**Subject:** Re: Updates for Sunnica Energy Farm

So yet again Sunnica have FAILED to engage, not only with the affected residents but now with The National Grid! Yet again, they want to delay the process.

No the Preliminary Meeting should not be delayed. It should go ahead and confirm the incompetency of this company and thrown out.

The Applicants proposed timetable is ludicrous and predudice. Its taken 3 years to get this far, how can Interested Parties review Sunnicas new Options on site West, in fact, exactly where is their new proposal going to be on the site exactly. How can anybody make an opinion on the lack of information we have.

It is highly likely, If the delay goes ahead, that the Preliminary Meeting will be during the school holidays, when it will be the most difficult time for Interested Parties to attend. Holidays already booked and children to look after. This is very bias. Timetable needs to be reviewed or Sunnica needs to withdraw their proposal and start again this time with a proper Consultation, which they failed to do previously.
