Dear Sirs

Having read the replies, I am still FIRMLY against this massive development because:

- It is far too big
- It is on high quality Arable land (despite what Sunnica claim), and post Brexit we need to grow more of our own food
- It will adversely affect wildlife and the quality of life of locals
- The BESS are unproven and LiFe batteries are dangerous and cant be put out. The Radon fire suppressant will NOT be able to cope with a BESS fire.
- Many BESS are located close to schools and houses
- No one, from locals up to the 2 MPs, support this development. NO ONE.
- This is not really a solar farm. It is an Energy Arbitrage operation, using the battery storage, for 80% of the profits.
- Only reason Sunnica is promoting this location is because they ONLY have to deal with 3 landlords, which is unusual and makes their job easy
- The landowners may well have very significant end of scheme clean up costs, should an operator fail or go bust.!

So please follow the lead of the 2 MPs and REJECT this grotesque and dangerous scheme.

Kind regards,

John

John Bridges
