

Myself and my family are completely against this proposed development on the following grounds-

1/ The extreme scale of this scheme is untested and without precedent. It raises serious questions on health and safety grounds. There are too many untested technologies as proposed. The safety of ourselves and our homes are at risk.

2/ The value of our homes will be severely degraded if this scheme is built.

3/ The chaos to our local narrow roads during the lengthy build will undoubtedly lead to road accidents, resulting in greater death and injuries.

4/ The residents of all three villages and surrounding areas are 100% United against this scheme.

5/ It represents a great threat to our normal way of life and a severe long term threat to our abundant wildlife.

This vast and damaging proposal represents a threat to our way of life here and we shall all fight it until it is defeated.
