## Freckenham Parish Council comments on Written Representations

### Registration identification 20030879

Freckenham Parish council would like to comment on the Written Representation of the Say no to Sunnica Action Group (SNTS), the council wish to fully support this submission and particularly the following issues.

-Point 2. Cumulative impact. These village communities and certainly ours are not large, the Sunnica plan is by comparison huge and will dwarf and almost surround our village, completely altering the way of life we have until now enjoyed.

-Point 3. Landscape and visual impact, the landscape here is essentially open flat land, anything industrial imposed will be overwhelming.

-Point 5. Agriculture, since records were kept this has been and still is a successful agricultural community, a large variety of crops are grown in the surrounding area.

-Point 8. The racing Industry, we have vets and others working in Horse racing in Newmarket that live in the village and need to get to and from the town at all times of day. Racegoers and Sales workers stay in the pub. Much of what the village benefits from, comes from the many businesses involved in Newmarket.

-Point 9. Harm to local communities, all these villages are interlinked through friendships, family and working in similar jobs, our ability to move freely and work will be very much compromised by this scheme.

-Point 14. BESS, all that we have learned of the storage systems planned are giving great concern to the inhabitants, there is too little information and we understand very questionable safety issues, please could this be looked into in greater detail.

Kind regards

**Jadi**

Jadi Coe

Clerk to Freckenham Parish Council
