
- 1.3.2 The Proposed Development requires the routing of up to four pipelines within the Anglo American corridor, these are Work Nos. 2a, 5c and 6. Work No. 2a will be a buried natural gas pipeline, as it will be transporting natural gas at pressure the associated easement will be significantly wider than just the pipeline to account for constructability, maintenance and process safety factors. The Applicants have based the easement, and therefore new rights, on the Institution of Gas Engineers & Managers (IGEM) standard:
- IGEM/TD/13 Edition 2 – Pressure regulating installations for natural gas, liquefied petroleum gas (LPG) and LPG/air
 - Paragraph 4.2.1.3 Land rights and easements
 - The rights acquired should be such as to permit the satisfactory construction, use, maintenance and replacement of the pipeline and should last for at least the anticipated life of the pipeline/associated installation or the gas supply agreement.
 - Of special concern are the access rights of the pipeline easement, which should anticipate the needs of construction, remedial works to the land following construction and subsequent remedial works to, or replacement of, the pipeline, including consideration of storage and parking facilities on land contiguous to and neighbouring the pipeline.
- 1.3.3 The above guidelines have been considered when developing the proposed easement for Work No. 2a (as part of the works within the Anglo American corridor) and further engineering assessment is required, including a Quantitative Risk Assessment, to determine exclusion distances in the event of a rupture before a final easement width can be confirmed.
- 1.3.4 Work No. 2a requires a wider area of Order Land in comparison to installing an above ground pipeline within existing infrastructure. When establishing the route, associated easement and extent of rights sought, the Applicants have had to consider factors including the following, in order to ensure that the Proposed Development is deliverable:
- Widths to safely excavate the open cut trench (for installation and any subsequent repairs and maintenance). In general, sloped shoring of open cut trenches are at 45 degrees. Therefore, a 2m deep, 3m wide trench would require 2m of shoring on either side, totalling 7m. This excludes the additional area that would be required for safe access to the trench and staging/lifting of pipe spools. Pending detailed design, these areas/widths could need to be anywhere within the STDC corridor.

- Construction clearances required at the entry and exit points to safely execute trenchless crossings,
 - Installation of supports for a dedicated aboveground pipeline corridor,
 - Separation distances between pipelines for external inspection,
 - Exclusion distances between the access routes/tracks and the underground high pressure gas pipeline (Work No. 2a). Process safety restrictions would prevent the Applicants from routing the main access track above or close to the buried pipeline in order to create segregation between operating personnel and the pipeline in the event it ruptures.
 - Ongoing access requirements for maintenance and operation. Due to the number of services to be installed in this corridor as part of the Proposed Development, the Applicants have considered the requirement for vehicle access on both sides of the corridor. This is required as a number of the services will be installed on aboveground supports and this would prevent vehicle access from one side to the other.
- 1.3.5 Work No. 2a will have to cross the CATS pipeline within this area and in order to optimise this crossing during the design process the Applicants require flexibility with key aspects of the Order Limits in order to safely deliver this Work No.
- 1.3.6 The width of the corridor is based on the existing access track to the West and the existing aboveground pipeline corridor to the East. The Applicants expect to route the aboveground pipelines (Work Nos. 5c & 6) adjacent to the existing pipeline corridor in order to minimise sterilisation of land in recognition of comments from interested parties. This defines the outer edge of the new rights sought.
- 1.3.7 In addition to the existing infrastructure and apparatus within this part of the Order Land, there is also Anglo American's DCO (York Potash Harbour Facilities Order 2016) which identifies this corridor as a route for a conveyor. The width of the new rights sought will provide the Applicants with the required flexibility so that the Proposed Development can be constructed, operated and co-exist with the development to be carried out pursuant to the York Potash Harbour Facilities Order.
- 1.3.8 Given the nature of this section of the Order Land, the Applicants expect to maintain and operate the pipelines similar to the operators with existing apparatus. There is no existing access track running parallel to the existing aboveground pipeline corridor, instead temporary access routes would be established for construction and then subsequently during intermittent activities during operation. Whilst those maintenance and access activities are temporary on each occasion, the rights to carry them out are required on an ongoing (permanent) basis.
- 1.3.9 The following cross section has been developed to illustrate the extent of the Order Limits for the Proposed Development and the existing infrastructure and constraints of the pipeline corridor. It does not identify the location of the proposed Anglo American conveyor (referenced above) which would be installed in addition to existing apparatus.

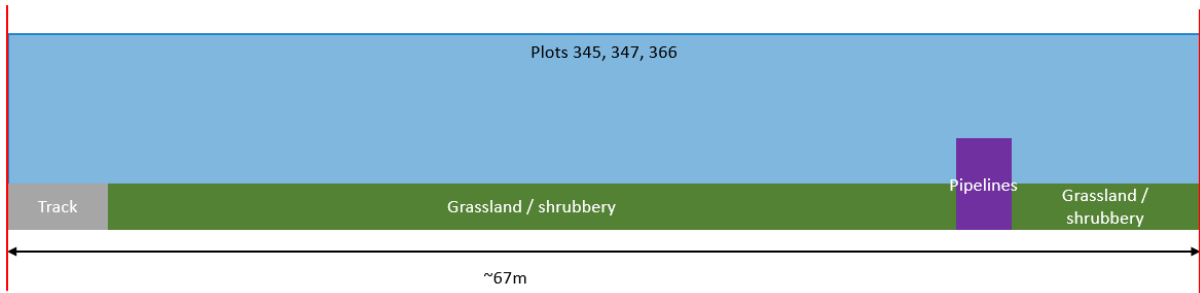

Key

 Order Limit	 Order Land – Temporary Possession	 Existing Pipelines / Structures	 Grassland / shrubbery
 Proposed Order Limit at Deadline 6	 Order Land – New Rights	 Existing Access Tracks	

Cross Section E (Work No. 6) – Anglo American Corridor (Looking NE)

Extract of Land Plans (Document Ref 4.2) Sheet 13

Cross Section of existing land and infrastructure

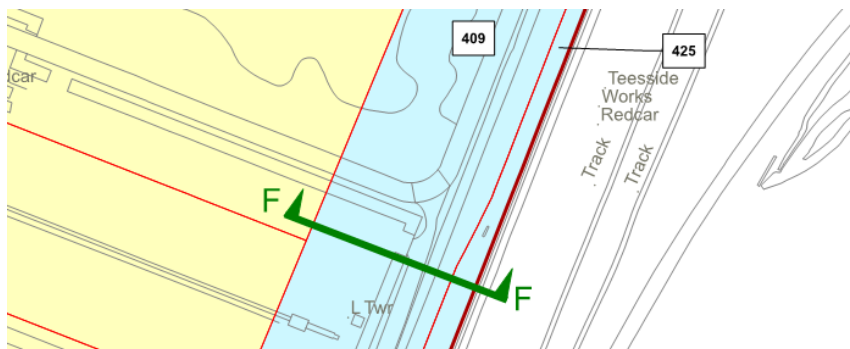

1.4 STDC Corridor

- 1.4.1 The STDC corridor is an area of land the freehold of which is controlled by STDC that connects the PCC site with the Anglo American corridor. It runs adjacent to the Eastern edge of Work No. 9A until it reaches the existing “Blue Main” Teesworks estate road and crosses existing private railway tracks. Broadly, the main corridor consists of plot 395, 401, 408 and 409.
- 1.4.2 The Proposed Development requires the routing of up to four pipelines within the STDC corridor (Work Nos. 2a, 5c, 6) and a cable (Work No. 3a). There is not an existing easement corridor along the proposed route within the Teesworks site. Therefore, in developing the Order Limits and outline design for the corridor the Applicants have had to consider construction and operational access requirements. From the PCC site (Works Nos. 1 and 7) to the existing Blue Main estate road, the Applicants will have a common utility corridor for all proposed services listed above.
- 1.4.3 As outlined in section 1.2 above, there are unique considerations for buried infrastructure. Within the STDC corridor, these will apply to Work No. 2a and Work No. 3a and are not repeated here.
- 1.4.4 The width of the new rights sought will provide the Applicants with the required flexibility so that the Proposed Development can be designed and constructed within the existing constraints of the Teesworks site. The Applicants require flexibility to enable optimisation during detailed design to adjust where challenges arise and potentially to adapt the detailed design or siting so as to reduce the sterilisation of land. The following cross section has been developed to illustrate the extent of the Order Limits for the Proposed Development and the existing infrastructure and constraints of the pipeline corridor.

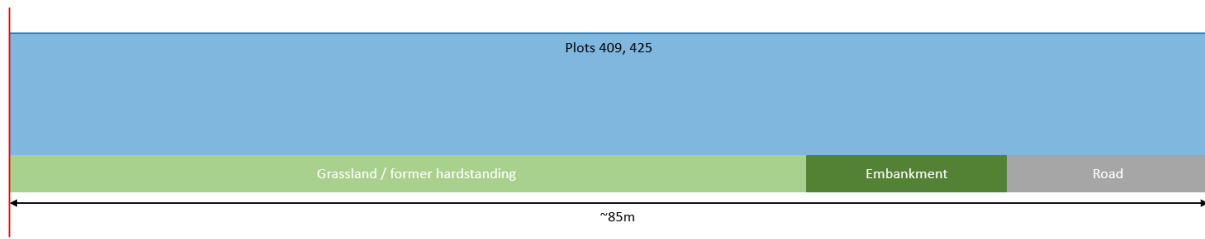

Key

	Order Limit		Order Land – Temporary Possession		Existing Pipelines / Structures		Grassland / shrubbery
	Proposed Order Limit at Deadline 6		Order Land – New Rights		Existing Access Tracks

Cross Section of existing land and infrastructure

APPENDIX 2: ELECTRONIC COMMUNICATIONS CODE OPERATORS NOTE

NET ZERO TEESSIDE DCO APPLICATION
ELECTRONIC COMMUNICATIONS CODE OPERATORS

1. INTRODUCTION AND SUMMARY

1.1 As noted at CAH2 the Book of Reference [REP4-005] submitted at Deadline 4 does not include any electronic communications code operators, to whom Part 2 of Schedule 12 to the Draft DCO [REP4-002] would apply. The Applicants have reviewed the position and confirmed that the following may have apparatus within the Order limits:

1.1.1 British Telecommunications plc

1.1.2 Vodafone Limited

1.1.3 Cornerstone Telecommunications Infrastructure Limited

1.1.4 Telefonica O2 UK Limited

1.2 For the reasons explained further below the Applicants have some information on where their apparatus may be located, but the information is not complete. The Applicants have not at this stage updated the Book of Reference pending receipt of further information.

1.3 The Applicants do not consider that the relevant operators have been prejudiced by not having been listed in the Book of Reference. In particular, each of the above operators was aware of the DCO Application and its acceptance/ examination, either through receipt of a copy of a Section 56 notice (notwithstanding that they were not listed in the Book of Reference), and/or through contact from the Applicants. The Applicants have also prior to Deadline 5 written to the relevant operators to draw their attention to the ongoing examination, and to provide contact details of both the Applicants and the Planning Inspectorate, should the operators now wish to take part.

1.4 Part 2 of Schedule 12 to the Draft DCO [REP4-002] will apply to protect any electronic communication code operators who do have apparatus within the Order limits now or who may do in the future.

2. POSITION IN RELATION TO SPECIFIC OPERATORS

2.1 BT Telecommunications plc

2.1.1 BT Telecommunications plc ("BT") has been consulted throughout the pre-application process. On 9 June 2020 it was issued a Request for Information ("RFI") to provide information relating to its potentially affected apparatus, however no response was received.

2.1.2 BT was also consulted as part of the statutory consultation process pursuant to section 42, firstly on 7 July 2020. Secondly, following the refinement of the Order Limits, BT was consulted again as part of the s.42 update consultation, on 8 December 2020. However, again, no response was received.

2.1.3 BT was sent a copy of the Applicants' s.56 notice on 25 October 2021.

2.2 Vodafone Limited

2.2.1 Vodafone Limited ("Vodafone") has been consulted through the pre-application process. Vodafone was issued a RFI on 9 June 2020 seeking information regarding their potentially

affected apparatus, to which they responded on 9th August 2020 providing mapping information.

- 2.2.2 Vodafone was consulted as part of the statutory consultation process, firstly on 7 July 2020 under s.42. Vodafone was also consulted as part of the s. 42 update consultation, on 8 December 2020. Vodafone were sent a copy of the Applicants' S.56 notice, on 25 October 2021.
- 2.2.3 Vodafone responded to the 8 December 2020 consultation letter through their agent, Cluttons, via email on 22 December 2020. The Applicants responded on 6 January 2021 and on 9 March 2021 providing a map of the proposed development site and draft works plans, asking for confirmation of their sites and interests potentially affected. The Applicants have no record of a response being received to their 9 March 2021 letter.
- 2.2.4 The mapping information received from Vodafone in response to the RFI suggested that Vodafone had apparatus within the consultation red line boundary, but that it did not have apparatus within the Order limits included within the DCO Application (which were reduced in various areas compared to those within the consultation red line boundary).
- 2.2.5 As there was apparatus potentially affected, draft protective provisions were issued to Cluttons in April 2021 and the Applicants have followed up since that date to seek comments. On 16 December 2021 Cluttons responded to state they were clarifying instructions, however no substantive response was received. On 19 April 2022 the Applicants provided a link to the Examination Rule 6 letter [PD-009] and inviting Vodafone to enter into a Statement of Common Ground ("SoCG"). On 16 May 2022 the Applicants provided a draft SoCG. No response has been received from Cluttons regarding the SoCG or substantive comments on the draft protective provisions.
- 2.2.6 The Applicants have not received any information to confirm whether Vodafone has any assets or interests within the Order limits and if so where they are.

2.3 **Cornerstone Telecommunications Infrastructure Limited**

- 2.3.1 Cornerstone Telecommunications Infrastructure Limited ("Cornerstone") has been consulted through the pre-application process. Similar to Vodafone, Cornerstone were consulted on 7 July 2020 under s. 42 and on 8 December 2020 as part of the s. 42 update consultation. Cornerstone were also issued a RFI on 9 June 2020 seeking information regarding their potentially affected apparatus, however no response to the RFI was received.
- 2.3.2 Cornerstone responded to the 8 December 2020 consultation letter through their agent, Cluttons, via email on 22 December 2020. The Applicants responded on 6 January 2021 and on 9 March 2021 providing a map of the proposed development site and draft works plans, asking for confirmation of their sites and interests potentially affected. The Applicants have no record of a response being received to their 9 March 2021 letter.
- 2.3.3 As there was apparatus potentially affected, draft protective provisions were issued to Cluttons in April 2021 and the Applicants have followed up since that date to seek comments. On 16 December 2021 Cluttons responded to state they were clarifying instructions, however no substantive response was received. On 19 April 2022 the Applicants provided a link to the Examination Rule 6 letter [PD-009] and inviting Cornerstone to enter into a Statement of Common Ground ("SoCG"). On 16 May 2022 the Applicants provided a draft SoCG. No response has been received from Cluttons regarding the SoCG or substantive comments on the draft protective provisions.
- 2.3.4 The Applicants identified one land interest as part of their investigations, a leasehold interest that was located within the consultation red line boundary but which is not within

the Order Limits. Therefore the Applicants are not aware of any assets or interests of Cornerstone's within the Order Limits, and if it does have any, where they are located, and as such Cornerstone is not listed in the Book of Reference.

2.4 **Telefonica**

- 2.4.1 Telefonica O2 UK Limited ("Telefonica") has been consulted through the pre-application process. Telefonica was issued a RFI on 9 June 2020 seeking information regarding their potentially affected apparatus. Telefonica responded via their agents, Cluttons, on 16 July 2020, requesting further details of the draft Order Limits. Those details were provided by the Applicants on 20 July 2020, however the Applicants have no record of a further response being received from Cluttons or Telefonica.
- 2.4.2 Telefonica were further consulted as part of the statutory consultation process, firstly on 7 July 2020 under s. 42 and secondly as part of the s. 42 update consultation, on 8 December 2020.
- 2.4.3 Cluttons responded to that consultation via email on 22 December 2020. The Applicants responded on 6 January 2021 and on 9 March 2021 providing a map of the proposed development site and draft works plans, asking for Telefonica to confirm their sites and interests potentially affected. The Applicants have no record of a response being received to their 9 March 2021 letter.
- 2.4.4 As there was apparatus potentially affected, draft protective provisions were issued to Cluttons in April 2021 and the Applicants have followed up since that date to seek comments. On 16 December 2021 Cluttons responded to state they were clarifying instructions, however no substantive response was received. On 19 April 2022 the Applicants provided a link to the Examination Rule 6 letter [PD-009] and inviting Telefonica to enter into a Statement of Common Ground ("SoCG"). On 16 May 2022 the Applicants provided a draft SoCG. No response has been received from Cluttons regarding the SoCG or substantive comments on the draft protective provisions.

2.5 **Others Potential Operators**

- 2.5.1 Based on the Applicants' diligent inquiry, there are no other telecommunications code operators with assets or interests affected by the proposed development. As part of the Applicant's pre-application land referencing, it issued RFIs to a number of telecommunications code operators (see Appendix 2A) and conducted a 'LineSearch' enquiry which searches across a number of apparatus operators. In addition, as part of a precautionary approach, the Applicants issued copies of its s.56 notice to a number of statutory undertakers and telecommunications code operators (please see Appendix 2B) notwithstanding that these parties were not included in the Book of Reference and did not, as far as the Applicants were aware, have any apparatus within the Order Limits.
- 2.5.2 The Applicants' land referencing consultants conducted a search of registered land interests, and no additional registered interests belonging to telecommunications code operators were identified.
- 2.5.3 None of these searches or consultation notices revealed additional assets or interests within the Order Limits. Accordingly, the Applicants are not aware of any other telecommunications code operators that require to be included in the Book or Reference.

3. **Next Steps**

- 3.1 The Applicants are working to confirm whether the companies listed at paragraph 1.1 above have any assets or interests within the Order Limits. The Applicants expect to be able to update the

Examining Authority at Deadline 6, including whether any changes to the Book of Reference will be required.

NET ZERO TEESSIDE DCO APPLICATION

ELECTRONIC COMMUNICATIONS CODE OPERATORS

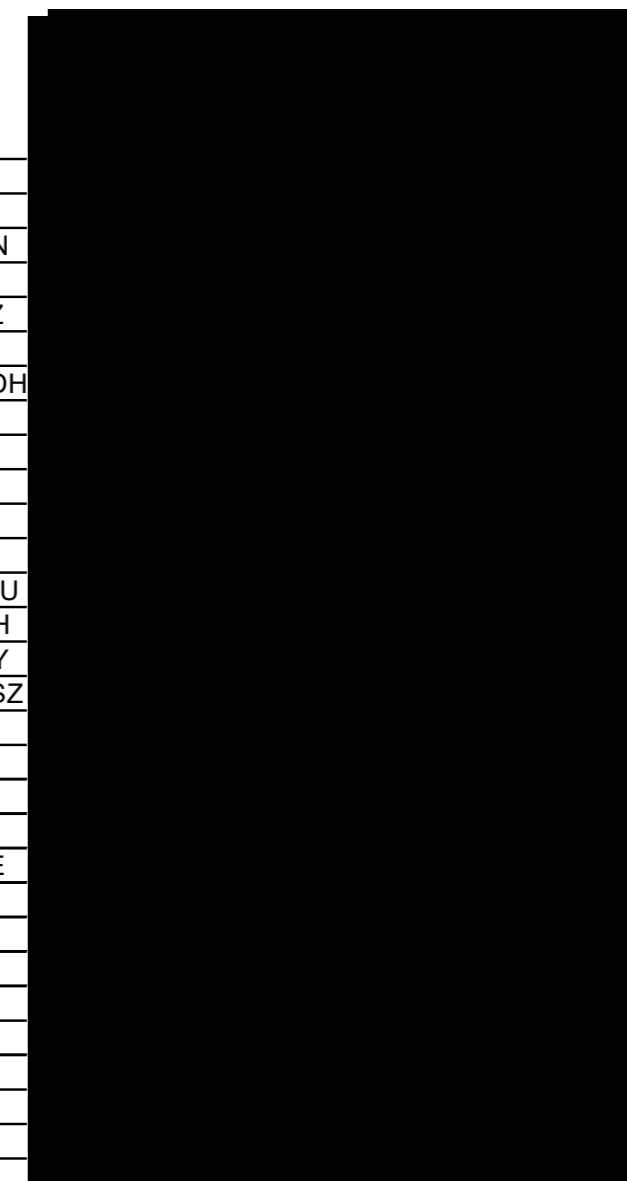

APPENDIX 2A – LIST OF CODE OPERATORS ISSUED A REQUEST FOR INFORMATION ('RFI')

1. Airwave Solutions Limited
2. British Telecommunications plc
3. Cable & Wireless Carrier Limited
4. CityFibre Holdings Limited
5. Colt Technology Services Group Limited
6. Easynet Limited
7. Everything Everywhere Limited
8. Geo Networks Limited
9. GTT Communications
10. Hutchison 3G UK Limited
11. Instalcom UK Limited
12. Level 3 Communications
13. Mobile Broadband Network Limited
14. Reach Active Limited
15. Redcentric plc
16. Sky Telecommunications Services Limited
17. Telefonica 02 UK Limited
18. Virgin Media Limited
19. Gamma Telecom Limited
20. Verizon UK Limited
21. Vodafone Limited

APPENDIX 2B STATUTORY UNDERTAKERS AND TELECOMMUNICATIONS CODE OPERATORS

Name	Organisation Name	Address line 1	Address line 2	Address line 3	Address line 4	Address line 5	Postcode	Email or Post?	
Mr Dave Adams (MHPD)	NSIP Consultations	Building 2.2, Redgrave Court	Merton Road	Boole		Mereside	L20 7HS	Post and Email	
The Chief Executive	Health and Safety Executive	Redgrave Court	Merton Road	Boole		Mereside	L20 7HS	Post and Email
