To whom it may concern,

Sunnica have been challenged at every stage of their DCO application, which has raises red flag's for everyone involved in this process. It's beyond me that they haven't been asked to resubmit their consultation to the local communities and county councils, such as myself. What is the reason for the preliminary meeting? They're not prepared with fabricated ideas and incomplete information of what they actually plan to achieve – something that's not carbon-neutral and totally life-changing for the local community.

I sincerely hope you'll listen to this heartfelt email.

Fergus
