---

Thank you for your update on 8<sup>th</sup> May 2022.

Being a resident of Isleham and following Sunnica's application process for their project. I am strongly against another delay by Sunnica. Not being an engineer I would have thought it obvious to establish very early on in the process whether Burwell site was large enough to cope with their plans. What else have they overlooked?

I'm not against another Solar Farm in the area but more consideration should be taken into the scale and the use of land in the area.

Kind regards

Philip Davis
