**Subject:** Applicant's Request for an Extension to the timetable  
**Date:** 18 May 2022 21:36:36

---

Dear Inspectors,

I do not believe that Sunnica should be granted an extension or indeed be allowed to make such significant changes at this juncture, it appears they have missed an essential element of their proposal and are desperately trying to pull something together without much thought.

This is unfortunately typical of what the locality has been suffering for over two years, to allow this to continue even longer is wholly unfair on the thousands of worried residents in the area.

The mere fact that they do not have a plan for connecting the scheme to the national grid is unfathomable.

However if they are permitted to make the changes requested, the proposed timetable extension is not nearly long enough, it does not allow for proper scrutiny and due consideration of the impacts of option 3.

If such significant changes are allowed, they should be made to go back to the beginning in terms of consultation.

Kind regards  
Lisa Bowman.
