Subject: Questions for Sunnica

Parish Council Briefing 21st September:

- 1/ How many acres or hectares is the scheme now being proposed. Have all the landowners now signed up?
- 2/ How many miles of cabling are being used between the three sites
- 3/ How will the panels be secured into the ground. If concrete is to be used will it not prevent the land being returned to agriculture
- 4/ How does the business model work? Will you store electricity and sell into to the grid when the price is favourable. Will you buy electricity from the grid to recharge the batteries when the price is cheap during the day or night?
