I am responding as an interested party to your request for comments on the proposal to delay the inspection process for this project (Sunnica Energy Farm) due to difficulties in establishing a site for the extension of Burwell sub-station.

I consider the proposed time-frame for the delay is insufficient as there are several issues to be considered:

- the impact of the changes on the original planning application
- the impact on the environment, wildlife and roads
- insufficient time for public consultation on these proposed changes
- whether the National Grid can accept these modifications

In view of these changes to the original planning application Sunnica should be required to submit a new application detailing a review of the issues under consideration.

Yours sincerely
Jennifer Hall
