As the local member for Isleham I am amazed that the acceptance of soil sampling by Sunnica is thus. This land simply can not and is not as prescribed within the documents and a duplicate, non-Sunnica funded set of samples should be allowed and undertaken.

This argument is at the heart of the issues here. Land used for crops and livestock for many years now rendered poor quality simply does not add up. Please can the inspectorate determine duplicate soils testing to ensure that the decisions to be reached are made on sound and valid evidence?

Kind regards

Mark Goldsack
