Subject: Response in regards Sunnica's proposed delay in timetable
Date: 18 May 2022 23:08:25

To whom it may concern at PINS,
I am a resident in Isleham, Cambs and want to register my objection to the new proposed timetable. It seems that the proposed changes to the DCO application are significant and therefore documents will need to be altered and thorough process undertaken-which means a longer delay is needed to ensure residents have access to full details of changes and new impact assessments and DCO application documents are completed. The suggested timetable does not seem to be sufficiently long enough to achieve this- by starting in mid-July it also prejudices a lot of residents who will be going away at that time or who have extra childcare responsibilities so life gets even busier! If a fair timetable cannot be agreed then the application should be resubmitted at a later date once Sunnica has got their plans back in order again.

Best wishes,
Rebecca Norbury
