For The Attention Of Graheme Kean

In response to the two matters specifically.

First. Due to the immense complexity of the application and now the proposed amendment I call upon you and The Planning Inspectorate to ensure all relevant facts are taken into consideration before granting any extension to the timeline. I do not think that the changes requested by the Applicant be deemed fair as they appear to be matters that were already known to the Applicant prior to submitting their request for a Development Consent Order. Their approach is shambolic and I have grave concerns as Sunnica do not seem to be abreast of some of the most critical elements of their own application.

Second. Any timeline needs to take into consideration the amount of information submitted by Sunnica and the amount of time granted to assess that information, is proportionate and fair and does not prejudice the those who have the right to respond.

Thank you

Peter
