**Subject:** Sunnica - extension of time: your ref EN010106  
**Date:** 18 May 2022 20:02:52

---

I am writing in response to the request of Sunnica to be granted an extension of time with regard to their application

I consider that the request be refused and that Sunnica not be allowed to continue with the present application and shall not be required to resubmit an application until:

1. They have secured an agreement with the National Grid for the connection to the Burwell Substation - it is laughably incompetent that at this late stage of the application there is no agreement in place for any of the options promulgated by Sunnica
2. They have a definite option for their installation that can be understood by all of the interested parties and that will not be amended
3. They have produced clear plans showing exactly where their cabling/solar panels/batteries are to be installed and erected and such plans to be specific as to siting of all equipment - we have suffered with trying to understand plans which seem to be deliberately ill defined throughout the process
4. They have carried a full and frank consultation again with all interested parties such consultation by way of public meetings and forums at times when all interested parties can take part something which has been woefully lacking throughout

Thank you

Andrew Geddes
