Ref SUNN-003

I would like to endorse the proposal that the plans should be delayed in order for there to be time for all interested parties to examine the new arrangements and draw up meaningful and well considered points.

This requires the whole timescale to be adjusted and July is not the ideal time for starting the process as I as many others will have different priorities during the summer holiday period. September would allow for all parties to have time to dedicate to the new proposals.

The problems with the Burwell Station should have been discovered at the earliest stages of Sunnica scheme and that they were not indicates how ill thought through the whole development was in its' inception.

Altogether, I am beginning to feel that Sunnica should withdraw its' original plans which have been so frequently amended that it is becoming hard to know exactly what is proposed and for them to resubmit the whole scheme when they have something which is workable in its entirety.
