24th March 2023

Dear Inspectorate,

The Proposed Sunnica Sola Farm EN010106

As a neighbouring farm to the proposed Sola farm, I ask the inspectors to request in the fairness to all concerned that an independent soil survey be undertaken.

The report submitted by Sunnica does not represent ground conditions that we have on the farm.

The Agricultural land Classification report produced by Patrick Stephenson Ltd August 202,1 clearly states that the land adjacent to the proposed sola farm is of a higher grade than Sunnica would have us all believe.

Natural England's predictive map is a closer representation to the land in the area.

Yours Sincerely

Mrs E m Garget
