Subject: Changes to the plans
Date: 16 May 2022 13:54:21

On behalf of myself and my next door neighbour [REDACTED] we are further concerned that Sunnica have failed to check the basic but vital part of their application i.e. the connection to the national grid. We object to the tight timescale they request as it doesn't allow us sufficient time to understand the implications of the changes, and request their planning application be rejected. In view of their major error in not obtaining this information prior to submitting their application, we have no confidence that they are to be trusted. The 10 metre sub stations will be a blot on the landscape and on green belt land as well. In view of the economic changes that we are currently experiencing surely it is more important to keep this land as farming land and not taken over as a short term intermittent supply of electricity.

yours faithfully
Mr Joseph Pattison
