## **EN010106: Sunnica Energy Farm**

**Dear Sir/Madam**

**Further to your email from Pinsent Mason 10<sup>th</sup> August 2023**

**I have many, many unanswered question with regarding Sunnica proposal, however to answer your questions and my major concerns.**

**Sunnica states that it does not know IF Hazasous Substance consent is required as they don not know what detailed design they are going to use!!! Surely, consent cannot be given on an unknown detailed design. I would not be given consent to build a house on land owned without submitting plans and design to the local authorities, let alone to the SoS.**

**7.2 stating No calculation for the claim by SNTS is presented.**

**7.3 'SNTS have not presented any site assessments to support its claim on BMV. ' I personally find it totally unfair that an independent soil analysis was not required by the Ex.A. I also find it absolutely incredulous that Sunnica state that the SNTS group have not produced any evidence of the evaluation of the farm land. I have personally asked one of the farmers if I /we could take soil samples. He informed me that he would have to ask his Estate Manager. Sadly the response was negative as ALL farmers had to sign am agreement to NOT allow us onto the land. It is clearly obvious to anyone that lives-in this area the crops that are grown ALL year round on this fertile soil.**

**Natural England was invited to confirm draft evidence regarding stone curlew population, sadly no information has been made public.**

**From start to finish Sunnica and Aecom have been dishonest, given convoluted answers, to questions raised, to fit THEIR purpose. I'm**

**absolutely devastated that this monstrous proposal has proceeded so far with such a detrimentally impact to residents and the environment.**

**Regards Annette Flindall**
