Subject: PINS Comments - Sunnica scheme change
Date: 10 May 2022 10:22:16

Good Morning,

Sunnica's two point delay request indicate they do not have a grasp on the project and its application.

They have no consideration for the local communities and the impact on the local landscape, wildlife, noise, traffic, archaeology, heritage etc.

The scheme is not commercial feasible and from a safety perspective is a risk to life, which could result in rural disaster on a mass scale when the batteries & station explode.

I object to both requests from Sunnica as they have not publish who will undertake the consultation and how it will be done.

The requests to delay will reoccur, and Sunnica need to come back to the table with a full proposal once they have factored in all details, contingency etc.

Many Thanks, Tony
