Subject: New Proposal by SUNNICA
Date: 18 May 2022 22:41:42

Dear Sirs, I strongly object to this late deferment by SUNNICA. They have had plenty of time to discuss and arrange all this before now. It shows the inadequacy of them to come up with this at this late stage. One month is not sufficient for us to study all the details of this new proposal and it only adds to the mental anguish that this huge Solar Farm has had to our selves and the Community. I strongly believe that in the global sense of where we are regarding the production of food for our country it is absolutely ludicrous to be tearing up 2,500 acres of good productive land which at present is abundant with crops that are going to help this county's needs for food now and in the years to follow. In the Doomsday book, Badlingham (my Hamlet), Worlington and Freckenham are listed as 'Settlements' places where people settled because they had access to water, could raise animals for food, grow crops to feed themselves. Almost 10,000 YEARS and these villages still exist doing much the same, we have pigs, cattle, sheep still occupying this very same land and still growing sustainable crops to feed us. I believe we have a right to continue to do so and not loose out to a private company who only want to make a profit ! I would like to see it thrown out as of now. Regards, John James
