Sunnica have proven to be inept in every step of this proposal. I have no trust in them and I believe their intentions are not honourable. The farmland should be treated as such and not covered in these hideous panels. I live nearby and have seen the expansion of these panel deserts in the fens on prime farmland and this has to stop now. Because of their ability to keep missing deadlines I say enough is enough and stop it now. Suggest to this company that they approach factories for use of their roofs and leave the countryside alone.
