---

Dear Sirs, we have been asked to respond again to the further information provided on the Sunnica Application. Having read the next round of paperwork provided by the applicant and their advisors, I am not in any way of a different opinion than at first, there is nothing in this scheme that will do anything but damage the communities and despoil the highly productive farm land. To suggest it is less than good farming land is to deny what we see here all year round, healthy fields producing a wide variety of much needed foodstuffs. It is difficult to see how anyone could make a judgement otherwise having spent any time in the area. The land not farmed has been 'horse land' for many hundreds of years and has the foremost reputation internationally for breeding, rearing, trading and training the best racehorses in the world, any form of Industrialisation would have a hugely detrimental effect on the standing that the UK has in the world in this field. Please do not consider granting this application.

Yours sincerely,

Katherine Stewart unique reference 20031224
