Subject: ENO10106 Ref 20030290

to who it concerns

as an interested party i am in favour of an extension to the timetable for this application, HOWEVER i am not in favour of how quickly Sunnica wish to push this through, the changes to their original proposal constitute a major change and i am very concerned that this is a tactic by sunnica to get these changes done without due consultation.

i am concerned that Sunnica did not foresee that the original plan for the storage/connection facilities were

to small, and worry that they may have missed more serious problems, and would ask that this application

be put on hold until a new thorough investigation has been completed
