Unique Ref No: 20030061

I am objecting to the delay requested by SUNNICA in respect of the preliminary meeting, and their timetable for amendments.

They have had three years to consult with stakeholders and have failed to do so with the National Grid, National Rail and relevant Water Authority - had they done so there would be no need for a delay.

Their proposal for creating a new Option 3 is completely unrealistic, given their performance to date.
