

Section 1 - About you and anyone you may be representing

Please tick the option which best describes why you are completing this form and then fill in the corresponding address block.

Tick and fill in **one option only**. Only one person or organisation can become an *Interested Party* per form. Each *Interested Party* must be registered with their own form.

I am completing this form for myself to give my own personal views.

Title: MRS First name: [REDACTED]
Last name: [REDACTED]
Address Line 1: [REDACTED]
Address Line 2: [REDACTED]
Address Line 3: [REDACTED]
Town/City: [REDACTED] Postcode: [REDACTED]
Email: _____
Tel: [REDACTED]

I am completing this form for the organisation I work for, either on a paid or voluntary basis, to give its views.

Title: _____ First name: _____
Last name: _____
Job title: _____
Organisation name: _____
Address Line 1: _____
Address Line 2: _____
Address Line 3: _____
Town/City: _____ Postcode: _____
Email: _____
Tel: _____

Before completing your own personal details or those of another person or organisation, please ensure that you read our **Privacy Notice**, attached, so that you are aware of how this data will be stored and used.

Please be aware that you **must** complete one of the address block fields for your Representation to be valid.

Section 2 – Your Representation

Here you should summarise the aspects of the *application* you agree and/ or disagree with and say why. Outline what information, local knowledge or evidence you have which supports this. Please aim to limit this section to no more than 500 words (please use extra paper if needed).

I would want to build a 2,500 acre solar and battery plant around the villages where I live. I wish to object strongly to this as it would greatly affect my life. One of the sites is right next to my village and very very near to my house, I walk to take exercise here and this facility will be taken away. There for I will have to drive, which will add to my carbon footprint. The countryside and the tranquility which is my reason for living here will be lost for generations. This is causing me a great deal of stress. The wildlife habitat for hundreds of species would be lost if this good quality irrigated vegetable growing farmland, ^{green} would take the greenfield. The battery & energy storage sites is another worry, if one of these batteries catches fire, which has happened P.T.O.

Please check that you have completed all relevant sections, otherwise you may not be able to take part in the later stages of the *Examination*.

Please sign your form and give today's date, below:

Signature _____

Date

10.3.2022

The Planning Act 2008 process is primarily a written *Examination* process and if you are registered as an *Interested Party* you will have an opportunity, later in the *Examination* process, to provide a more detailed *Written Representation*.

You cannot reserve a right to make a *Representation* later without providing a summary of the points you intend to submit at this stage.

Your *Representation* should take the form of a summary of what you agree with and/ or disagree within the *application*, and any impacts you think it would have.

Please note that your *Representation* **must not** include material that is:

- vexatious or frivolous;
- about compensation for Compulsory Acquisition of land or of any *interest* in or right over land; or
- about the merits of policy set out in a National Policy Statement.

The information you include in the *Representation* section of this form will be used by the *Examining Authority* to carry out its *Initial Assessment of Principle Issues* and to decide the best way to examine the *application*.

the poisonous gases would be released in an amount to 77 acres.

Traffic and noise is a major concern, as the vehicles would pass the front of my house as I am near to ~~the~~ where the main roads from all directions leave the main arteries. The transport of goods would be 'intolerable' panels, cables, fencing, (concrete for 100 acres) The cable to the substation would pass near the village, causing huge disruption. My financial security would be removed as the value of my property built up over a life time would be dissipated, and any hope of helping my family lost.

The infrastructure is not set up to support this solar farm. When it rains the road outside my house is flooded halfway across the carriage way, as the drains can't cope.

The road close by where the traffic would pass is a single lane outside a stud which rears horses, congestion would be awful.

I do think about my carbon footprint and from what I read this scheme would create more carbon in its lifetime than it would save.

Please help.
