

10th March 2023

Dear Sir/Madam,

Unique ref nos: 20030894

Deadline 8

We see that Sunnica are still planning to put solar panels right outside our front doors, and a huge battery compound and substation just a few yards to the north of our homes.

We also see that in Worlington, panels have been pushed back to around 500 yards away from the homes of residents there. Why are we not being given the same consideration? Is it because we are travellers?

These are our homes. We own this site and we like living here. We are still being completely ignored by Sunnica.

We don't want to look out of our front doors onto fields of panels. We don't want to live in the shadow of a huge and dangerous battery storage compound and substation.

As we have always said nobody from Sunnica has ever come and talked to us about what they are wanting to do. This we think is very bad of them and shows no respect for what we stand to lose if Sunnica goes ahead.

Yours faithfully,

on behalf of the Travellers Community
