We still await answers to specific questions relating to this development especially in relation to provision of improved infrastructure.

Also there are rumours that Exning in West Suffolk will be used as the transport link to the development and that all delivery of materials and disposal of spoil from the site will be transported through the village. We all need to see that proposed route for these heavy lorries and these routes should not be through local villages but confined to major transport routes.

Terry Wood

Chairman Exning Parish Council
