Hello chaps

I live in the village of Cavenham, not far from the site proposal.

I wholeheartedly support the solar development.

In my lifetime I have had to deal with the consequences of baby boomer and Gen x selfishness, greed, and general hoarding.

They want to have their cake and eat it - I say ignore them.

I want a planet and a country that takes active steps to ensure energy security, clean energy solutions, carbon reduction, and habitat creation - something these solar farms will give.

It is far better than the greedy land hoarding of a few very wealthy, very selfish individuals that are upset their view will be spoilt.

Having more money shouldn't make you more important. I implore you to do the right thing for everyone, and get this solar farm built.

You have my support!

Dr Girling
