Hello

My wife & I live in Worlington & we are both in our [REDACTED] Sunnica have not convinced us that their Lithium Ion Battery Storage Compounds are as safe as they should be. We are more than apprehensive about what might happen.

I have attended a couple of the public sessions & the Sunnica officials were unconvincing & dismissive about local concerns.

Please refuse this application or at least send Sunnica away to come up with a safer proposal that is more sympathetic to the area. Nobody is against solar panels but this too big & too dangerous.

Yours Sincerely

Donald & Marie MacBean
