

8th November 2022

The Planning Inspectorate
Sunnica Energy Case Team
National Infrastructure Planning

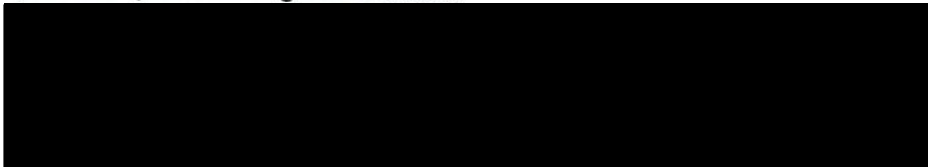

To whom it may concern
Sunnica Industrial Solar Park

We have attached our letters dated 18th October 2021 and 6th August 2022 and a plan showing where we live. They set our position clearly and it remains unaltered.

We were pleased that our homes were visited during the site visit on 2nd November. You will have seen how close Sunnica is to our homes. We understand that on other areas of the development they have been set back 500 meters from houses. Why are we different.

The Huge Battery site is genuinely frightening. We cannot be asked to be its neighbour. How can we not have been consulted on this as you will have seen from your visit it is obvious we are living here.

We remain totally against this scheme and ask that it is refused. On the field next to us, in the last three years we have watched sugar beet, potatoes and now corn grow really well. Don't let anyone try and persuade you it is not good farmland.

I have seen that we are on the agenda
for the Meeting on 7th December.
We would like to attend.

6th August 2022

The Planning Inspectorate
Sunnica Energy Case Team
National Infrastructure Planning

To whom it may concern
Sunnica Industrial Solar Park

Consultation 6th June to 6th July

As we said in our letter 18th October 2021 sent to Mr Phillips and Ms Barrow we live 50 metres from the Sunnica East Site B. The letter is enclosed/attached.

Throughout the whole Sunnica Application process we have not been contacted by anybody from Sunnica Ltd or anybody working for them. We do not understand how this is possible as we will be worst affected by anything that happens on Sunnica East Site B. We were not consulted or contacted between the 6th June and 6th July 2022.

We put in the strongest objection to the Sunnica Scheme and wish to be involved in the Public Examination. As the worst affected Community please add us to the interested party list. Sorry this request is so late but we have just not been kept informed.

Thank you for your help.

Signed by the Travellers Community Elms Road

Dear Mr Phillips and Ms Barrow

OBJECTION LETTER TO THE SUNNICA INDUSTRIAL PARK

We have lived at our site off Elms Road for four years with our families. This is our home. We have shown our site shaded red on the attached plan

We are the closest people to the Sunnica East Site B Battery Energy Storage System and the solar panels come right up to our boundary. We estimate we are only 50 yards from the batteries.

We have NEVER been contacted or consulted about this scheme by Sunnica or any representative of Sunnica.

If this scheme was allowed to go ahead it would have a very bad effect on our property. We should have been contacted and consulted. We do not want to live within 50 yards of one of the Largest Battery farms in the world. It will make us nervous and have a very bad effect on our property and our general health and wellbeing. Currently we have two children living here who suffer from poor health.

We know these types of batteries catch fire, we have heard about thermal runaway, we know if they do catch fire they give off dangerous gasses, and they can't be put out. Why do people have to live so close to them. We must be protected.

It is not acceptable for us to have not been consulted and we strongly object to the scheme, which should be refused. It will destroy the area we live in and is not a green scheme. It will generate more carbon than it saves. Apparently the batteries will have to be replaced 5 times during the 40 years of the scheme

Please contact us as a matter of urgency.
