

The Councils submitted an Additional Submission at Deadline 7 [REP7-095] proposing the use of the Rochdale principle in relation to the Agricultural Land Classification issue. This was in light of anomalies identified by interested parties including SNTS that seemed to raise reasonable and significant doubts about the ALC assessment submitted by Sunnica. The SNTS submission to Deadline 8 [REP8-50] is clear that those reasonable and significant doubts remain. Cambridgeshire & Peterborough Combined Authority therefore supports the Councils position as set out in REP7-095 that the Rochdale principle should be applied.
