Dear sirs,

I am amazed and concerned that only now a problem has emerged regarding the connectivity to the national Grid. It seems that consultation in the early stages was flawed and provides no guarantees or reassurance that this latest proposal to link to the grid is anything but to get this done without proper evaluation.

i do not agree that delaying the Preliminary Meeting until mid-July 2022 would give sufficient time for this to be evaluated. Therefore I do not see how the indicative timetable to consult further on amendments could be achieved by the dates indicated.

Yours faithfully
S Derry
