Subject: Request for opinions on preliminary meeting delay, and proposed new timetable
Date: 07 May 2022 11:30:17

Dear Mr Kean, and colleagues,

Thank you for requesting my opinion about delays to the preliminary meeting for the Sunnica application, and the proposed new timetable, in your email notification of the 4th May 2022.

My principal concern is noise pollution from the Burwell substation connection, as measured at Murton Close/Hythe Close/Hythe Lane, and that the changes to construction plans and meeting dates do not affect due consideration of the noise profile of what, if anything, is ultimately built.

As I understand the applicant's response to question 2, section 3.7, there should be no additional adverse noise as a result of using substation location option 3, subject to their confirmation. If they provide the adequate expected documentation, in the Environmental Confirmatory Statement, that this is the case, despite the higher voltage circuit, then I have no objection to the delay of the meeting, or to the proposed new timetable. Similarly, I have no objection to the delays providing the applicant provides and circulates an accurate modified noise assessment on an adequate timescale for your perusal.

Kind Regards
Roger Osborn
