Sunnica have requested an extension and are wanting to make significant changes to the project. An extension in time should be allowed for residents to research and understand the new proposals and the impact that these changes will have.

Residents have to abide by all the given deadlines and are not granted any extensions in time, it is wholly unfair to permit Sunnica an extension whilst they investigate major changes. The planning application should commence from the beginning with the correct information in place to allow better judgment and evaluation of the proposal.
