This is my response.

A. Whether the Preliminary Meeting should be delayed until Mid-July 2022
This delay comes across as another underhanded tactic which seems to have been prevalent since the beginning, either that or they really have failed to competently plan such a large scale development. Therefore I feel NO DELAY should be granted.

B. The Applicant's proposed timetable to consult further on amendments intended to form the formal Change Request to be made to the ExA

I find it difficult to understand how Sunnica have progressed this far through the planing process and failed to negotiate in principle with the Nation Grid at any point to date. I feel this just reiterates their inability to manage such a project.

The changes proposed are lacking in detail, and will change vast amounts of their DCO's this needs to be treated as a new application and that's why I believe Sunnica needs to hold full DETAILED public consultations.

Lastly- Please note I have submitted two responses via this email. One being from Worlington Parish Council, I am their representative. This is due to the clerk, who has the only access to our registered email is currently unavailable.

This one from myself.

Cllr. Paula MacKenzie
(Maddie)
