

Submission ID: 15558

Dear Inspectorate,

I have just seen that a large number of new documents have been submitted by Sunnica, and published this evening. I spotted a new fire safety plan but haven't had chance to properly review this as yet, nor some of the other technical notes etc. What is the process for making comments on these if the Examination closes tonight as planned? Also, please can you clarify what is allowed to be commented on? I had understood from your rule 17 letter that the last 2 deadlines were only for specific information requested by you? Have I misunderstood this? Thank you for letting me know how I can submit any further comments for your consideration once I have reviewed the new information.
