FAO: Grahame Kean

Dear Mr Kean,

Planning Act 2008 – Application for a Change to the submitted Development Consent Order for Sunnica Energy Farm – Additional Information Request

Application Ref: EN010106

On behalf of Sunnica Ltd (the Applicant) I am pleased to enclose the additional information requested by the Examining Authority in its letter dated 8 September 2022 in respect of the Change Application for Sunnica Energy Farm (the Scheme) which was submitted on the 30th of August 2022.

1.1 Elevation and general arrangement figures (Question 1)

- 1.1.1 As requested, the general arrangement and elevation figures for the 400kV substation solution at Sunnica West Site A, Sunnica East Site A and Sunnica East Site B have been updated to enable easy comparison between the equivalent figures of the 132kV substation solution at Sunnica West Site A, Sunnica East Site A and Sunnica East Site B, as shown in the existing application.
- 1.1.2 These changes will allow the building size, orientation, position and layout within each site shown on the changes application figures to be readily identified and compared with the figures submitted with existing application.
- 1.1.3 The Examining Authority should note that figures showing layouts and elevations of the substations that were submitted with both the existing application and with the changes application are illustrative of one way in which the Scheme could be delivered. The maximum parameters for each of the substations are defined by the Design Principles in Appendix B of the Design and Access Statement [**AS-312**]. These maximum parameters for the 400kV substations are unchanged from the maximum parameters for the 132kV substations that are set out in the existing application. It is the maximum parameters defined by the Design Principles in Appendix B of the Design and Access Statement [**AS-312**] that have been assessed by the Environmental Statement.

- 1.1.4 The purpose of these illustrative figures is to present a visual representation of the nature and type of equipment that could be included within the substation compounds. The individual dimensions or orientations of buildings or other components are not defined by the illustrative plans. For this reason:
- a. The figures are shown 'not to scale'. This is the same as the approach that was accepted for the equivalent plans included with the existing application. The figures are presented with a consistent appearance and level of detail as was provided for the illustrative plans of the 132kV substation solution in the existing application, which has been accepted. This enables easy comparison between the changes and existing application figures.
 - b. The illustrative figures do not depict the proposed orientation of the substation compounds or any of the components. No north arrow is therefore shown on the figures. This approach is consistent for both the changes and existing application figures and therefore enables comparison between the two sets of figures.
 - c. The illustrative figures do not include annotations of heights or footprint dimensions of components of the substation, as the illustrative figures do not define these. The maximum heights and footprints of each of the substations (as defined by the Design Principles in Appendix B of the Design and Access Statement [AS-312]) are annotated on the figures. This approach is consistent for both the changes and existing application figures and therefore enables comparison between the two sets of figures.
- 1.1.5 The Applicant confirms that the maximum footprint shown on Figure 5-3 is 85m x 55m.
- 1.1.6 The correct maximum footprint shown at Figure 5-5 is 130m x 85m.
- 1.1.7 The updated figures are provided in Appendix A. Table 1, below, lists each of the figures referenced in Question 1 of the Examining Authority's letter dated 8 September 2022 along with a reference to where the current version of the equivalent figure can be found.

Table 1. Substation Layout and Elevation Illustrative Figures

Figure ref in Proposed Changes to the Application document [AS-243]	Figure Title	Figure Number	Revision	Submitted with	Document Library Reference	Notes
Figure 5-1	General Arrangement – Sunnica West Site A – 132kV solution (illustrative)	Figure 3-9b	0	Existing Application	APP-145	N/A
Figure 5-2	Proposed General Arrangement – Sunnica West Site A – 400kV solution (Illustrative)	Figure 3-28b	1	New Figure	TBC	Previous version (Rev 0) submitted with Change Application [AS-306 & AS-265]

Figure 5-6	Proposed General Arrangement – Sunnica East Site B – 400kV solution (Illustrative)	Figure 3-30b	1	New Figure	TBC	Previous version (Rev 0) submitted with Change Application [AS-309 & AS-268]
Figure 5-7	Sunnica West Site A Substation Elevation – 132kV solution (illustrative)	Figure 3-9a	0	Existing Application	APP-144	N/A
Figure 5-8	Sunnica West Site A Substation Elevation – 400kV solution (illustrative)	Figure 3-28a	1	New Figure	TBC	Previous version (Rev 0) submitted with Change Application [AS-305 & AS-264]
Figure 5-9	Sunnica East Site A Substation Elevation – 132kV solution (illustrative)	Figure 3-10a	0	Existing Application	APP-146	N/A
Figure 5-10	Sunnica East Site A Substation Elevation – 400kV solution (illustrative)	Figure 3-29a	0	New Figure	TBC	Previously shown by Figure 3-29 submitted with the Change Application [AS-307 & AS 266]
Figure 5-11	Sunnica East Site B Substation Elevation – 132kV solution (illustrative)	Figure 3-11a	0	Existing Application	APP-148	N/A
Figure 5-12	Sunnica East Site B Substation Elevation – 400kV solution (illustrative)	Figure 3-30a	1	New Figure	TBC	Previous version (Rev 0) submitted with Change Application [AS-308 & AS-267]

1.2 Clarification on documents and plans submitted with the Change Request

Schedule of documents and plans for the Environmental Statement (Question 2)

1.2.1 The Change Request document **[AS-243]** contains an environmental appraisal of each of the identified changes, namely:

- a. Proposed change 1: Removal of Option 1 National Grid Substation Extension;
- b. Proposed change 2: Option 3 400kV cabling within Grid Connection Routes A and B; and
- c. Proposed Change 3: 33 to 400kV transformers.

1.2.2 An environmental assessment of each of the above proposed changes was undertaken to identify any likely significant effects that would be new or materially different from those presented in the ES submitted in support of the DCO application.

1.2.3 As documented within the Change Request **[AS-243]**, the assessments determined that there would be no new or materially different significant effects and therefore, the assessments and findings contained within the original ES documentation, including plans and technical appendices, remain valid.

1.2.4 However, a number of documents within the suite of ES documents have been updated and new figures have been provided in order to provide clarity on the Scheme component. The table below outlines those documents and plans and provides a brief justification for each.

Document Name	Justification for new / updated document or plan
Environmental Statement - Chapter 0 - Table of Contents, Glossary and Abbreviations	Chapter 0 has been updated to include a definition for Abnormal Indivisible Load / Crane within the Glossary table.
Environmental Statement - Chapter 3 - Scheme Description	Chapter 3: Scheme Description has been amended to incorporate the proposed design changes.
Environmental Statement - Appendix 13C - Framework Construction Traffic Management Plan and Travel Plan	The Framework Construction Traffic Management Plan and Travel Plan has been amended to include the swept path analysis and to reflect the consequent changes to traffic management.
Environmental Statement - Appendix 16C: Framework Construction Environmental Management	The Framework Construction Environmental Management Plan has been updated to remove the requirement for specific mitigation measures associated with the Burwell National Grid Substation Extension Option 1.
Environmental Statement - Figure 3-20,	The update to Figure 3-20 reflects the removal of Option 1 Burwell National Grid Substation Extension.
Environmental Statement – Figure 3-25 a to d,	Figure 3-25 a to d has been updated to reflect the relocation of the access off Weirs Drove (CR-A1 to CR-A2) by approximately 50m to the west to the existing Burwell National Grid Substation’s existing access.
Environmental Statement – Figure 3-28a (new figure)	A new figure has been provided to show Sunnica West Site A substation elevation for the 400kV solution.
Environmental Statement – Figure 3-28b (new figure)	A new figure has been provided to show Sunnica West Site A substation general arrangement for the 400kV solution.
Environmental Statement – Figure 3-29 (new figure)	A new figure has been provided to show Sunnica East Sites A and B substation elevation and general arrangement for the 400kV solution.
Environmental Statement – Figure 3-30a (new figure)	A new figure has been provided to show Sunnica East Site B substation elevation for the 400kV solution.
Environmental Statement – Figure 3-30b (new figure)	A new figure has been provided to show Sunnica East Site B substation general arrangement for the 400kV solution.
Environmental Statement – Figure 3-31 (new figure)	A new figure has been provided to show the 400kV cable cross section.
Environmental Statement – Figure 3-32 (new figure)	A new figure has been provided to show the 400kV jointing bay section.

1.2.5 A full schedule of documents and plans which constitute the Environmental Statement (ES) is attached in Appendix B.

Flood Risk Assessment and Habitats Regulations Assessment reports (Question 3)

1.2.6 As identified above, no new or materially different significant effects were identified as part of the environmental assessment of the proposed changes;

therefore, the Flood Risk Assessment and Habitats Regulation Assessment reports remain valid.

Appendix I: Traffic Regulation Measures Plans - Road Closures (Question 4)

- 1.2.7 There are no changes to the proposed road closures as a result of the three design changes identified above. However, as identified in Table 5-3 of the Change Request **[AS-243]** application the *Traffic Regulation Measures Plans - Road Closures* plans have been updated to account for the change in the Order limits as a result of Abnormal Indivisible Load (AIL) oversail at the 1102 Mildenhall Road / Unnamed Road Junction. Due to the location of the change in the Order limits, only the key plan was affected and therefore presented within the Change Request **[AS-243]** application.

Changes to documents submitted with the Change Request [AS-243] (Question 5 and 6)

- 1.2.8 The Applicant can confirm that the Book of Reference (BoR) and other documents provided with the Change Request **[AS-243]** application only contain changes/amendments relating to the three design changes. No additional changes were included. Where commitments are made to update documents the Applicant will do this during the course of the examination. It would be beneficial to do that once a decision on whether the Changes Request has been accepted.

1.3 Other matters

Response to Relevant Representations

- 1.3.1 The Applicant notes the comments of the Examining Authority in its letter in respect of the early submission of the Relevant Representations. As a result, the Applicant will not submit these until the appropriate time as outlined in the revised timetable issued by the Examining Authority. Currently that is 19 October 2022.

We hope the above provides clarity on the points raised by the Examining Authority. If we can be of any additional assistance, please do not hesitate to contact us using the details provided below.

Yours sincerely,
