

Annette Flindall response to deadline 6
Unique ref no: 20031440

I am writing to you in response to the Sunnica Energy Farm Application

In my view the applicant has deliberately made it difficult for interested parties to read through the multiple documentation, I am not alone in thinking this. Exp, Peter Goodyear doc from Sat Jan 28th there are many others.

I support Edmund Fordham's statement at the open floor hearings regarding the proposed battery safety and concerns.

I am also supportive of Nick Wrights stance on Land classification. This land NEEDS to be looked at further and reassessed.

MP's Matt Hancock and Lucy Frazer have also requested to the examination authority that the schemes land needs to be reassessed by an an independent body.
